## **Modern Architect:**

*Making it Modern* Aaron Betsky, 2016-12-15 At its root modernism is that fundamental It is a question of having something to represent that is of the moment In the most radical interpretation modernism always comes too late The modern is that which is always new which is to say always changing and already old by the time it has appeared Modernism is always a retrospective act one of documenting or trying to catch what has already appeared an attempt to fix life as it is being lived Modernity is just the very fact that we as human beings are continually remaking the world around us through our actions and are doing so consciously Modernism is a monument to or memory of that act which in its own making tries to remake the world it is pretending to represent Modern Architectural Theory Harry Francis Mallgrave, 2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism Transformations in Modern Architecture Arthur Drexler, 1979 **Contemporary Architects** Muriel Emanuel, 2016-01-23 **Modern Architecture Since 1900** William J. through easy to follow sketches drawings and succinct explanations Twenty five concepts each of which are key to architectural design thinking are accessibly explained by examining twenty five different masterworks of modern architecture For example the concept of movement in architectural design is explained through a close look at a Le Corbusier building transparency is examined in Philip Johnson s seminal Glass House asymmetry is understood through the work of Zaha Hadid and so on through twenty five core concepts and twenty five of the most significant buildings of the modern era Taking a highly visual approach this simple yet visually powerful guide is an essential companion in the design studio and to introductory courses in modern architecture interior architecture and interior design Understanding these concepts will provide a key to demystifying the greatest works in modern architectural history inspire new ways to think about new design projects and reveal how drawing and sketching are used as tools for the visual analysis of architecture *Craft Theory and Contemporary Architecture* Grant Alford,2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today s technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment Written for students and scholars this book challenges and extends the legacy of craft thinking in architecture Pietro Belluschi Meredith L. Clausen,1994 Meredith Clausen reveals the enormous power that Belluschi wielded as an arbiter of taste and decision maker in the 1950s and 1960s his role in shaping the policy of the State Department in its overseas building program and his role in securing major commissions for favored architects such as I M Pei Equally important is Clausen s discussion of Belluschi s role in the development of regionalism in the Pacific Northwest and its impact on the definition of modernism as it was emerging in the United States *Mysticism and Architecture* Roger Paden,2007-01-11 *Mysticism and Architecture* Wittgenstein and the Palais Stonborough is a multi disciplinary study of the Viennese palais that the philosopher Ludwig Wittgenstein helped design and build for his sister shortly after he abandoned philosophy for more practical activities and during the period that supposedly separates his early from his late philosophy Weaving together discussions of a number of social political and

cultural developments that helped to give fin de siècle Vienna its character including the late modernization of Austrian society industry and economy the construction of Vienna's Ringstrasse the slow decay of the Hapsburg monarchy and the failure of Austrian liberalism as well as Tolstoy's religiously based ethical views Adolf Loos's critique of architectural ornament Karl Kraus's analysis of Vienna's decadence Kierkegaard's and Nietzsche's views on the importance of indirect communication Otto Weininger's theory of the nature and duty of genius Camillo Sitte and Otto Wagner's dispute over good urban form Schopenhauer's aesthetic theories and his Eastern philosophy of life and Russell and Frege's philosophical and logical theories the book presents a philosophical biography of Wittgenstein reminiscent of but substantially different from Janik and Toulmin's Wittgenstein's Vienna This philosophical biography underpins a new interpretation of the house which argues that the house belongs to neither architectural Modernism nor Postmodernism but is instead caught between those two movements This analysis of the house in turn grounds a new interpretation of Wittgenstein's philosophical works that emphasizes their mystical nature and practical purpose Finally this interpretation shows the unity of these works while simultaneously suggesting an underlying flaw namely that they arise from two fundamentally opposed worldviews present in Vienna during Wittgenstein's youth aesthetic modernism and critical modernism
