Models Of Development A Comparative Study Of Economic Growth In South Korea:

Models of Development Lawrence J. Lau, 1990 South Korea and Taiwan have political demographic and geographic qualities that are representative of third world countries in general and thus can provide examples for other developing countries The particular focus of this book first edition 1986 is on economic policies that can be adopted in other social and political settings Annotation copyrighted by Book News Inc Portland OR

Women in the Age of Economic Transformation Nahid Aslanbeigui, Steven Pressman, Gale Summerfield, 2005-08-04 Changes are sweeping the world economy and are most apparent in post socialist Europe and in the developing world This volume examines the impact these changes are having on women The authors discuss the evidence of gender bias and reach some telling if unsurprising conclusions Regardless of the country involved the findings point to consistent female disadvantage in the transformation process

The Flexible Economy Tony Killick, 2005-07-18 The accelerating pace of global change demands that economies must be adaptable Economies which are flexible flourish as in Eastern Asia Inflexible economies stagnate as in Eastern Europe and Africa However even though adaptability governs the long term progress of economies economists have had little to say about the nature and determinants of economic flexibility This book redresses that situation A prestigious team of contributors address the key theoretical and empirical issues using a wide range of country studies

The Newly Industrializing Economies of East Asia Anis Chowdhury, Iyanatul Islam, 2005-08-09 The phenomenal success of the East Asian Newly Industrializing Economies NIEs of Korea Taiwan Hong Kong and Singapore is now well known and documented Their success has been discussed to such an extent that it has become entrenched as part of the folklore of development economics The Newly Industrializing Economies of East Asia takes a fresh look at the relevant literature and sifts the rhetoric from the reality In the course of surveying the vast range of writing two competing paradigms become clear the neo classical approach which interprets the East Asian economic miracle as the predictable outcome of good policies and the statist perspective which draws attention to the central role of the government in guiding East Asian economic development Throughout the book the authors mix country specific experiences with broader trends

Korean Economic Dynamism D. Das, 1991-12-02 The Korean economy has experienced astoundingly rapid growth during the period 1960 90 and is now able despite its late start to compete with mature industrialised economies This book focuses on the underlying economic factors behind this unprecedented growth performance examining the failures as well as the undoubted successes of such development

The Newly Industrialising Economies of East Asia Anis Chowdhury, Iyanatul Islam, 1993 In surveying the vast range of writing on the East Asian NIEs and their development paths this book evaluates the competing roles of neo classical approaches and central government intervention in guiding economic development

Alternative Strategies for Economic Development Keith Griffin, 1999-06-30 The question of alternative strategies for economic development is the subject of great controversy and intense debate amongst practitioners and academics concerned with economic and social

progress in the Third World The core of this book is an analysis of the six most widely adopted strategies of development namely monetarism the open economy industrialisation the green revolution or agriculture led development redistributive strategies of development and socialist strategies **Asia-Pacific Economies** Iyanatul Islam, Anis Chowdhury, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company **Taiwan's Economic Success Since 1980** Zhaocheng Mai, Jiansheng Shi, 2001-01-01 the book will be of great help to readers interested in Taiwan's economic performance over the past twenty years Gilles Guiheux The China Journal Taiwan's economic development experience represents a unique case study especially in the wake of the Asian financial crisis Taiwan has performed outstandingly in terms of macroeconomic and industrial development particularly during recent democratic and social change This book aims to provide a broad picture of these institutional reforms and policy evolutions The Synergy Theory on Economic Growth: Comparative Study Between China and Developed Countries Jianhua Liu, Zhaohua Jiang, 2018-09-21 The book constructs the Synergy Theory a new theory of economic growth and calculation methodology The book involves empirical comparative study on economic growth between China and the 14 developed countries and on the basis of the synergy theory divides GDP into labor compensation capital income and synergistic benefits further establishes the new empirical model including the major determined factors of economic growth such as growth of physical capital stock growth of investment in physical capital improvement of science and technology improvement of human capital quality labor force growth institutional innovation and economic externalities Subsequently it uses the method of Data Envelopment Analysis to calculate the contribution of institutional innovation to economic growth and it also focuses on the analysis of the determining factors of economic growth Based on the analysis above the new theory has been tested and the countermeasures and suggestions involving China's innovation driven economy have been proposed **The Golden Age Illusion** Michael John Webber, 1996-09-20 What happened to the so called golden age of the postwar boom Unprecedented rates of economic growth profitability and wage increases during the 1950s and 60s have given way to a global capitalist economy in disarray Reassessing common interpretations of postwar economic history and geography this book focuses on the evolution of the global economy from the 1950s to the present Based on extensive research the book assesses histories of growth profitability and technological change in core industrial economies Japan and the USA raw material dependent economies Australia and Canada and several newly industrializing countries Brazil South Korea and Taiwan The authors build on standard models of economic change to incorporate new developments in regional dynamics they use nonlinear nonequilibrium and evolutionary arguments to frame discussions of profit rates technological change and interregional capital flows **The China Circle** Barry Naughton, 2012-01-01 As the British relinquish control of Hong Kong the economic relationship among the People's Republic of China PRC Taiwan and Hong Kong becomes especially significant Despite political and diplomatic tensions this relationship has grown phenomenally in recent years and continues to prosper Known as the China Circle it is an important

emerging economic region that cuts across political boundaries This book is the first comprehensive study of the underlying economic dynamics that make the China Circle not only possible but hugely successful Yun wing Sung Barry Naughton and Kong Yam Tan analyze the macroeconomic issues in each of the political entities that make up the China Circle Michael Borrus Chin Chung Jean Francois Huchet and Dieter Ernst focus on one of the region's leading industries electronics With rapid changes in technology firm strategy and global markets driving its continuous restructuring the electronics industry offers a detailed view of the factors that are shaping the region as a whole To provide a complete economic picture of the China Circle today and possible future developments the contributors explore key issues including emerging divisions of labor developing trade and investment patterns and the effect of Hong Kong's return to China in July 1997 Written in an open and accessible style the book is especially timely and more in depth than anything currently available

Regional Change in Industrializing Asia Leo van Grunsven, 2019-01-04 First published in 1998 this book responds to the dynamics of Industrializing Asia and the behavioural changes of actors which in response to changing internal and external forces have given rise to and are constantly giving rise to alterations in patterns of growth From a geographical perspective these are expressed in regional change understood as a reconstruction of spatial organization The imperatives of dynamic comparative advantage changing global or regional competitiveness and regional competition faced by different actors entities or territorial units can be identified as important forces underlying and shaping regional change This volume provides further illumination contextualization and interpretation of the spatiality of the economic reality in Industrializing Asia as well as the role played by and the implications for different actors The objectives of this book are 1 to outline the processes of regional change linked to responses in the form of restructuring and integrative and regionalization tendencies as well as the realignment of the global regional local divide in production systems complexes and the operation of firms associated with reorganization of production in the process of maintaining and reconfiguring comparative advantage 2 to highlight the wide scope of the process by considering differential units of analysis linked to the agents and manifestations of regional change and the role of scale in terms of the spatial units involved 3 to highlight the implications as to the current and future position or role of differential actors agents particularly nation state in shaping the new economic reality in the region and as a corollary its positioning in the global economic order

Money, Trade, and Competition Herbert Giersch, 2012-12-06 On June 1 1990 Egon Sohmen would have reached the age of 60 had he not suffered from a fatal illness It demanded his death at the early age of 46 If he were still with us he would play a prominent role in the current debate on monetary arrangements and on allocation theory perhaps including environmental issues and urban economics His contributions are well remembered by his colleagues and friends by his former students and by many in the economics profession on both sides of the Atlantic In extrapolating his great achievements as a scholar and teacher beyond the time of his death one is inclined to suppose that Egon Sohmen's name would figure high on many a list of candidates for honors and awards in the field of

international economics For the reconstruction of economics in the German language area Egon Sohmen was invaluable Born in Linz Austria he studied in Vienna at the Business School Hochschule für Welthandel now Wirtschaftsuniversität then went to the US as a Fulbright scholar 1953 returned to Europe to take his doctorate in Tübingen Germany 1954 and crossed the Atlantic again to teach at MIT 1955-58 where he obtained a Ph.D. 1958 under Charlie Kindleberger He might have stayed permanently in the US continuing a career that he started as Assistant Professor at Yale University 1958-61 if the US visa provisions had been applied in a more liberal fashion **China Review 1997** Maurice Brosseau, Hsin-chi Kuan, Y. Y. Kueh, 1997

China Review has been chosen by the American Public Libraries Association for inclusion in the list of books recommended to its members for acquisition *China Review 1997* the seventh volume of the series is an expert survey of China's major sectors of interest and critically summarizes the development of the previous year in core chapters covering politics the economy and social change The volume contains in depth studies of political social and economic issues such as the death of leader Deng Xiaoping the anticipated fifteenth Party Congress cross straits relations the problem of state owned enterprises and foreign economic relations all of which are of major concern to those who are interested in the development of the People's Republic Additional studies describe seldom discussed aspects of Chinese society such as cultural changes and legal disputes **Governing the Market** Robert Wade, 2018-06-05 Published originally in 1990 to critical acclaim

Robert Wade's *Governing the Market* quickly established itself as a standard in contemporary political economy In it Wade challenged claims both of those who saw the East Asian story as a vindication of free market principles and of those who attributed the success of Taiwan and other countries to government intervention Instead Wade turned attention to the way allocation decisions were divided between markets and public administration and the synergy between them Now in a new introduction to this paperback edition Wade reviews the debate about industrial policy in East and Southeast Asia and chronicles the changing fortunes of these economies over the 1990s He extends the original argument to explain the boom of the first half of the decade and the crash of the second stressing the links between corporations banks governments international capital markets and the International Monetary Fund From this Wade goes on to outline a new agenda for national and international development policy *Market Cultures* Robert W. Hefner, 2018-10-08 *Market Cultures* examines

the spectacular growth of capitalist enterprise among overseas Chinese and Southeast Asians It does so not through formal models but by way of the varied cultures and organizations in which Asian capitalism is embedded Eschewing talk of a uniform Asian miracle the book shows that there existed complex precedents for *How Asia Works* Joe Studwell, 2013-07-02 A good read for anyone who wants to understand what actually determines whether a developing economy will succeed Bill Gates Top 5 Books of the Year An Economist Best Book of the Year from a reporter who has spent two decades in the region and who the Financial Times said should be named chief myth buster for Asian business In *How Asia Works* Joe Studwell distills his extensive research into the economies of nine countries Japan South Korea Taiwan

Indonesia Malaysia Thailand the Philippines Vietnam and China into an accessible readable narrative that debunks Western misconceptions shows what really happened in Asia and why and for once makes clear why some countries have boomed while others have languished Studwell's in depth analysis focuses on three main areas land policy manufacturing and finance Land reform has been essential to the success of Asian economies giving a kick start to development by utilizing a large workforce and providing capital for growth With manufacturing industrial development alone is not sufficient Studwell argues Instead countries need export discipline a government that forces companies to compete on the global scale And in finance effective regulation is essential for fostering and sustaining growth To explore all of these subjects Studwell journeys far and wide drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill Provocative How Asia Works is a striking and enlightening book A lively mix of scholarship reporting and polemic The Economist *The Competitive Advantages of Far Eastern Business* Robert Fitzgerald, 2020-04-23 This volume discusses the causes of economic achievement in the leading East Asian countries in relation to the Porter thesis which links economic success with the capabilities of indigenous industrial clusters East Asian Welfare Regimes in Transition Alan Walker, Chack-kie Wong, 2005-03-30 This text puts the spotlight on the Chinese and South East Asian welfare systems providing an up to date assessment of their character and development In particular it examines the underlying assumptions of these systems and how the processes of globalisation are impacting on them
