The Right Kind of Crazy Adam Steltzner, William Patrick, 2016-01-12 From Adam Steltzner who led the Entry Descent and Landing team in landing the Curiosity rover on the surface of Mars comes a profound book about breakthrough innovation in the face of the impossible The Jet Propulsion Laboratory JPL is home to some of history's most jaw-dropping feats of engineering When NASA needed to land Curiosity a 2,000-pound 2.5-billion-rover on the surface of Mars 140 million miles away they turned to JPL Steltzner's team couldn't test their kooky solution the Sky Crane They were on an unmissable deadline and the world would be watching when they succeeded or failed At the helm of this effort was an unlikely rocket scientist and accidental leader Adam Steltzner After barely graduating from high school he followed his curiosity to the local community college to find out why the stars moved Soon he discovered an astonishing gift for math and physics After getting his Ph.D. he ensconced himself within JPL NASA's decidedly unbureaucratic cousin where success in a mission is the only metric that matters The Right Kind of Crazy is a first-person account of innovation that is relevant to anyone working in science art or technology For instance Steltzner describes How his team learned to switch from fear-based to curiosity-based decision making How to escape The Dark Room the creative block caused by fear uncertainty and the lack of a clear path forward How to tell when we're too in love with our own ideas to be objective about them and conversely when to fight for them How to foster mutual respect within teams while still bashing bad ideas The Right Kind of Crazy is a book for anyone who wants to channel their craziness into creativity balance discord and harmony and find a signal in a flood of noise
