Although there have been numerous volumes examining the medical and social dimensions of mental illness in the early modern period and a few that have examined stage representations of such conditions this volume is unique in its focus on the relationships between madness kingship and the anxiety of lost or fragile masculinity. Throughout the volume the authors engage with the field of disability studies to show how disability and mental health were portrayed on stage and what those representations reveal about the period and the people who lived in it. Altogether the essays question what happens when theatrical expressions of madness are mapped onto the bodies of actors playing kings and how the threat of diminished masculinity affects representations of power. Privacy, Domesticity, and Women in Early Modern England Corinne S. Abate, 2017-05-15 The ten essays in this collection explore the discrete yet overlapping female spaces of privacy and domesticity in early modern England While other literary critics have focused their studies of female privacy on widows witches female recusants and criminals the contributors to this collection propose that the early modern subculture of femaleness is more expansive and formative than is typically understood They maintain that the subculture includes segregated sometimes secluded domestic places for primarily female activities like nursing sewing cooking and caring for children and the sick It also includes hidden

psychological realms of privacy organized by women's personal habits around intimate friendships or kinship and behind institutional powerlessness. The texts discussed in the volume include plays not only by Shakespeare but also Ford Wroth, Marvell, Spenser, and Cavendish among others. Through the lens of literature, contributors consider the unstructured, fluid quality of much everyday female experience as well as the dimensions, symbols, and the ever-changing politics and culture of the household. They analyze the complex habits of female settings, the verbal, spatial, and affective strategies of early modern women's culture, including private rituals, domestic practices, and erotic attachments, in order to provide a broader picture of female culture and of female authority. The authors argue through a range of critical approaches that include feminist, historical, and psychoanalytic that early modern women often transformed their confinement into something useful and necessary, creating protected and even sacred spaces with their own symbols and aesthetic.
