**They stopped sending their kids to school** Michael Wenkart,2014-04-09 Is homeschooling a reasonable alternative to the classical school system Estimates suggest there are at least 1 5m Americans who have turned to homeschooling for their children Whether this is due to a perceived failing in the state education system religious or political convictions or the need to accommodate some special need of the student or family it is an issue that causes controversy and undoubtedly raises very serious questions about the state of future generations of American citizens Advocates of the system claim it improves the education of the child shapes it more to their needs and aptitudes and leads to a more rounded individual experience Critics claim it undermines the public school system makes children more narrow and prejudiced in their outlook and doesn t offer any significant advantages academically So who is right As with all such debates there is a high degree of subjectivity involved when assessing claims and counterclaims It is difficult to substantiate or disprove a lot of these and not enough objective scientific research has been conducted to come up with conclusive results either way Many who have used the system are very happy with the results though they assert it is hard work and requires lots of commitment and often cost A few are honest enough to admit there are considerable drawbacks and that the concept is not suitable for everyone adults or children A lot of its critics are opposed to it on political grounds claiming it is a reactionary idea that breeds inequality and perpetuates right wing principles Others oppose the association with religious beliefs though there is no strong evidence that this is a major factor in most decisions to homeschool Homeschooling has had a long hard road to acceptance It has been equated with truancy and
