Voice, Trust, and Memory Melissa S. Williams, 2021-05-11

Does fair political representation for historically disadvantaged groups require their presence in legislative bodies The intuition that women are best represented by women and African Americans by other African Americans has deep historical roots Yet the conception of fair representation that prevails in American political culture and jurisprudence what Melissa Williams calls liberal representation concludes that the social identity of legislative representatives does not bear on their quality as representatives Liberal representation's slogan one person one vote concludes that the outcome of the electoral and legislative process is fair whatever it happens to be so long as no voter is systematically excluded Challenging this notion Williams maintains that fair representation is powerfully affected by the identity of legislators and whether some of them are actually members of the historically marginalized groups that are most in need of protection in our society Williams argues first that the distinctive voice of these groups should be audible within the legislative process Second she holds that the self representation of these groups is necessary to sustain their trust in democratic institutions The memory of state sponsored discrimination against these groups together with ongoing patterns of inequality along group lines provides both a reason to recognize group claims and a way of distinguishing stronger from weaker claims The book closes by proposing institutions that can secure fair representation for marginalized groups without compromising principles of democratic freedom and equality

QUALITATIVE RESEARCH FOR SOCIAL SCIENCES Dr. A. A. Gadwal, 2022-03-01

The social sciences are the group of academic discipline that study the different aspects of human and his associates It is the study of behaviour of man social institutions social stratification and social process and is the discipline that focuses on the study of social behaviour Social sciences are clearly distinctive from the physical sciences i.e. the study of non living system Human beings are much

curious and inquisitive about themselves their nature their behaviour as individual and as group and their relationship to natural environment There is much fluidity over which area should be included and covered under social sciences

Anthropology Economic Political science History Psychology Sociology Social Work Law Communication and Education are included as the aspects and area of study The term Social Science first appeared in the Book An Inquiry Into The Principles Of The Distribution Of Wealth Most Conducive To Human Happiness by William Thomas in the year 1824 The term social science refers to all those disciplines which analyse society and culture from Anthropology to Media studies Informal Citizen Action and Crime Prevention at the Neighborhood Level Stephanie W. Greenberg,1985 **Public Rights, Public**

Rules Connie L. McNeely,2014-04-08 The dramatic changes that have occurred in modern nation states have engendered a renewed and increasing interest in issues of citizenship and rights The original essays in this collection describe the formation and transformation of citizenship and rights considering issues such as legal culture sovereignty jurisdiction diversity welfare and related state norms structures practices and resources Employing a variety of theoretical frameworks and sociological orientations the contributors explore the creation of public boundaries along with changes in the rules defining citizenship roles identities and rights In Search of the Real Max Weber Colin Campbell,2025-09-01 This book uses the contrast between the theoretical positions of the two Max Webers that is the Weber of the Protestant Ethic thesis and the Weber of the theory of action as the basis for developing a theory of agency and an associated dynamic interpretive approach to action The book critiques traditional theories of action for neglecting the physical dimension for conflating agency with action and contrasting the latter with behaviour It argues that action is not just cerebral or communicative but inherently tied to effort emotion and imagination with voluntarism understood in terms of attention instead of intention and the exercise of will rather than choice This is the basis of a dynamic interpretivist approach one that integrates behavioural insights with interpretive sociology highlighting how actors actively maintain their power of agency The concept of character is also introduced as a crucial link between individual agency ethical values and cultural systems This book will be of interest to researchers and students of sociology anthropology media studies and criminology as well as social theorists Social Problems in Africa Apollo Rwomire,2001-07-30 Despite the recent growth of research on social problems facing the people of sub Saharan Africa there remains a critical lack of conceptual epistemological and empirical research and documentation This sophisticated new book attempts to fill that gap by synthesizing interpreting and extending the existing literature on conditions that constitute serious impediments to socio economic development in Africa It provides an original and up to date survey of key problems ranging from poverty and inequality to violence and crime The contributors all of whom have lived or worked in Africa show how social problems emerge how they are defined and how various actors attempt to deal with them This timely book provides a much needed analysis of the major issues and debates regarding the dynamics of social problems in the African context Social Problems in Africa is broken into four parts The first introduces readers to the nature of social

problems in general and provides a framework for analyzing and understanding social problems in an African context Part II on culture human rights and democracy examines these crucial aspects of social problems in Africa as well as issues such as language and colonialism Part III focuses on poverty and inequality while conflict and violence is the focus of Part IV Together the chapters in this volume provide the most comprehensive and systematic approach to the issues available bringing much needed attention to the problems in Africa from the perspective of scholars who have lived and worked there

How to Find Out About the Social Sciences Gillian A. Burrington, 2014-05-18 How to Find Out About The Social Sciences indicates the sources of information in the social sciences that are traditionally taught in social science faculties in universities The book delineates the scope and nature of the different social sciences explains the necessary education and training and lists possible careers for those who take up the studies The book also lists the possible sources of information such as organizations libraries books and other published material and social administration Lastly it explains the significance of the different sources of information what kind of information could be derived from them and how they can be used to learn or teach in the social sciences The text is for social scientists professors and researchers on the discipline and its many branches It is also recommended for undergraduate and graduate students alike as well as those who have taken a casual interest on the social sciences

Legend and Belief Linda Dégh, 2001-11-14 Industrial advancement has not changed the basic fragility of human life and the commercialization and consumer orientation of the mass media has actually helped legends travel faster and farther Legends are communicated not only orally face to face but also in the press on radio and television on countless Web sites and by e mail perpetuating new waves of the culture of fear BOOK JACKET
