modernism on the level of literary ideology supplies a most vital basis for writers searching for new methods of literary expression fostering debates among the writers and creating the setting for active experimentation with style form and language This study is a result of an extended stay in the United States by the author who turned increasingly toward questioning and evaluating my own relation to Japan s literary heritage For Japanese who have witnessed at least intellectually the violent attraction to and rejection of foreign cultures of many of their predecessors in the Meiji Taisho and Showa eras and their final often sentimental and abstract glorification of the Japanese cultural heritage nihon kaiki return to Japan still presents enormously complex intellectual as well as emotional problems *Modern Japanese Writers* Jay Rubin, 2001 This is the first encyclopedia in the Scribner Writers Series to focus on Asian writers and genres It highlights 25 of the most widely translated Japanese authors such as Yukio Mishima Kobo Abe Junichiro Tanizaki and Fumiko Enchi

Writers and Society in Modern Japan Irena Powell,1983-06-18 Writing Home: Representations of the Native Place in Modern Japanese Literature Stephen Dodd, 2020-03-17 This book examines the development of Japanese literature depicting the native place furusato from the mid Meiji period through the late 1930s as a way of articulating the uprootedness and sense of loss many experienced as Japan modernized The 1890s witnessed the appearance of fictional works describing a city dweller who returns to his native place where he reflects on the evils of urban life and the idyllic past of his childhood home The book concentrates on four authors who typify this trend Kunikida Doppo Shimazaki T son Sat Haruo and Shiga Naoya All four writers may be understood as trying to make sense of contemporary Japan Their works reflect their engagement with the social intellectual economic and technological discourses that created a network of shared experience among people of a similar age This common experience allows the author to chart how these writers works contributed to the general debate over Japanese national identity in this period By exploring the links between furusato literature and the theme of national identity he shows that the debate over a common language that might transparently express the modern experience helped shape a variety of literary forms used to present the native place as a distinctly Mother-Tongue in Modern Japanese Literature and Criticism Takayuki Japanese experience Yokota-Murakami, 2018-07-28 This book examines how early research on literary activities outside national literatures such as migr literature or diasporic literature conceived of the loss of mother tongue as a tragedy and how it perpetuated the ideology of national language by relying on the dichotomy of native language foreign language It transcends these limitations by examining modern Japanese literature and literary criticism through modern philology the vernacularization movement and Korean Japanese literature Through the insights of recent philosophical linguistic theories it reveals the political problems of the notion of mother tongue in literary and linguistic theories and proposes strategies to realize genuinely exophonic and translational literature beyond the confines of nation Examining the notion of mother tongue in literature and literary criticism the author deconstructs the concept and language itself as an apparatus of nation state in order to imagine

alternative literature genuinely creolized and heterogeneous Offering a comparative transnational perspective on the significance of the mother tongue in contemporary literatures this is a key read for students of modern Japanese literature language and culture as well as those interested in theories of translation and bilingualism
