Modern Juvenile Justice:

American Juvenile Justice Franklin E. Zimring, 2018-12-21 American Juvenile Justice is a definitive volume for courses on the criminology and policy analysis of adolescence. The focus is on the principles and policy of a separate and distinct system of juvenile justice. The book opens with an introduction of the creation of adolescence presenting a justification for the category of the juvenile or a period of partial responsibility before full adulthood. Subsequent sections include empirical investigations of the nature of youth criminality and legal policy toward youth crime. At the heart of the book is an argument for a penal policy that recognizes diminished responsibility and a youth policy that emphasizes the benefits of letting the maturing process continue with minimal interruption. In this updated and expanded second edition, Zimring has included four new chapters with examinations on important topics including US Supreme Court decisions of life sentences for minors, the elected use of juvenile courts over criminal court, punitive sex offender registration for juveniles, and appropriate tactics for juvenile justice reform.

The Juvenile Justice Century John C. Watkins, 1998 This book describes the historical roots of American juvenile courts and the development of court philosophy and appellate case law over the past century, tracing developments in the courts, legislatures, and juvenile institutions. After discussing events surrounding the court's formation, Watkins details specific court operations through case decisions and statutory enactments, as well as academic and social commentary regarding the court throughout the twentieth century. Special attention is given to the 1960s era and the US Supreme Court decisions of that decade that have shaped the contemporary juvenile justice system. The recriminalization of the juvenile court from the mid 1970s is reviewed along with socio-cultural factors that have spurred such a change in court philosophy. The book also discusses the issue of capital punishment for juveniles and the pro and con arguments for death eligibility for minors under age eighteen. The concluding chapter discusses the future of the so-called post-modern juvenile court and suggests ways in which the institution may be saved from itself. Beginning with a thorough discussion of sociolegal foundations of the juvenile court system, Watkins examines key issues and develops a comprehensive understanding of *parens patriae* and treatment orientation. An important book with an excellent bibliography.

Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing Juvenile Justice Reform, 2013-05-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention OJJDP asked the National Research Council to convene a committee to conduct a study of juvenile justice reform The goal of *Reforming Juvenile Justice A Developmental Approach* was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts

Boys among Men David L. Myers, 2005-06-30 Images of youngsters in handcuffs and prison uniforms have become common on the nightly news in the United States As America's fascination with crime and justice has grown so has attention to the ways in which youthful offenders are charged tried and sentenced While they may once have been viewed as misguided youth more and more juveniles are being charged as adults and sentenced to adult prisons Myers questions whether doing so is an effective deterrent for young offenders if rehabilitation is out of the question and if youth and society are better served by sending children away to adult prisons rather than juvenile detention facilities These questions and others are addressed in this careful analysis of the history and evolution of transfer laws that are increasingly prevalent throughout the United States The move toward charging juvenile delinquents as adult criminals initially coincided with an increase in violent crimes committed by youthful offenders However as such policies have grown and expanded the methods by which youth are formally treated as adults in the criminal justice system have changed Here Myers examines the demographic legal criminal and social characteristics of those youth who are waived to adult courts assessing the nature use and effectiveness of punishment and rehabilitation efforts in modern juvenile and criminal justice systems He concludes that as long as separate juvenile and adult justice systems are maintained there will be a desire and perceived need for transferring some youth to adult court However he suggests that such transfers should be facilitated on a much more limited basis while greater resources and funding for prevention and early intervention should be implemented to prevent youth from offending in the first place This controversial topic receives a thorough accounting in this volume which will open readers eyes to the realities of juvenile delinquency and its treatment by the criminal justice system
