**Advanced Models of Cognition for Medical Training and Practice** David A. Evans,Vimla L. Patel,2013-06-29 Cognitive science is a multidisciplinary science concerned with understanding and utilizing models of cognition It has spawned a great deal of research on applications such as expert systems and intelligent tutoring systems and has interacted closely with psychological research However it is generally accepted that it is difficult to apply cognitive scientific models to medical training and practice This book is based on a NATO Advanced Research Workshop held in Italy in 1991 the purpose of which was to examine the impact of models of cognition on medical training and practice and to outline future research programmes relating cognition and education and in particular to consider the potential impact of cognitive science on medical training and practice A major discovery presented in the book is that the research areas related to artificial intelligence cognitive psychology and medical decision making are considerably closer both conceptually and theoretically than many of the workshop participants originally thought
