European researchers from a broad range of disciplines brought together under the European Research Network on Learning to Write Effectively were instructed to contribute short papers summarising their current activity. The papers are grouped around the four main themes. The first deals with issues around the development of basic low level writing skills, mainly in the early years of education. The second section focuses directly on issues around the teaching and learning of writing. This is divided into five parts that describe evaluations of different forms of writing instruction, research exploring the processes by which writers learn, methods of text assessment in educational contexts, research exploring the effects of various learner and teacher variables on the development of writing skill, and conceptions of and variation in educational text genres. The third section reports research exploring effective document design. The final section has a main focus on tools for exploring the writing process.
