Models And Measurement Of Welfare And Inequality:

Models and Measurement of Welfare and Inequality Wolfgang Eichhorn, 2012-01-19 The literature on economic problems connected with measuring and modelling of welfare and inequality has grown rapidly within the last decade Since this literature is scattered throughout a great number of journals on economics economic theory econometrics and statistics it is difficult to get an adequate picture of the present state of the art Therefore books should appear from time to time which offer a representative cross section of the latest results of research on the subject This book offers such material It contains 54 articles by 84 authors from four of the five continents Each paper has been reviewed by two referees As a consequence the contributions of this book are revised versions or in many cases revised revisions of the original papers The book is divided into four parts Part I Measurement of Inequality and Poverty This part contains eleven papers on theory and empirical applications of inequality and or poverty measures Two contributions deal with among other things experimental findings on questions concerning the acceptance of distributional axioms Part II Taxation and Redistribution Distributional or rather redistributive aspects play an important role in Part II The topics of the 14 papers included in this part range from tax progressivity and redistribution allocative consequences of splitting under income taxation and connections between income tax and cost of living indices to merit goods and welfarism as well as to welfare aspects of tax reforms Models and Measurement of Welfare and Inequality Wolfgang Eichhorn, 1994-10-05

Handbook of Income Distribution

Anthony Barnes Atkinson, François Bourguignon, 2000 *The Gini Methodology* Shlomo Yitzhaki, Edna Schechtman, 2012-11-13 Gini's mean difference GMD was first introduced by Corrado Gini in 1912 as an alternative measure of variability GMD and the parameters which are derived from it such as the Gini coefficient or the concentration ratio have been in use in the area of income distribution for almost a century In practice the use of GMD as a measure of variability is justified whenever the investigator is not ready to impose without questioning the convenient world of normality This makes the GMD of critical importance in the complex research of statisticians economists econometricians and policy makers This book focuses on imitating analyses that are based on variance by replacing variance with the GMD and its variants In this way the text showcases how almost everything that can be done with the variance as a measure of variability can be replicated by using Gini Beyond this there are marked benefits to utilizing Gini as opposed to other methods One of the advantages of using Gini methodology is that it provides a unified system that enables the user to learn about various aspects of the underlying distribution It also provides a systematic method and a unified terminology Using Gini methodology can reduce the risk of imposing assumptions that are not supported by the data on the model With these benefits in mind the text uses the covariance based approach though applications to other approaches are mentioned as well **Taxation and Economic Behaviour: Introductory surveys in economics** John Creedy, 2001-01-01 This volume offers a number of broad introductory surveys in public economics and public finance Divided clearly into two parts measurement issues and taxation

and economic behaviour the collection consists of published refereed papers and several unpublished pieces Against Injustice Reiko Gotoh, Paul Dumouchel, 2009-10-29 A team of distinguished academics explore the ideas underlying Amartya Sen's critique of traditional approaches to injustice Higher Education: Handbook of Theory and Research Michael B. Paulsen, 2016-04-12 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community Each annual volume contains chapters on such diverse topics as research on college students and faculty organization and administration curriculum and instruction policy diversity issues economics and finance history and philosophy community colleges advances in research methodology and more The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world Quantitative Approaches to Multidimensional Poverty Measurement N. Kakwani, J. Silber, 2008-02-21 This book is written in light of the latest developments in the field of multidimensional poverty measurement It includes clear presentations of more than a dozen different quantitative techniques and provides empirical illustrations based on data sources from developed or developing countries Amartya Sen's Capability Approach Wiebke Kuklys, 2005-10-04 Kuklys examines how Nobel Prize winning economist Amartya Sen's approach to welfare measurement can be put in practice for poverty and inequality measurement in affluent societies such as the UK Sen argues that an individual's welfare should not be measured in terms of her income but in terms what she can actually do or be her capabilities In Chapters 1 and 2 Kuklys describes the capability approach from a standard welfare economic point of view and provides a comprehensive literature review of the empirical applications in this area of research In the remaining chapters novel econometric techniques are employed to operationalise the concepts of functionings and capability to investigate inequality and poverty in terms of capability in the UK Kuklys finds that capability measurement is always a useful complement to traditional monetary analysis and particularly so in the case of capability deprived disabled individuals Measuring Economic Sustainability and Progress Dale W. Jorgenson, J. Steven Landefeld, Paul Schreyer, 2014-10-17 Since the Great Depression researchers and statisticians have recognized the need for more extensive methods for measuring economic growth and sustainability The recent recession renewed commitments to closing long standing gaps in economic measurement including those related to sustainability and well being The latest in the NBER's influential Studies in Income and Wealth series which has played a key role in the development of national account statistics in the United States and other nations this volume explores collaborative solutions between academics policy researchers and official statisticians to

some of today's most important economic measurement challenges Contributors to this volume extend past research on the integration and extension of national accounts to establish an even more comprehensive understanding of the distribution of economic growth and its impact on well being including health human capital and the environment The research contributions assess among other topics specific conceptual and empirical proposals for extending national accounts

Dynamic Perspectives on Managerial Decision Making Herbert Dawid, Karl F. Doerner, Gustav Feichtinger, Peter M. Kort, Andrea Seidl, 2016-09-15 This volume collects research papers addressing topical issues in economics and management with a particular focus on dynamic models which allow to analyze and foster the decision making of firms in dynamic complex environments The scope of the contributions ranges from daily operational challenges firms face to strategic choices in dynamic industry environments and the analysis of optimal growth paths The volume also highlights recent methodological developments in the areas of dynamic optimization dynamic games and meta heuristics which help to improve our understanding of optimal decision making in a fast evolving economy

Advances in Econometrics, Income Distribution and Scientific Methodology Daniel J. Slottje, 2012-12-06 Articles on econometric methodology with special reference to the quantification of poverty and economic inequality are presented in this book Poverty and inequality measurement present special problems to the econometrician and most of these papers analyze how to attack those problems The topics and contributions in the book are a very good representation of Camilo Dagum's astounding diversity of interests and overall eclecticism Several of the authors are leading pioneers in econometric methodology Several others are pioneers in economic theory and others are the leading applied economists in income distribution analysis in the world The topics accurately reflect Camilo Dagum's breadth of understanding across various economic sub fields all complex in nature

Measuring What We Spend National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Redesigning the BLS Consumer Expenditure Surveys, 2013-02-15 The Consumer Expenditure CE surveys are the only source of information on the complete range of consumers expenditures and incomes in the United States as well as the characteristics of those consumers The CE consists of two separate surveys 1 a national sample of households interviewed five times at three month intervals and 2 a separate national sample of households that complete two consecutive one week expenditure diaries For more than 40 years these surveys the responsibility of the Bureau of Labor Statistics BLS have been the principal source of knowledge about changing patterns of consumer spending in the U S population In February 2009 BLS initiated the Gemini Project the aim of which is to redesign the CE surveys to improve data quality through a verifiable reduction in measurement error with a particular focus on underreporting The Gemini Project initiated a series of information gathering meetings conference sessions forums and workshops to identify appropriate strategies for improving CE data quality As part of this effort BLS requested the National Research Council's Committee on National Statistics CNSTAT to convene an expert panel to build on the Gemini Project by conducting further

investigations and proposing redesign options for the CE surveys The charge to the Panel on Redesigning the BLS Consumer Expenditure Surveys includes reviewing the output of a Gemini convened data user needs forum and methods workshop and convening its own household survey producers workshop to obtain further input In addition the panel was tasked to commission options from contractors for consideration in recommending possible redesigns The panel was further asked by BLS to create potential redesigns that would put a greater emphasis on proactive data collection to improve the measurement of consumer expenditures *Measuring What We Spend* summarizes the deliberations and activities of the panel discusses the conclusions about the uses of the CE surveys and why a redesign is needed as well as recommendations for the future

The Palgrave Companion to Harvard Economics Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists these two volumes show how economics became established at the University how it produced some of the world's best known economists including Joseph Schumpeter Wassily Leontief and John Kenneth Galbraith and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Harvard economics

Political and Military Sociology Bruce D. McDonald III, 2017-07-12 *Political and Military Sociology* Volume 41 explores the social elements and impact of national defense The origin of government is a response to a society's common interest in security and defense In recent years security and defense issues and government responses have become increasingly prominent in societies around the world Despite intermittent pushes for privatization however security and defense have remained core functions of government In this volume Bruce D McDonald III investigates the historiography of the defense growth relationship Lachezar G Anguelov and Robert J Eger III consider the social impact with a case study of the Republic of Serbia Maximiliano Mendieta and Bruce D McDonald III consider the social spillovers of the sector that arise after the completion of a soldier's service Paul Kellogg considers why some countries have fared well when others have been slow to rebound Hamid E Ali studies pork barrel spending in the United States Susan Sample Brandon Valeriano and Choong Nam Kang broaden the understanding of the defense sector to include its output Hamid E Ali and Ubah A Adan conclude the volume with a study on conflict and infant and child mortality rates Traditionally national defense is viewed solely in military terms As part of their national security objectives many defense sectors have undertaken a variety of social programs While the existence of social programs is known what remains uncertain is how they spill over from the sector to society at large and what is the impact of that spillover

From Farm to Firm, 2011 The process of rural urban transformation presents both opportunities and challenges for development If managed effectively it can result in growth that benefits everyone if managed poorly it can lead to stark welfare disparities and entire regions cut off from the advantages of agglomeration economies The importance of

rural urban transition has been confirmed by two consecutive World Development Reports WDR 2008 Agriculture for Development and WDR 2009 Reshaping Economic Geography Focusing on Sub Saharan Africa and South Asia this book picks up where the WDRs left off investigating the influence of country conditions and policies on the pace pattern and consequences of rural urban transition and suggesting strategies to ensure that its benefits results in shared improvements in well being The book uncovers vast inequalities whether between two regions of one country between rural and urban areas or within cities themselves The authors find little evidence to suggest that these inequalities will automatically diminish as countries develop empirical and qualitative analysis suggests that spatial divides are mainly a function of country conditions policies and institutions By implication policymakers must take active steps to ensure that rural urban transition results in shared growth Spatially unbiased provision of health and education services is crucial to ensuring that the benefits of transition are shared by all But connective infrastructure and targeted interventions also emerge as important considerations even in countries with severely constrained fiscal and administrative capacity The authors suggest steps for navigating the tricky political economy of land reforms And they alert readers to potential spillover effects that mean that policies designed for one space can have unintended consequences on another Policymakers and development experts as well as anyone concerned with the impact of rural urban transition on growth and equity will find this book a thought provoking and informative read

Employment and Development Gary S. Fields, 2019 This book brings together the contributions of 2014 IZA Prize in Labor Economics award winner Gary Fields to address global employment and poverty problems The central questions in his work are how economic growth affects standards of living how labor markets work in developing countries and how different labor market policies affect well being **IMF Research Bulletin, Summer 2017**

International Monetary Fund. Research Dept., 2017-08-11 The Summer 2017 issue of the IMF Research Bulletin highlights new research such as recent IMF Working Papers and Staff Discussion Notes The Research Summaries are Structural Reform Packages Sequencing and the Informal Economy by Zsuzsa Munkacsi and Magnus Saxegaard and A Broken Social Contract Not High Inequality Led to the Arab Spring by Shantayanan Devarajan and Elena Ianchovichina The Q A section features Seven Questions on Fintech by Tommaso Mancini Griffoli The Bulletin also includes information on recommended titles from IMF Publications and the latest articles from the IMF Economic Review **The European Social Model under Pressure** Romana Careja, Patrick Emmenegger, Nathalie Giger, 2019-07-11 The European Social Model is at a crossroad Although from the 1990s onwards the threat of an imminent crisis shaped much of the rhetoric surrounding the future of the welfare state disagreement within the academic community remains What is however increasingly clear is that with the global financial crisis and the Euro crisis that followed it the challenges the European Social Model faces have become more acute and demand action This volume launches a multifaceted inquiry into these challenges Each contribution written by renowned scholars in their fields represents an in depth exploration of issues that cut to the core of current political

economic and social processes They are an invitation to the seasoned scholars as well as to the beginning students of social sciences public administration or journalism to engage with by now a large body of scholarship to accompany the authors in their endeavours to seek an explanation to burning questions and start their own inquiries
