Archaeology James L. Pearson, 2000 Archaeological Approaches to Shamanism Dragoş Gheorghiu, Herman

Bender, Emilia Pásztor, George Nash, 2018-04-18 This long awaited book discusses both ancient and modern shamanism demonstrating its longevity and spatial distribution The book is divided into eleven thought provoking chapters that are organised into three sections mind body nature and culture It discusses the clear associations with this sometimes little understood ritualised practice and asks what shamanism is and if tangible evidence can be extracted from a largely fragmentary archaeological record The book offers a novel portrayal of the material culture of shamanism by collating carefully selected studies by specialists from three different continents promoting a series of new perspectives on this idiosyncratic and sometimes intangible phenomenon **Handbook of Archaeological Theories** R. Alexander

Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology

Archaeology: The Key Concepts Colin Renfrew, Paul Bahn, 2013-09-05 An invaluable resource providing an up to date and comprehensive survey of the key terms used in this discipline today *Inside the Neolithic Mind: Consciousness, Cosmos, and the Realm of the Gods* David Lewis-Williams, David Pearce, 2005-10-01 An exploration of how brain structure and cultural content interacted in the Neolithic period 10 000 years ago to produce unique life patterns and belief systems What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland How can the concepts of birth death and wild cast light on the archaeological enigma of the domestication of cattle What generated the revolutionary social change that ended the Upper Palaeolithic David Lewis Williams s previous book *The Mind in the Cave* dealt with the remarkable Upper Palaeolithic paintings carvings and engravings of western Europe Here Dr Lewis Williams and David Pearce examine the intricate web of belief myth and society in the succeeding Neolithic period arguably the most significant turning point in all human history when agriculture became a way of life and the fractious society that we know today was born The authors focus on two contrasting times and places the beginnings in the Near East with its mud brick and stone houses each piled on top of the ruins of another and western Europe with its massive stone monuments more ancient than the Egyptian pyramids They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced Drawing on the latest research the authors skillfully link material on human consciousness imagery and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity In doing so they create a

fascinating neurological bridge to the mysterious thought lives of the past and reveal the essence of a momentous period in human history 100 illustrations 20 in color **The Origins of Shamanism, Spirit Beliefs, and Religiosity** H.

experiences are remarkably uniform many can be pharmacologically induced Recent research into the neurology of religious experience has shown that when worshipping or praying a certain part of the brain apparently dormant during other activities becomes active What does all this mean for those of faith and those with none In this fascinating book barrister Charles Foster takes a survey of the evidence from shamans to medieval mystics to out of body experiences and epilepsy via Jerusalem and middle class Christianity and assesses its significance Written in short accessible chapters this is a fascinating tour of religious and mystical experiences and their relation to human physiology

immortality **Structured Worlds** Aubrey Cannon, 2014-10-14 Hunter gatherer societies are constrained by their environment and the technologies available to them. However, until now, the role of culture in foraging communities has not been widely considered. *Structured Worlds* examines the role of cosmology, values, and perceptions in the archaeological histories of hunter-fisher-gatherers. The essays examine a range of cultures: Mesolithic Europe, Siberia, Jomon Japan, the Northwest Coast, the northern Plains, and High Arctic of North America, to show the role of conceptual frameworks in subsistence and settlement, technology, mobility, migration, demography, and social organization. Spanning from the early Holocene period to the present day, *Structured Worlds* draws on archaeology and ethnography to explore the role of beliefs, ritual, and social values in the interaction between foragers and their physical and social landscape. Material culture, animal bones, and settlement patterns show that the behaviours of hunter-gatherers were shaped as much by cultural concepts as by material need.

The Evolution of Catholic Social Ethics Frank Colborn, 2020-04-16 This book offers a new way of understanding Catholic social ethics. The narrative expands its context backward into the pre-biblical past and outward into the social teachings of other religions and civilizations. It also tells a story that shows the continuity between the different eras of Catholic tradition and it brings in the witness of heroic men and women to the possibility of living by our beliefs. It portrays our social ethics as a work in progress. Our beliefs have been put forward clearly by official teachers; they have been integrated to some extent into our institutions; they need to be better explained to the world. This work is intended to give students a deeper understanding of Catholic social ethics so that they may more effectively communicate the powerfully attractive Catholic vision of life. It may even give some of those well-versed in Catholic ethics some new insights. The author draws on his experience as a theologian, a teacher, and a pastor to present information in a readable form. Having wished such a resource were available to him as a teacher, he has taken it upon himself to write it for others.

Exploring the Materiality of Food 'Stuff' Louise Steel, Katharina Zinn, 2016-11-10 From remote antiquity to contemporary contexts, food and the stuff of food remains central to people's daily experiences, as well as their sense and expression of identity. This volume explores the materiality of foodstuffs past and present, examining humanity's intriguingly complex relationships with and experiences of food. The book also makes a fresh contribution to our understanding of materiality through a novel focus on material culture, analysing objects used to prepare, wrap, serve, and consume food, and the tactile experiences involved in its production and consumption. Considering a wide range of cultures spanning from ancient China to modern-day Kenya, this broad collection of interdisciplinary chapters reveals the multiple interplays between food, bodies, material worlds, rituals, and embodied knowledge that emerge from these encounters and which in turn shape the material culture of food. *Exploring the Materiality of Food Stuff* makes an important contribution to this burgeoning field and will be of interest to archaeologists and anthropologists working in the key area of food research.

Seeing and Knowing Geoffrey Blundell, Christopher Chippindale, Benjamin Smith, 2016-06-16 The purpose of *Seeing and Knowing* is to demonstrate the depth and wide

geographical impact of David Lewis Williams contribution to rock art research by emphasizing theory and methodology drawn from ethnography Contributors explore what it means to understand and learn from rock art and a contrast is drawn between those sites where it is possible to provide a modern ethnographic context and those sites where it is not This is the definitive guide to the interplay between ethnography and rock art interpretation and is an ideal resource for students and researchers alike

The Descent of Madness Jonathan Burns, 2007-03-12 Drawing on evidence from across the behavioural and natural sciences this book advances a radical new hypothesis that madness exists as a costly consequence of the evolution of a sophisticated social brain in Homo sapiens Having explained the rationale for an evolutionary approach to psychosis the author makes a case for psychotic illness in our living ape relatives as well as in human ancestors He then reviews existing evolutionary theories of psychosis before introducing his own thesis that the same genes causing madness are responsible for the evolution of our highly social brain Jonathan Burns novel Darwinian analysis of the importance of psychosis for human survival provides some meaning for this form of suffering It also spurs us to a renewed commitment to changing our societies in a way that allows the mentally ill the opportunity of living The Descent of Madness will be of interest to those in the fields of psychiatry psychology sociology and anthropology and is also accessible to the general reader
