**International Relations and the Problem of Time** Andrew R. Hom, 2020 This book develops a novel approach to the issue of time's widespread but poorly understood influence on the study of international politics

*The Oxford Handbook of Political Science* Robert E. Goodin, 2011-07-07 Drawing on the rich resources of the ten volume series of The Oxford Handbooks of Political Science this one volume distillation provides a comprehensive overview of all the main branches of contemporary political science political theory political institutions political behavior comparative politics international relations political economy law and politics public policy contextual political analysis and political methodology Sixty seven of the top political scientists worldwide survey recent developments in those fields and provide penetrating introductions to exciting new fields of study Following in the footsteps of the New Handbook of Political Science edited by Robert Goodin and Hans Dieter Klingemann a decade before this Oxford Handbook will become an indispensable guide to the scope and methods of political science as a whole It will serve as the reference book of record for political scientists and for those following their work for years to come

*Approaches and Methodologies in the Social Sciences* Donatella Della Porta, Michael Keating, 2008-08-28 A revolutionary textbook introducing masters and doctoral students to the major research approaches and methodologies in the social sciences Written by an outstanding set of scholars and derived from successful course teaching this volume will empower students to choose their own approach to research to justify this approach and to situate it within the discipline It addresses questions of ontology epistemology and philosophy of social science and proceeds to issues of methodology and research design essential for producing a good research proposal It also introduces researchers to the main issues of debate and contention in the methodology of social sciences identifying commonalities historic continuities and genuine differences

*Evidence-Based Counterterrorism Policy* Cynthia Lum, Leslie W. Kennedy, 2011-11-06 In the past eight years there has been a massive increase in government

spending on counterterrorism intervention development and implementation Given this increase there are two evidence based policy questions that are important to address Is there evidence that any of these programs are effective in other words can they be shown to be linked to reducing terrorism terrorist recruiting or to improving the response and management of terrorist events Do these interventions have secondary or collateral effects that may be costly harmful illegal beneficial or otherwise As Lum and Kennedy discovered in an evaluation research on counterterrorism interventions only a minuscule number of empirical studies of terrorism exist and there is an almost complete absence of evaluation research on counter terrorism strategies This is startling given the enormous increases in the development and use of counter terrorism programs as well as spending on counter terrorism activity Even more disconcerting was the nature of the evaluations we did find some programs were shown to either have no discernible effect on terrorism or lead to increases in terrorism The emphasis of the need for empirical research in evaluating interventions and informing policy cannot be overstated and is the primary goal of Evidence Based Counterterrorism Policy

**Symbolic Power in the World Trade Organization** Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law **Symbolic Power in the WTO** not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics

**Negotiating Financial Agreement in East Asia** Kaewkamol Karen Pitakdumrongkit, 2015-10-30 Every international negotiation bears a risk of collapse as even among like minded countries different players often have different priorities and interests This can result in conflict as states clash over certain agreement details and their disputes can escalate and founder the entire negotiation missing an opportunity to realize potential initiatives However other circumstances have witnessed the cases of successful deals This begets a puzzle What did these states do to salvage their talks and seal their deals This book examines East Asian financial negotiation processes and seeks to explain why some negotiations are successful despite the risk of bargaining failure Using the Chiang Mai Initiative Multilateralization CMIM talks as the case study the book analyses how states with little prior experience at dealing with certain aspects of an agreement manage to avert negotiation failure and successfully conclude their final deal Using extensive archival research in depth interviews with involved negotiators and experts and process tracing method it reconstructs the making of the CMIM agreement The multi country analysis reveals the roles played by key actors namely China Japan South Korea Indonesia Malaysia and Thailand in shaping the agreement terms The book goes on to argue that preventing a stalemate or succeeding in concluding arrangements like the CMIM is a product of various strategies and tactics employed by negotiators These include employing bargaining strategies and tactics that help avoid a negotiation
