designers today The practice communicates a form of visual and material protest drawing on the ideologies and critical theories of the 1960s and 1970s notably feminism body politics the politics of identity and ecological anti consumerist and anti institutional critiques as well as the concept of otherness It also presents an encounter between two seemingly contradictory concepts luxury and the avant garde The book challenges the definition of design as the production of unnecessary decorative and conceptual objects and the characterisation of Japanese design in particular as beautiful sublime or a product of Japanese culture In doing so it reveals the ways in which material and visual culture serve to voice protest and formulate a social critique
