Monetary and Capital Markets Department*, 2017-05-08 This paper presents an assessment of the stability of the financial system in New Zealand Imbalances in the housing market banks concentrated exposures to the dairy sector and their high reliance on wholesale offshore funding are the key macro financial vulnerabilities The banking sector has significant exposure to real estate and agriculture is relatively dependent on foreign funding and is dominated by four Australian subsidiaries A sharp decline in the real estate market a reversal of the recent recovery in dairy prices deterioration in global economic conditions and tightening in financial markets would adversely impact the system Despite these vulnerabilities the banking system is resilient to severe shocks Strengthening the macroprudential framework is important *Risk Management in Outer Space Activities* Maria A. Pozza, Joel A. Dennerley, 2022-02-09 *Risk Management in Outer Space Activities* assesses selected risks associated with space activities from an Australian and New Zealand perspective The book explores the rise of commercial space activities and considers the development of Australia and New Zealand's regulatory frameworks and how they are equipped to address new and emerging risks in the space sector The book examines the juxtaposition of international space law against the domestic legal regimes of Australia and New Zealand and how these regulatory frameworks are designed to create governance mechanisms to control space risk Both national jurisdictions approach space risk from the perspective of liability and international legal obligations but as a result of their different historical space trajectories their risk approaches differ This is illustrated by research that suggests that from an Australian point of view much of its space industry development has been influenced by Cold War era military and national security concerns On the other hand the New Zealand perspective is grounded on the rapid market led commercial development that is currently underway in the country The book examines a variety of risks that can and do emerge in the course of undertaking space activities It does this by presenting a series of space risk case studies There are chapters devoted to examining commercial space risks space insurance the risks posed by space debris cybersecurity and space assets light pollution as a risk for astronomy and the risks inherent in landing objects on the Moon The work contained in this book is intended to provide a clear practical and informed approach to understanding risk management in outer space activities It will appeal to policy makers risk professionals space lawyers national space agencies as well as academics researchers and students **Life and Disability Insurance in New Zealand** Rod Mudgway, 2015-05-08 Life and Disability Insurance can be a challenging subject for the uninitiated This book is

Insurance, Climate Change and the Law Franziska Arnold-Dwyer, 2024-04-03 The insurance industry has found itself at the front line of climate change challenges providing insurance cover in relation to risks associated with climate change As risk carriers insurers pay claims for climate change related losses such as property damage caused by windstorms flooding and wildfires which have been increasing in frequency and severity As major institutional investors insurance companies invest in assets that may be increasingly vulnerable to climate risks Insurance regulators across the globe have therefore started to require insurance companies to identify manage and report on climate change risks that could pose a threat to their financial stability However managing and reporting on the effect of climate risk on an insurer s balance sheet is an inward looking perspective that does not stem climate change It needs to be paired with an outward looking perspective that takes account of the insurance industry s impact on the environment and the insurance industry s capacity to influence what policyholders investee enterprises and other business partners do to address climate change challenges For the insurance industry the key components of positive outward impact are impact underwriting and impact investment This book sets out the current legal and regulatory landscape for impact underwriting and impact investment Whilst the focus of research and regulatory interventions to date has been on inward impact in this book it will be argued that to take positive climate action that supports the Paris Agreement goals and the national and international Net Zero targets the debate should now move on to considering the positive outward impact the insurance industry can make and

how we can create a legal environment to facilitate this The book puts forward the case for a new vision of the role of the insurance industry as climate action enablers and makes proposals for insurance products and risk transfer and loss resilience structures that can support policyholders in their transition to a Net Zero economy The audience for this book will include legal practitioners insurance industry professionals financial and insurance regulators policymakers and interested academics
