Modern Movements in Architecture Charles Jencks, 1985 See Camp and Johnson Philip in index **Modern Movements in Architecture**, 1985 *History of Modern Architecture* Leonardo Benevolo, 1977 Modern Architecture Frank Lloyd Wright, 2021-07-13 Frank Lloyd Wright's classic account of his vision for an organic architecture in a beautifully designed new edition *Modern Architecture* is a landmark text the first book in which America's greatest architect put forth the principles of a fundamentally new organic architecture that would reject the trappings of historical styles while avoiding the geometric abstraction of the machine aesthetic advocated by contemporary European modernists One of the most important documents in the development of modern architecture and the career of Frank Lloyd Wright *Modern Architecture* is a provocative and profound polemic against America's architectural eclecticism commercial skyscrapers and misguided urban planning The book is also a work of savvy self promotion in which Wright not only advanced his own concept of an organic architecture but also framed it as having anticipated by decades and bettered what he saw as the reductive modernism of his European counterparts Based on the 1931 original for which Wright supplied the cover illustration this beautiful edition includes a new introduction that puts *Modern Architecture* in its broader architectural historical and intellectual context for the first time The subjects of these lively lectures from *Machinery Materials and Men* to *The Tyranny of the Skyscraper* and *The City* move from a general statement of the conditions of modern culture to particular applications in the fields of architecture and urbanism at ever broadening scales Wright's vision in *Modern Architecture* is ultimately to equate the truly modern with romanticism imagination beauty and nature all of which he connects with an underlying sense of American democratic freedom and individualism **The New Eco-Architecture: Alternatives from the Modern Movement** Colin Porteous, 2013-10-11 *The New Eco Architecture* builds a historical bridge between architectural science and design It seeks to address neglected aspects of the Modern Movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities The attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability By setting today's green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners However it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment Modern Architecture Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of

form function social engagement modernity and tradition **The Details of Modern Architecture** Edward R. Ford,1990
 Covering the period 1890 1932 this book focuses on various recognised masters explaining the detailing and construction techniques used in their buildings *Modern movements in architecture* C. Jencks, **Architecture** Martin van der Linden,2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic Modern Architecture Alan Colquhoun,2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition **Journal of Contemporary Urban Affairs.
