Doing Research that is Useful for Theory and Practice Edward E. Lawler,1999-01-01 In this enduring classic prominent authorities on organizational research describe how they have tried to make their own research approaches useful for theory and practice Other experts interpret and comment on these contributions and in the ensuing discussions and debates the participants provide valuable insights into how these researchers think about their work how they formulate problems and research strategies and the reasons they use particular methods *Conducting Institutional Research in Non-Campus-Based Settings* Robert K. Hewitt, Ruth Vater, 2017-07-25 The focus of this volume is on the work of Institutional Researchers in a small college or university SCUs setting At an SCU the goal of the IR office is to balance the bureaucratic tendencies of data driven decision making with the need for collegiality and collaboration Drawing on numerous examples it illustrates how IR professionals can leverage their positionality within the institution to design data flows to answer questions by serving as convergent thinkers connecting disjointed systems and requests This volume identifies the challenges that small IR offices face reinforces the idea of collegiality as a defining feature of small IR offices discusses several principles for using data about teaching and learning explores the effects of low response rates in survey data and the effects of nonresponse bias demonstrates the importance of collaborative efforts in enacting change proposes a model of policy development focused on student success presents an effective model of SCU IR office development This is the 173rd volume of this Jossey Bass quarterly report series Timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

Positioning Higher Education Institutions Rosalind M. O. Pritchard, Attila Pausits, James Williams, 2016-09-26 Higher education is of growing public and political importance for society and the economy Globalisation is transforming it from a local and national concern into one of international significance In order to fulfil societal governmental and business sector needs many universities are aiming to re position themselves The book initially considers their compass They aspire to transformational planning mission and strategy in which social justice is important people are not treated as mere means to an end and traditional moral positions are respected This transformational urge is sometimes vitiated by blunt demands of new public management that overlook universities potential for serving the public good The volume then addresses universities success in meeting their targets Often the challenge in evaluation is the need to reconcile tensions for example between structure and pastoral care of students institutional competition and collaboration roles of academics and administrators performance based funding versus increased differentiation Measurement is supposed to provide discipline align institutional and state policy and provide a vital impetus for change Yet many of these measurement instruments are not fully fit for purpose They do not take sufficient account of institutional missions either of old or of specialist universities and sophisticated measurement of the student experience requires massive resources Change and positioning have become increasingly key elements of a complex but heterogeneous sector requiring new services and upgraded instruments
