The Middle-Income Trap in Central and Eastern Europe Yaman Kouli,Uwe Müller,2023-11-10 Since the 1990s the economic development of Central and Eastern Europe has maintained high economic growth rates seemingly leading to an era of prosperity This very positive vision of future economic success linked to current political backlash and a long history of economic adversity is a thin veil of the economic way west for so called transition countries The Middle Income Trap in Central and Eastern Europe examines the reality of the diminishing marginal utility of further international investments alongside the pitfalls of higher government spending to cultivate innovation which ultimately makes foreign capital less attractive In this volume authors from diverse disciplinary perspectives reflect on current debates surrounding the developmental bottlenecks in East Central Europe Their common goal is to analyze the manner of socio economic transformation question of the relevance and impact of the middle income trap and identify possible ways to escape it

Globalization in State Socialist East Central Europe Béla Tomka,2024-07-20 This open access Palgrave Pivot explores four major aspects of globalization foreign trade capital and information flows and the movement of people The book examines how the state socialist countries of East Central Europe fit into the general trend of globalization after WWII It focuses on three specific countries in the region Poland Czechoslovakia and Hungary The study also considers conceptual problems whether recently introduced terms such as alternative globalization and socialist proto globalization are plausible for interpreting state socialist globalization Special attention is paid to the study of continuities and discontinuities in the process of globalization in East Central Europe which is a key issue in current debates This requires a long term perspective so the study covers not only the decades before 1989 but also subsequent developments In doing so the book attempts to find a balance between old and new mainstream interpretations it recognises that East Central European societies experienced considerable globalization during the state socialist era however based on empirical findings instead of alternative or proto globalization the book suggests other notions to conceptualise this process including fragmentation selectivity and unevenness Thus the proposed understanding could also contribute to discussions on globalization beyond East Central Europe

Internal Labor Mobility in Central Europe and the Baltic Region Pierella Paci, 2007

Large regional disparities in labor market indicators exist in Central Europe and the Baltic region Such disparities appear to be persistent over time indicating in part a lack of flexibility in the prevailing adjustment mechanisms Internal labor mobility is often seen as an important instrument to reduce adjustment costs when other mechanisms fail Drawing from a variety of data sources and utilizing a common empirical framework and estimation strategy this study identifies patterns and statistical profiles of geographical mobility It finds internal migration to be generally low and highly concentrated among better educated young and single workers This suggests that migration is more likely to reinforce existing inequalities than to act as an equalizing phenomenon By way of contrast commuting flows have grown over time and are more responsive to regional economic differentials The findings suggest the need for appropriate and country tailored policy measures designed

to increase the responsiveness of labor flows to market conditions
