Organizational and Social Perspectives on Information Technology Richard Baskerville, Jan Stage, Janice I. DeGross, 2013-03-14 The articles in this book constitute the proceedings papers from the IFIP WG 8.2 Working Conference IS2000 The Social and Organizational Perspective on Research and Practice in Information Technology held June 10-12 2000 in Aalborg Denmark The focus of the conference and therefore this book is on the basic aim of the working group namely the investigation of the interrelationships among four major components information systems IS information technology IT organizations and society This basic social and organizational perspective on research and practice in information technology may have evolved substantially since the founding of the group for example increasing the emphasis on IS development The plan for the conference was partially rooted in the early WG 8.2 traditions in which working conferences were substantially composed of invited papers For IS2000 roughly half of the paper presentations were planned to be invited the remaining half were planned to be double blind refereed in response to a Call For Papers Invited papers were single blind reviewed in order to provide the authors with pre publication feedback and comments along with the opportunity to revise their papers prior to its final incorporation in this book

Philosophy and Technology II Carl Mitcham, Alois Huning, 2012-12-06 Until recently the philosophy and history of science proceeded in a separate way from the philosophy and history of technology and indeed with respect to both science and technology philosophical and historical inquiries were also following their separate ways Now we see in the past quarter century how the philosophy of science has been profoundly influenced by historical studies of the sciences and no longer concerned so single mindedly with the analysis of theory and explanation with the relation between hypotheses and experimental observation Now also we see the traditional historical studies of technology supplemented by philosophical questions and no longer so plainly focussed upon contexts of application on invention and practical engineering and on the mutually stimulating relations between technology and society Further alas the neat division of intellectual labor those clearly drawn distinctions between science and technology between the theoretical and the applied

between discovery and justification between internalist and externalist approaches all have become muddled Partly this is due to internal revolutions within the philosophy and history of science the first result being recognition of their mutual relevance Partly however this state of muddle is due to external factors science at the least in the last half century has become so intimately connected with technology and technological developments have created so many new fields of scientific and philosophical inquiry that any critical reflection on scientific and technological endeavors must henceforth take their interaction into account Third Revolution in Indian Perspective V. S. Gupta, 1995 Too Soon To Tell David A.

Grier, 2009-03-27 Based on author David A Grier's column In Our Time which runs monthly in Computer magazine Too Soon To Tell presents a collection of essays skillfully written about the computer age an era that began February 1946 Examining ideas that are both contemporary and timeless these chronological essays examine the revolutionary nature of the computer the relation between machines and human institutions and the connections between fathers and sons to provide general readers with a picture of a specific technology that attempted to rebuild human institutions in its own image

Perspectives on Corpus Linguistics Vander Viana, Sonia Zyngier, Geoff Barnbrook, 2011-12-21 Perspectives on Corpus Linguistics is a collection of interviews with fourteen well known researchers in the field of linguistics Each interview consists of a set of ten questions the first seven are common to all contributors while the last three are connected to the research experience of each guest In the general questions the invited scholars explore sometimes controversial topics such as the concept of representativeness the role of intuition and the status of Corpus Linguistics In the specific questions they provide a thorough discussion of materials and methods in corpus research as well as theoretical and applied perspectives on the use of corpora in language studies Whether experts or novices the volume should be of interest to all those who want to learn about corpus linguistics and carry out research in this fascinating and growing area **The Whale and the Reactor**

Langdon Winner, 2010-07-15 The questions he poses about the relationship between technical change and political power are pressing ones that can no longer be ignored and identifying them is perhaps the most a nascent philosophy of technology can expect to achieve at the present time David Dickson New York Times Book Review The Whale and the Reactor is the philosopher's equivalent of superb public history In its pages an analytically trained mind confronts some of the most pressing political issues of our day Ruth Schwartz Cowan Isis *Perspective*, 1992-11 *Futurework* Charles D
