**Americans and Their Weather** William B. Meyer, 2014-10-08 This revealing book synthesizes research from many fields to offer the first complete history of the roles played by weather and climate in American life from colonial times to the present Author William B Meyer characterizes weather events as neutral phenomena that are inherently neither hazards nor resources but can become either depending on the activities with which they interact Meyer documents the ways in which different kinds of weather throughout history have represented hazards and resources not only for such exposed outdoor pursuits as agriculture warfare transportation construction and recreation but for other realms of life ranging from manufacturing to migration to human health He points out that while the weather and climate by themselves have never determined the course of human events their significance as been continuously altered for better and for worse by the evolution of American life

*A Dreadful Deceit* Jacqueline Jones, 2013-12-10 In 1656 a Maryland planter tortured and killed an enslaved man named Antonio an Angolan who refused to work in the fields Three hundred years later Simon P Owens battled soul deadening technologies as well as the fiction of race that divided him from his co workers in a Detroit auto assembly plant Separated by time and space Antonio and Owens

nevertheless shared a distinct kind of political vulnerability they lacked rights and opportunities in societies that accorded marked privileges to people labeled white An American creation myth posits that these two black men were the victims of racial discrimination a primal prejudice that the United States has haltingly but gradually repudiated over the course of many generations In *A Dreadful Deceit* award winning historian Jacqueline Jones traces the lives of Antonio Owens and four other African Americans to illustrate the strange history of race in America In truth Jones shows race does not exist and the very factors that we think of as determining it a person's heritage or skin color are mere pretexts for the brutalization of powerless people by the powerful Jones shows that for decades southern planters did not even bother to justify slavery by invoking the concept of race only in the late eighteenth century did whites begin to rationalize the exploitation and marginalization of blacks through notions of racial difference Indeed race amounted to a political strategy calculated to defend overt forms of discrimination as revealed in the stories of Boston King a fugitive in Revolutionary South Carolina Elleanor Eldridge a savvy but ill starred businesswoman in antebellum Providence Rhode Island Richard W White a Union veteran and Republican politician in post Civil War Savannah and William Holtzclaw founder of an industrial school for blacks in Mississippi where many whites opposed black schooling of any kind These stories expose the fluid contingent and contradictory idea of race and the disastrous effects it has had both in the past and in our own supposedly post racial society Expansive visionary and provocative *A Dreadful Deceit* explodes the pernicious fiction that has shaped four centuries of American history

Beastly Natures Dorothee Brantz, 2010-08-03 Although the animal may be as Nietzsche argued ahistorical living completely in the present it nonetheless plays a crucial role in human history The fascination with animals that leads not only to a desire to observe and even live alongside them but to capture or kill them is found in all civilizations The essays collected in *Beastly Natures* show how animals have been brought into human culture literally helping to build our societies as domesticated animals have done or contributing often in problematic ways to our concept of the wild The book begins with a group of essays that approach the historical relevance of human animal relations seen from the perspectives of various disciplines and suggest ways in which animals might be brought into formal studies of history Differences in species and location can greatly affect the shape of human animal interaction and so the essays that follow address a wide spectrum of topics including the demanding fate of the working horse the complex image of the American alligator at turns a dangerous predator and a tourist attraction the zoo gardens of Victorian England the iconography of the rhinoceros and the preference it reveals in society for myth over science relations between humans and wolves in Europe and what we can learn from society's enthusiasm for political animals such as the pets of the American presidents and the Soviet Union's space dogs Taken together these essays suggest new ways of looking not only at animals but at human history Contributors Mark V Barrow Jr Virginia Tech Peter Edwards Roehampton University Kelly Enright Rutgers University Oliver Hochadel Universitat Aut noma de Barcelona Uwe L bken Rachel Carson Center Munich Garry Marvin Roehampton
