Modern Color/Modern Architecture William W. Braham, 2019-05-29 This title was first published in 2002 This really is a text that will fill a long felt want A key figure in that history is Am d e Ozenfant painter critic and friend of Le Corbusier who in the first half of this century founded a school in London where he conducted experiments and wrote about color in architecture Those experiments have been reconstructed for the book which also includes reprints of his most important articles on the subject This book provides a fascinating survey of this most contemporary topic that will inspire and inform designers and architects Color has often been regarded as the final dressing of a building subject to the vagaries of fashion and left to the client to select There have been a number of studies of polychromy in the architecture of the more distant past particularly in relation to modern conservation practices but there is little or nothing on the architectural color of recent times and especially within Modernism

Kane,2023-08-01 Bridging histories of technology media studies and aesthetics *Electrographic Architecture* forges a critical narrative of the ways in which illuminated light and color have played key roles in the formation of America's white imaginary Carolyn L Kane charts the rise of the country's urban advertisements light empires and neoclassical buildings in the early twentieth century the midcentury construction of polychromatic electrographic spectacles and their eclipse by informatically intense invisible algorithms at the dawn of the new millennium Drawing on archival research interviews and visual analysis *Electrographic Architecture* shows how the development of America's electrographic surround runs parallel to a new paradigm of power property and possession The Emergence of the Interior Charles Rice,2006-11-22 Taking a radical position counter to many previous histories and theories of the interior domesticity and the home *The Emergence of the Interior* considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image based condition Incorporating perspectives from architecture critical history and theory and psychoanalysis *The Emergence of the Interior* will be of interest to academics and students of the history and theory of architecture and design social history and cultural studies Peformative Architecture Branko Kolarevic,Ali Malkawi,2005-07-08 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **Urbanisms of Color** Gareth Doherty,2010 Color is a ubiquitous yet essential part of the city creating and shaping urban form Volume 3 of *New Geographies* brings together artists and designers anthropologists geographers historians and philosophers with the aim of exploring the potency the interaction and the neglected design possibilities of color at the scale of the city *Inessential Colors* Basile Baudez,2021-12-21 Today architectural plans and drawings are always signposted with colors pink for porch or exterior walls yellow for certain interior elements and blue for details and ornament How and why did this practice begin The craft of architectural drawing plans sections and details was originally developed during the Italian Renaissance under the influence of engravers The results were correspondingly

monochromatic relying on representation through line and perspective But in the 1800s an influx of painters turned architects in Holland and Germany brought color into their designs This innovation eventually spread throughout Europe inspiring French architectural engineers to adopt a common color system in order to more clearly communicate their designs across the kingdom and giving architects another tool with which to impress academic juries and the public In this book author Basile Baudez argues that color was not an essential feature of architectural drawing until European architects adopted a precise system of representation in response to political and artistic rivalry between countries as well as the needs of public exhibitions He shows that French engineers learned to use color from the Dutch colleagues they worked with and then fought against during the Dutch War 1672-78 demonstrating that a color based system was published in French manuals for military engineers and used by royal architects and that architects who wanted to compete with paintings for the public's attention needed to use the familiar language of color This history reveals that color came to have three functions to imitate architectural materials to establish concise representational conventions that could span large geographic distances and to seduce the public including tourists The book will feature a large number of fascinating previously unpublished archival drawings and will contribute to growing interest in the origins and professionalization of architecture as well as the history of drawing as a medium

existieren nicht erst seit den 1920er Jahren man kannte bis zu Leonardo da Vincis Traktaten zur Farbtheorie. Aber anders als in der Renaissance entwickelte sich der Purismus von Amadeo Ozenfant 1886-1966 und Charles Edouard Jeanneret 1867-1965 bekannt unter dem Pseudonym Le Corbusier in einer Zeit der zerstörten Konventionen und der Auflösung aller objektiven Verbindlichkeiten. In den Jahren zwischen 1918 und 1925 entstanden die wichtigsten gemeinsam verfassten Manifeste und in dieser Zeit entstanden die weitgehend homogen wirkenden puristischen Stilleben. Der für den Purismus maßgebliche Impuls ging vom Kubismus aus gegen den dieser anfangs zwar aufbegehrte, aber den er sich aber definierte und von dem er sich mit dem Manifest *Le Purisme* 1921 schliesslich emanzipieren sollte. Zu diesem Zeitpunkt waren Theorie und Praxis an einem Punkt angekommen, der von den Autoren selbst als Analogie zum Verhältnis zwischen einer Grammatik und der sprachlichen Äusserung beschrieben wurde. Die puristische Theorie liess sich somit vom puristischen Stilleben nicht mehr trennen. Das Bild nahm seinen Ausgang von den dargestellten Objekten, wesentlich schien es jedoch die als Grammatik auftretende Theorie zu repräsentieren. Allerdings will das Bild nicht als Illustration der Theorie gelesen werden. Beide Medien bedingen einander und treten in ein dialogisches Verhältnis, in dem das Manifest die unsere Ordnung des künstlerischen Schaffens gewährleistet. Die Malerei vollführt wohl einen eigenständigen künstlerischen Diskurs, doch besitzt sie in diesem Komplex auch die Aufgabe, auf theoretische Problemstellungen zu antworten und zugleich neue Problemfelder aufzuspüren. In welchem Verhältnis Theorie und Praxis zueinander stehen können lässt sich am Purismus exemplarisch zeigen. Dass die Manifeste hier eine neben dem Kunstwerk gleichberechtigte Grösse bilden lässt sie zu einer notwendigen Voraussetzung für die Interpretation werden.

Цветовое поле города в истории европейской культуры Юлия Грибер, 2015-05-06 **Dictionnaire des peintres et sculpteurs de Provence, Alpes, Côte d'Azur** André Alauzen Di Genova, 2006 *Domus*, 2003 **The Color of Modernism** Deborah Ascher Barnstone, 2021-12-30. One of the most enduring and pervasive myths about modernist architecture is that it was white: pure white walls both inside and out. Yet nothing could be further from the truth. The Color of Modernism explodes this myth of whiteness by offering a riot of color in modern architectural treatises, polemics, and buildings. Focusing on Germany in the early 20th century, one of modernism's most foundational and influential periods, it examines the different scientific and artistic color theories which were advanced by members of the German avant-garde, from Bruno Taut to Walter Gropius to Hans Scharoun. German color theory went on to have a profound influence on the modern movement, and Germany serves as the key case study for an international phenomenon which encompassed modern architects worldwide, from Le Corbusier and Alvar Aalto to Berthold Lubetkin and Lina Bo Bardi. Supported by accessible introductions to the development of color theory in philosophy, science, and the arts, the book uses the German case to explore the new ways in which color was used in architecture and urban design, turning attention to an important yet overlooked aspect of the period. Much more than a mere correction to the historical record, the book leads the reader on an adventure into the color-filled worlds of psychology, the paranormal theories of sensory perception, and pleasure, showing how each in
