Gun Trader's Guide, Thirty-Fourth Edition Stephen Carpenter, 2012-10 Provides descriptions prices and photographs of small firearms The Journal of the Royal Artillery ,1915 *Catalogue of Books on the Useful Arts (class 600 of Dewey's Decimal Classification) in the Central Library* Newcastle upon Tyne (England). Disruptive and Game Changing Technologies in Modern Warfare Margaret E. Kosal, 2019-09-27 This book explores and analyzes emerging innovations within today's most cutting edge science and technology. How these impact science and technology policy choices made today and predictions of how science and technology may play a beneficial or deleterious role in the future. Some game changing technologies have received global attention while others may be less well known. The new technologies discussed within this proposal as well as future discoveries may significantly alter military capabilities and may generate new threats against military and civilian sectors Modern Protective Structures Theodor

Krauthammer, 2008-02-01 In today's world reasonably predictable military operations have been replaced by low intensity conflicts less predictable terrorist activities carried out by determined individuals or small groups that possess a wide range of backgrounds and capabilities. Because of the threats posed by this evolving type of warfare civil engineers and emergency personnel face new challenges in designing facilities to protect lives and property and in conducting effective rescue operations and forensic investigations. Addressing these needs *Modern Protective Structures* develops realistic guidelines for the analysis, design, assessment, retrofit and research of protected facilities. After introducing a comprehensive risk management approach the author provides a general background on explosive devices and their capabilities as well as explosive effects and the processes that generate them. He then discusses the effects of conventional and nuclear explosions. The book subsequently considers the significant design differences between conventional and nuclear loads and between existing design procedures and state of the art information from recent research. It also summarizes existing blast resistant design approaches and describes the dynamic responses of structural systems to blasts, shocks and impacts. Additional coverage includes the behavior of specific structural connections, the traditional concept of P-I diagrams and progressive collapse. The book concludes with a systematic and balanced protective design approach. Tackling the analytical design, assessment and hazard mitigation issues associated with short duration dynamic loads, this book examines how impulsive loads affect various types of buildings and facilities. It provides the necessary material to help ensure the safety of persons, assets and projects A New Catalogue of Modern Law Books, including the Old Reports. Sold by J. & W. T. Clarke J.

Atrocity, and War Crimes in Modern History James Larry Taulbee, 2017-02-06 Defining genocide as an international crime this two volume set provides a comparative study of historical cases of genocide and mass atrocity clearly identifying the factors that produced the attitudes and behaviors that led to them discusses the reasons for rules in war and examines how the five principles laid out in the Geneva Conventions and other international agreements have functioned in modern warfare Written by an expert on international politics and law Genocide Mass Atrocity and War Crimes in Modern History Blood and Conscience is an easy to understand resource that explains why genocides and other atrocities occur why humanity saw the need to create rules that apply during war and how culture rules about war and the nature of war intersect The first volume addresses the history and development of the normative regime s that define genocide and mass atrocity Through a comparative study of historical cases that pay particular attention to the factors involved in producing the attitudes and behaviors that led to the incidents of mass slaughter and mistreatment the author identifies the reasons that genocides and mass atrocities in the 20th century were largely ignored until the early 1990s and why even starting then responses were inconsistent The second book discusses why rules in war exist which factors may lead to the adoption of rules what defines a war crime and how the five fundamental principles laid out in the Geneva Conventions and other international agreements have actually functioned in modern warfare It also poses and answers the interesting question of why we should obey rules when our opponents do not The final chapter examines what actions could serve to identify future situations in which mass atrocities may occur and identifies the problems of timely humanitarian intervention in international affairs
