The U.S. Combat Aircraft Industry, 1909-2000 Mark A. Lorell, 2003-10-29 Drawing on primary and secondary sources on the aircraft industry this report provides a brief survey of industry structure innovation and competition in the U S fixed wing combat aircraft industry from its earliest days to the present It supports a much larger research effort examining the future of the structure innovation and competition of the U S military aircraft industrial base that responds to congressional concerns about that future

Modern Fighter Aircraft Anthony M. Thornborough, 1995 MOD FTR A C TECH TACTTHORNBOROUGH A

Fighter Aircraft Since, 1945 Frank Schwede, 2017-11-30 The world s first jet engines were already available shortly before the end of the Second World War but they had not been developed to a high enough standard to take part This changed after 1945 when on both sides of the Iron Curtain one technological development surpassed the others and records tumbled almost every week The era of the piston engine was finally over and jet fighters now dominated the skies By the mid 1950s their speed had already reached double that of the speed of sound an achievement which a few years earlier would have sounded to many like science fiction

Insight Turkey 2020/03 - Transformation of Turkey's Defense Industry, 2020-10-01 Turkey s contemporary defense and military strategy can be best understood as a result of the historical process the country has experienced This historical process has significantly altered the security environment surrounding Turkey while transforming her alliance relations ultimately producing a new political vision for the country and a defense and military strategy that serves this vision Firstly although the end of the Cold War and the ensuing dissolution of the Soviet Union has ameliorated international security Turkey was faced with both conventional and asymmetric threats on multiple fronts This situation kept defense spending of the country at record levels despite military expenditures within NATO showing a rapid decline On the other hand the emerging political geography led to a series of new conflicts erupting in several hotspots from the Balkans through to the Caucasus and the Middle East Emerging conflicts were thought to require a common response which precipitated NATO s evolution from a collective defense organization to a collective security

organization Concurrently it meant that Turkey would actively join NATO's new missions ranging from the peaceful resolution of disputes to stability operations with expeditionary forces featured by mobility jointness and readiness Secondly the 9/11 terrorist attacks against the U.S. created profound ramifications for Turkey's regional security and her alliance relations In particular the American military occupation of Iraq jeopardized Turkey's national security by effectively removing the political authority of that country and dismantling the Iraqi army While the emerging political vacuum was filled by sectarian politics the scarcity of security was exploited by the PKK consolidating its presence in northern Iraqi territories Divided Iraq has also transformed into a breeding ground for international terrorism which resulted in the rise of various extremist armed organizations including ISIS Thirdly since the so-called Arab spring started in the early 2010s the political and security landscape of the Middle East and North Africa has undergone significant changes While the overthrow of dictators led to intra-state conflicts in several places it was particularly the civil war in Syria that alarmed Turkish decision makers due to its transformation into a safe haven for various terrorist groups operating at Turkey's southern frontiers Bereft of concrete ally support Turkey unilaterally launched military operations into northern Syria in order to eliminate ISIS elements as well as curbing the long-term territorial ambitions of the PKK The Arab spring has also aggravated previous tensions and engendered various factions that facilitated new alignments which is the case for today's Eastern Mediterranean and Arab-Israeli relations Against the backdrop of these considerations Turkey's contemporary defense and military strategy has been formed In general this strategy lays down the principles of using military force to support the political aims of the country It operates as a bridge between policy and operation in a classical sense And that strategy is now not just informed by protecting the territorial integrity of the nation but has wider objectives including enhancing the country's international standing as well as achieving strategic autonomy This in turn has necessitated new tools that extend beyond a sole deterrent force namely military activism and defense industry investments along with the contribution to international security and commitments to the NATO alliance The summer issue of Insight Turkey aims to explain the changing dynamics of Turkey's military and defense strategy by taking into consideration current foreign and security policy practices of Turkey in the Middle East and North Africa region More specifically this issue is an attempt to develop a new framework to understand Turkey's revolution in its military and defense strategies Hulusi Akar the Minister of National Defense of Turkey in his commentary sheds light on the global and regional developments that threaten Turkey's peace and stability and which contributed to shaping its defense strategy A strategy that targets finding common solutions to international problems in a collaborative way Akar gives special attention to the contribution of the distinguished deterrent efficient motivated well-trained and disciplined Armed Forces that are equipped with high-level weaponry produced domestically using national resources Within the context of the Turkish Defense Industry's strong historical background Smail Demir highlights the transformation and rationality of the Turkish Defense Industry He emphasizes the necessity of addressing the recent rise of

the Turkish Defense Industry in two different but interrelated periods The first provided the defense industry with strong support with an extremely decisive and long term projection The second represents the transformation of the expectations from the defense industry in coordination with the changing position and function of the defense industry in bureaucratic mechanisms Michael Tanchum's commentary is a coherent and rigorous analysis of the logical result of Turkey's post Cold War strategic reorientation presented in its new expeditionary capability of enhanced naval capacity and new forward bases Michael examines Ankara's challenge of calibrating the use of its hard power instruments to serve its post Lausanne strategic orientation toward establishing Turkey centered inter regional connectivity In the middle of the COVID 19 global pandemic Minister of Health of the Republic of Turkey Fahrettin Koca underscores the role of Turkey in the management of COVID 19 His commentary asserts that Turkey has successfully contained the COVID 19 pandemic and prevented devastating consequences due to its idiosyncratic approach to the crisis and the robustness of its healthcare system After 85 years as a museum Hagia Sophia welcomes Muslim worshippers a decision that has drawn intense criticism in Turkey and worldwide However Deputy Minister of Foreign Affairs of the Republic of Turkey Yavuz Selim Kuran argues that the functional change of Hagia Sophia will not affect Turkey's centuries old tradition of promoting tolerance harmony and diversity The final off topic commentary of this issue underlines the challenges to Pakistan's nuclear threshold Muhammad Haris Bilal Malik and Muhammad Abbas Hassan explain why Pakistan has been further threatened by India's aggressive policies and provocative military modernization The commentary concludes that Pakistan may be compelled to further revisit its nuclear threshold level to overcome India's aggression Besides the commentaries this issue comprises five articles that focus on the Turkish Defense Industry past present and future and underline the factors that led to its remarkable evolution The first article by Murat Yetiltepe presents a general framework of Turkey's Military and Defense Strategy By taking into account the main drivers primary objectives and essential pillars as well as its tangible repercussions on the military mindset the author explains how the change in Turkey's defense and military strategy stems both from Turkey's changing security landscape and its quest to be an assertive regional player Can Kasapoğlu's research article covers two interrelated strategic topics regarding Turkey's national military capacity in the 21st century its defense technological and industrial base and its military policy both currently characterized by a burgeoning assertiveness In light of the rapid advances in technology that are continually shaping developments in the aerospace and defense sector notably the evolution of airpower Arda Mevlitoğlu provides us with an understanding of the features of the next generation of air warfare while presenting the status of the Turkish Air Force and offering suggestions on several challenges and opportunities As a reply to the critics that Turkey is caught between a rock and a hard place due to the adamant opposition of its NATO allies Mustafa Kibaroglu tries to make sense of Turkey's S 400 choice by assessing the impact of the S 400 deal on Turkey's defense industries On one hand he presents his conception of the current international political non order as an underlying factor behind the deal On the other

he suggests that the deal must be approached from a wider perspective to grasp the extent of the service it has done in bolstering Turkey's military industrial complex. The last article related to the main theme of this issue focuses on Turkey's defense spending. Merve Seren attempts to show that prioritization of defense spending during the AK Party era is specifically the outcome of a political preference. In other words, the shift in the political landscape from idealism to realism associated with pragmatism. Our initial off-topic article highlights how Trump's peace plan optimistically called the Deal of the Century adopts the Zionist discourse regarding al Aqsa and its effects on undermining the Muslim sovereignty over the mosque, which will be a clear violation of international law and status quo. Khalid el Awaisi and Cuma Yavuz investigate the results of the implementation of Trump's plan, which they assert will lead to three main changes that would undo the centuries-old status quo of Masjid al Aqsa completely and give Israel full control over this important historic and religious site. Ahmad AlShawra and Ahmad Almuhtady's off-topic article completes the dossier of this issue. The authors examine the potential implications of Jordan's decision to import Mediterranean gas through Israel on Jordanian energy security, with special attention to how this decision will impact Jordanian foreign policy regarding the Palestinian cause. Through a wide range of articles and commentaries, this issue aims to bring to its readers a comprehensive framework on the transformation of Turkey's Defense Industry and changing patterns of its military strategy.
