placed on them by the Naval Staff or their potential technological impact on carrier design and operations can be explained. Every type even unsuccessful single prototypes is described the majority are illustrated by photographs many of which come from the author's own collection and the fifty most significant aircraft have detailed drawings. The Australian and Canadian Fleet Air Arms operated RN aircraft types for many years after their formation and these are included together with other types they have operated subsequently to give a more complete overview. The book describes over 400 different types of aircraft built by over 100 different manufacturers to offer the most detailed coverage of RN aircraft ever produced. Research for the book took over forty years and reference material included Admiralty Archives and an array of material in the public domain including manufacturers data individual aircraft pilot's notes and a wealth of published sources. David Hobbs is uniquely well placed to write this book having served in the RN for thirty three years and retired with the rank of Commander. He flew both fixed and rotary wing aircraft and his log book contains 2300 flying hours with 807 day and night deck landings. He served in seven British aircraft carriers and spent four years within RN Director General Aircraft Department where he was closely involved with Sea Harrier carrier trials and introduced new visual landing aids for night recoveries and liaised with the USN on carrier operating techniques. This is his eleventh book for Seaforth Publishing.

Lockheed Blackbirds Anthony M. Thornborough, Peter E. Davies, 1988 **Britain's Cold War Fighters** Tim McLelland, 2017-05-17. Britain's Cold War Fighters explores the creation and development of the jet fighter tracing the emergence of the first jet designs the Meteor and Vampire through to the first generation jets which entered service with the RAF and Fleet Air Arm. Each aircraft type will be examined looking at how the design was created and how this translated into an operational aircraft. The basic development and service history of each type will be examined with a narrative that links the linear appearance of each new design leading to the present day and the latest generation of Typhoon aircraft. Other aircraft types explored will include Hunter Lightning Phantom Javelin and Tornado F2. A beautiful and comprehensive study of the UK's design and manufacture of its fighter programme from the end of the Second World War to present. Britain's Cold War Fighters is of much importance to aviation and military historians modellers as well as those interested in the growing popularity of the Cold War. Highly illustrated with many unpublished photos interviews and eyewitness accounts this an ideal companion piece to Fonthill Media's Britain's Cold War Bombers and is the subject of a BBC documentary currently in commission.
