Gref, 2010 He contrasts the commonly held perception that the pace of technology is accelerating with the historical record He highlights the people and the organizations which are responsible for America's technological largesse The book follows the money to uncover the underlying trends The beginning of a decline in technology development is detected using indirect indicators for clues Impacts on the formation of companies employment and productivity provide sobering reasons to enlighten others and demand a change in course After considering the possibilities the book proposes several constructive actions which avoid the proverbial tendency to throw more money at the problem The goal of the book is to provoke discussion and promote action where appropriate Americans standard of living is at stake Tech savvy readers will want to understand this issue so as to influence others Long range thinkers will want to factor these considerations into their prognostications The titans of the technology based companies can develop new and improved strategies based on the findings of this book And our elected officials may want to act before a catastrophic disaster confronts the nation This book will strike a chord with everyone who is interested in America's future economic health Specific audience groups include scientists engineers entrepreneurs employees in technology based companies government and corporate policymakers deciding the future of research and development R D programs government workers involved in the execution of government R D programs and those thinking about a career in R D It is complementary to such works as *Politics and Economics in America The Way We Came to Be* by Richard E Carmichael Krieger Publishing Company 1998 which explores political and economic history in order to explain the emergence of the United States world economic dominance Carmichael's book makes recommendations on how government could assist America's businesses in maintaining our economic leadership but it does not address any aspects of technology development and associated issues *Closing the Innovation Gap* by Judy Estrin McGraw Hill 2009 provides business leaders with concepts for leading their organizations so as to close the innovation gap with competitors It focuses on the innovation environment within the organization whereas Dr Gref addresses the complete technology development cycle its financing America's rise to global dominance and the specter of a national decline      *The Rise and Fall of the United States* A Diplomat, 1898      *History of the Rise and Fall of the Slave Power in America* Henry Wilson, 1874      *The Rise and Fall of the Confederate Government* Jefferson Davis, 1881 A history of the Confederate States of America and an apologia for the causes that the author believed led to and justified the American Civil War      The Rise and Decline of the Post-Cold War International Order Hanns W.
