Modern Architecture and Other Essays Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations *Transformations in Modern Architecture* Arthur Drexler, 1979 **The Meaning of Modern Architecture** Hans Rudolf Morgenthau, 2016-03-09 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings This method was first developed as scholars realized that the new abstract art appearing needed to be analysed differently than the previous figurative works Since architecture experienced a similar development in the 1920s and 30s this book argues that the empathetic method can also be used in architectural interpretation While most existing scholarship tends to focus on formal and functional analysis this book proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho physiological perceptive abilities sensual and intuitive understandings of composition form and space are emphasized These aspects are especially significant because Modern Architecture lacks the traditional stylistic signs Including building analyses it shows how by visually reducing cubical forms and spaces to linear configurations the exteriors and interiors of Modern buildings can be interpreted via human perceptive abilities as dynamic movement systems commensurate with the new industrial transportation age This reveals an inner necessity these buildings express about themselves and their culture rather than just an explanation of how they are assembled and how they should be used The case studies highlight the contrasts between buildings designed by different architects rather than concentrating on the few features that relate them to the zeitgeist It analyses the buildings directly as the objects of study not indirectly as designs filtered through a philosophical or theoretical discourse The book demonstrates that with technology and science affecting culture Modern Architecture Vincent Scully (Jr.), 1974 Traces the origin and development of modern architecture and evaluates its meaning in modern life **Modern Architecture** Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition Modern Architecture Otto Wagner, 1988 In 1896 Otto Wagner's Modern Architecture shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary

needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner s historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner s tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner s revolutionary lan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity Modern Architecture is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century

The Language of Post-modern Architecture Charles Jencks,1977 A classic account which when written in 1977 was the first to define post modernism in architecture an event which led to subsequent adoption of the term in many other fields It is the story of the failure of modern architecture to communicate with its users and the attempt of post modernists to overcome this failure with a richer more widely shared language post modern classicism Google Books

William B. Wiener Karen Kingsley,Guy W. Carwile,2016-03-09 In 1933 architect William B Wiener collaborated with his half brother Samuel G Wiener to design a weekend home for his family on the shore of Cross Lake just outside Shreveport Louisiana A year later the house appeared in the pages of Architectural Forum the leading architectural journal of its day as a foremost example of the new modernist style yet to take hold in the United States The featured home would mark the first in a series of buildings residential commercial and institutional designed by Samuel 1896 1977 and William 1907 1981 that incorporated the forms and materials found in the new architecture of Europe later known as the International Style These buildings located in Shreveport and its vicinity composed one of the largest and earliest clusters of modernist buildings by American born architects and placed the unexpected area of northern Louisiana in the forefront of architectural innovation in the mid twentieth century Authors Karen Kingsley and Guy W Carwile examine the work of the Wiener brothers from the 1920s through the 1960s detailing the evolutionary process of their designs and exploring why modern architecture

appeared so early in this southern city Throughout architectural descriptions of the buildings archival images recent photographs and discussion of the surrounding social and economic culture of northern Louisiana inform a deeper appreciation for the Wieners role in establishing modernism in the United States Drawing on extensive research Kingsley and Carwile assess the influence of the Wieners travel in Europe particularly their visit to the Bauhaus and the ways in which the brothers adapted European modernism to fit the cultural and physical demands of construction in Louisiana Their personal involvement in the local Jewish community the authors show also proved to be a critical factor in their success Kingsley and Carwile braid a broader history of modern architecture together with details about the Wieners commissions and cultural milieu allowing readers to consider the brothers remarkable careers in the context of their contemporaries and modernist architectural trends in the nation as a whole As a result *The Modernist Architecture of Samuel G and William B Wiener* illuminates this internationally significant yet little known legacy of Louisiana

Modern Architecture and the Critical Present Kenneth Frampton, 1982 *Modern Architecture* Vincent Joseph Scully, 1956 *Makers of Modern Architecture, Volume II* Martin Filler, 2013-08-20 In the first volume of *Makers of Modern Architecture* 2007 Martin Filler examined the emergence of that revolutionary new form of building and explored its aesthetic social and spiritual aspirations through illuminating studies of some of its most important practitioners from Louis Sullivan and Frank Lloyd Wright to in our own time Renzo Piano and Santiago Calatrava Now in *Makers of Modern Architecture Volume II* Filler continues his investigations into the building art beginning with the historical eclecticism of McKim Mead and White best remembered today for New York City s demolished Pennsylvania Station He surveys the seemingly inexhaustible flow of new books about Wright and Le Corbusier and continues his commentaries on Piano s museum buildings with an essay focused on the new Broad Contemporary Art Museum in Los Angeles There are less well known subjects here too from the Frankfurt urban planner Ernst May to Buckminster Fuller inventor of the geodesic dome Filler judges Edward Durell Stone the architect of the U S embassy in New Delhi the Huntington Hartford Museum in New York City and the Kennedy Center in Washington to have been a middling product of his times however personally interesting he may have been And he looks back at James Stirling who in the 1970s and 1980s was a veritable rock star of the profession responsible for what Filler considers some of the very few worthwhile postmodernist buildings The essays collected here are not entirely historical however Filler also focuses on some of the most recent projects to have attracted critical and popular attention both in the United States and abroad including Rem Koolhaas s CCTV building in Beijing and Bernard Tschumi s Acropolis Museum in Athens He argues that Kazuyo Sejima and Ryue Nishizawa s New Museum in New York City is one of those rare clarifying works of architecture that makes most recent buildings of the same sort look suddenly ridiculous He calls Tod Williams and Billie Tsien s brilliant reimagining of the Barnes Collection in Philadelphia a latter day miracle a virtually unimprovable setting for its art He finds Michael Arad s September 11 Memorial at Ground Zero a sobering disturbing heartbreaking and overwhelming masterpiece

And he argues that Diller Scofidio Renfro's Institute of Contemporary Art in Boston and their work revitalizing the High Line and Lincoln Center in New York make them today's shrewdest yet most sympathetic enhancers of the American metropolis. Filler remains in these nineteen essays a shrewd observer of the pressures on architects and their projects: money, politics, social expectations, even the weight of their own reputations. But his focus is always on the buildings themselves, on their sincerity and directness, on their form and their function, on their capacity to bring delight to the human landscape.

Modern Architecture Since 1900 William J.R. Curtis, 1996-06-27 A penetrating analysis of the modern architectural tradition and its origins, *Modernity and the Architecture of Mexico* Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism. This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s. Nine essays by noted architects and architectural historians cover a range of topics from broad-based critical commentaries to discussions of individual architects and buildings. Among the latter are the architects Enrique del Moral, Juan O'Gorman, Carlos Obregón Santacilia, Juan Segura, Mario Pani, and the campus and stadium of the Ciudad Universitaria in Mexico City. Relatively little has been published in English regarding this era in Mexican architecture. Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions, ideological and political constructs, and specific architects' agendas known to a wide audience in the humanities. Likewise, it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement.

Changing Ideals in Modern Architecture, 1750-1950 Peter Collins, 1998-07-14 Collins explains what Revivalism, Rationalism, Eclecticism, and Functionalism meant to those who practised them, examining the impact that social forces and the other arts and sciences had on architectural styles while recognizing the tectonic continuities that underlie the seeming ruptures between pre-modern, modern, and post-modern approaches to design. His work is infused with a deep sympathy for the classical spirit of the eighteenth century, and he argued rigorously and passionately that Enlightenment ideas could be of real value to the architects of his generation, particularly since technology had made it possible to use them effectively. Collins's plea for sensitivity to tradition and the urban fabric while encouraging technological innovation and unprecedented programs makes his thought just as vital today as it was ahead of its time when first published. Collins had long wished to see an affordable, fully illustrated edition of his book, and McGill-Queen's University Press and the McGill School of Architecture are proud to at long last fulfil this wish. The new edition includes a biographical sketch of Collins, a brief publication history of the work, and an introductory essay by Kenneth Frampton that discusses the importance of the work at the time it was first published and highlights its relevance for the architectural problems of today. Like the classic works of Hitchcock, Giedion, Pevsner, and Benevolo, *Changing Ideals in Modern Architecture* is essential reading and

forms a striking contrast with other works on modernism such as Reyner Banham's *It will be pertinent to all those interested in architectural history and theory modern history history of ideas and aesthetics* Modern Architecture Vincent Scully, 1965
