Modern Garden Design Innovation Since 19:

The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
