Ritual Cosmos The Sanctification Of Life In African Religions:

Ritual Cosmos Evan M. Zuesse, 1979 **African Religion** Laurenti Magesa, 2014-07-30 Describes the moral teachings values norms and principles to follow so that life might be abundant for all of the African religion as it relates to individuals and community *Theoretical Explorations in African Religion* Wim van Binsbergen, Matthew Schoffeleers, 2013-10-28 First published in 1985 This collection of papers on theoretical and methodological perspectives in the study of African religion is the outcome of a conference which the editors were asked to convene on behalf of the African Studies Centre Leiden in December 1979 **Encyclopedia of African Religion** Molefi Kete Asante, Ama Mazama, 2008-11-26 Numerous titles focusing on particular beliefs in Africa exist including Marcel Griaule's *Conversations with Ogotemmeli* but this one presents an unparalleled exploration of a multitude of cultures and experiences It is both a gateway to deeper exploration and a penetrating resource on its own This is bound to become the definitive scholarly resource on African religions Library Journal Starred Review Overall because of its singular focus reliability and scope this encyclopedia will prove invaluable where there is considerable interest in Africa or in different religious traditions Library Journal As the first comprehensive work to assemble ideas concepts discourses and extensive essays in this vital area the Encyclopedia of African Religion explores such topics as deities and divinities the nature of humanity the end of life the conquest of fear and the quest for attainment of harmony with nature and other humans Editors Molefi Kete Asante and Ama Mazama include nearly 500 entries that seek to rediscover the original beauty and majesty of African religion Features Offers the best representation to date of the African response to the sacred Helps readers grasp the enormity of Africa's contribution to religious ideas by presenting richly textured concepts of spirituality ritual and initiation while simultaneously advancing new theological categories cosmological narratives and ways to conceptualize ethical behavior Provides readers with new metaphors figures of speech modes of reasoning etymologies analogies and cosmogonies Reveals the complexity texture and rhythms of the African religious tradition to provide scholars with a baseline for future works The Encyclopedia of African Religion is intended for undergraduate and graduate students in fields such as Religion Africana Studies Sociology and Philosophy Introduction to Religious Studies Harvey J. Sindima, 2012-07-10 In *Introduction to Religious Studies* Harvey J Sindima provides an unconventional approach to the study of world religions Often books and courses on religious studies focus on the major world religions This approach however frequently ignores other religious experiences such as those of various African groups as well as the indigenous people of the Americas and Australia These less widespread religions are commonly described in pejorative terms such as primitive religions or non literate religions Focusing solely on well known religions is an approach that impoverishes religious studies and deprives students of the enormous wealth of religious knowledge of the world *Introduction to Religious Studies* pulls together the diverse religious experience of Africans Native Americans and the indigenous peoples of Australia in order to provide a comprehensive introduction to the study of religion and broaden the

horizons of religious studies students Under each theme or topic examples are drawn from religions of salvation as well as African and Native American religious traditions This book provides students with a deep wide and very rich introduction to religious studies

The Church in Africa, 1450-1950 Adrian Hastings,1995-01-05 I can merely admire his courage in tackling so complex and difficult a subject he should succeed in stimulating a fresh generation of research this well written intelligent and lively study will greatly stimulate anyone fortunate enough to read it Christianity provided the constitutive identity of historic Ethiopia From the sixteenth century and increasingly from the nineteenth it entered decisively into the life and culture of an increasing number of other African peoples In the course of the twentieth century African Christians have become a major part of the world Church and arguably modern African history as a whole is not intelligible without its powerful Christian element Yet despite the great advance in African historiography over the last forty years this is the first major volume to consider the historical development and character of the Christian Church in Africa as a whole linking together Ehtiopia Orthodoxy Roman Catholicism Protestantism and the numerousm Independent churches of modern times The book focuses throughout on the role of conversion the shaping of Church life and its relationship to traditional values and the impact of political power Professor Hastings also compares the relation of Christian history to the comprable development of Islam in Africa

Critical Reflections on Indigenous Religions James L. Cox, 2016-04-22 The study of indigenous religions has become an important academic field particularly since the religious practices of indigenous peoples are being transformed by forces of globalization and transcontinental migration This book will further our understanding of indigenous religions by first considering key methodological issues related to defining and contextualizing the religious practices of indigenous societies both historically and in socio cultural situations Two further sections of the book analyse cases derived from European contexts which are often overlooked in discussion of indigenous religions and in two traditional areas of study South America and Africa

The Civilization of Illiteracy Mihai Nadin, 1997 Phenomena related to the transition from a literacy dominated civilization to one of various means of expression and communication are at the center of his book The fall of totalitarian regimes the current structural difficulties of the European Community the burden of state bureaucracies the world wide

effort of re engineering and the global economy are part of the bigger picture of a necessary development Roots and Routes: Poetics at New College of California Patrick James Dunagan, Marina Lazzara, Nicholas James Whittington, 2020-10-06 Roots and Routes gathers essays talks interviews statements notes and other prose writings by poets who studied and or taught at the New College of California s Masters in Poetics program over the course of its nearly 30 year existence The collection evokes a much needed anti hierarchical even anarchic pedagogy in poetry poetics and the literary arts and is part of a general reevaluation of standard higher education models on Creative Writing As such it will appeal to a wide range of students and scholars interested in America s recent literary history as well as to poets outside the academy and the general reader interested in US poetry and poetics *African Americans and the Bible* Vincent L. Wimbush, 2012-09-01 Perhaps no other group of people has been as much formed by biblical texts and tropes as African Americans From literature and the arts to popular culture and everyday life the Bible courses through black society and culture like blood through veins Despite the enormous recent interest in African American religion relatively little attention has been paid to the diversity of ways in which African Americans have utilized the Bible African Americans and the Bible is the fruit of a four year collaborative research project directed by Vincent L Wimbush and funded by the Lilly Endowment It brings together scholars and experts sixty eight in all from a wide range of academic and artistic fields and disciplines including ethnography cultural history and biblical studies as well as art music film dance drama and literature The focus is on the interaction between the people known as African Americans and that complex of visions rhetorics and ideologies known as the Bible As such the book is less about the meaning s of the Bible than about the Bible and meaning s less about the world s of the Bible than about how worlds and the Bible interact in short about how a text constructs a people and a people constructs a text It is about a particular sociocultural formation but also about the dynamics that obtain in the interrelation between any group of people and sacred texts in general Thus African Americans and the Bible provides an exemplum of sociocultural formation and a critical lens through which the process of sociocultural formation can be viewed **Histories of Religious Thought and Practice in Africa** PROFESSOR LOUIS. BRENNER, 2024-12-17 This book is a richly detailed comparative analysis of endogenous Muslim and Christian religious thought and practice in sub Saharan Africa Organized thematically the book presents a conceptual and analytical framework for the study of religious traditions as complex and constantly evolving social phenomena The most salient theme in the book is how different religious traditions defined and provided for the personal and communal wellbeing of their adherents Other major themes explore how religious traditions have influenced one another how religious practitioners conceptualized and interacted with spiritual entities how religious knowledge and expertise were acquired and transmitted how rituals were organized and structured in order to achieve their aims and how rituals affected those who performed them Additional topics analysed include the personalization of relationships with spiritual entities the gendering of religious thought and practice how personal transformative rituals were conceptualized and enacted with

reference to stages of the life cycle such as birth marriage and death and how suffering was seen as integral to the process of personal transformation Overall the book engages with issues that continue to animate the study of religious thought and practice in Africa and African studies more generally

In Whose Image? Abdou Maligalim Simone, 1994-07-13 A Muslim scholar with extensive experience in Africa T Abdou Maligalim Simone was recruited by the Islamic fundamentalist Shari a Movement in Sudan to act as consultant for its project to unite Muslims and non Muslims in Khartoum s shanty towns Based on his interviews with hundreds of individuals during this time plus extensive historical and archival research In Whose Image is a penetrating examination of the use of Islam as a tool for political transformation Drawing a detailed portrait of political fundamentalism during the 1985 89 period of democratic rule in the Sudan Simone shows how the Shari a Movement attempted to shape a viable social order by linking religious integrity and economic development where religious practice was to dominate all aspects of society and individuals daily lives However because Sudanese society is remarkably diverse ethnically and religiously this often led to conflict fragmentation and violence in the name of Islam Simone s own Islamic background leads him to deplore the violence and the devastating psychological economic and cultural consequences of one form of Islamic radicalism while holding to hope that a viable form of this inherently political religion can in fact be applied As a counterpoint he ends with a discussion of South Africa s Call of Islam which seeks political unity through a more tolerant interpretation of Islam As an introduction to religious discourse in Africa this book will be widely read by students and scholars throughout African Studies Religious Studies Anthropology and Political Science
