Wilken, 2014-02-07 Teletechnologies or technologies of distance cannot be ignored Indeed the present electronic age is said to have wrought profound changes to how we think about and experience who we are where we are and how we relate with one another Place and community have traditionally formed key concepts for thinking about these issues but what relevance do these concepts now hold for us In this wide ranging study Wilken re evaluates how ideas of place and community intersect with and help us make sense of a world transformed by information and communication technologies This interdisciplinary investigation ranges across diverse textual and contextual terrain exploring approaches from media and communications architectural history and theory philosophy sociology geography literature and urban design The rich analysis of these myriad texts reveals the complex and at times contradictory ways in which notions of place and community circulate in relation to these technologies of distance Wilken s examination underscores both the enduring importance of ideas of place and community in the present age and the urgent need to continue to engage with think about and reconfigure these twin ideas

Hegel s Phenomenology of Spirit A Critical Rethinking in Seventeen Lectures provides a clear and philosophically engaging investigation of Hegel s first masterpiece perhaps the most revolutionary work of modern philosophy The book guides the reader on an intellectual adventure that takes up Hegel s revolutionary strategy of paving the way for doing philosophy without presuppositions by first engaging in a phenomenological investigation of knowing as it appears That preliminary investigation observes how the prevailing view of knowing that condemns cognition to operating with presuppositions proves unable to justify its own knowledge claims and ends up undermining the distinction between knowing and its object on which that view depends Unlike other studies of Hegel s Phenomenology of Spirit the work rethinks the entire argument with sustained attention to the project that gives the work its revolutionary significance Free of unnecessary jargon and always focusing on clearly unraveling the argument in its entirety Hegel s Phenomenology of Spirit A Critical Rethinking in Seventeen Lectures will be indispensable to undergraduate and graduate students of philosophy Hegel scholars and anyone interested in tackling the radical project of doing philosophy without foundations **Serge Chermayeff** Mary A.

Vance,1983 *Alasdair MacIntyre, George Lindbeck, and the Nature of Tradition* David Trenery,2014-11-06 What should we believe and why should we believe it This book addresses these questions through a critical exposition of the work of the contemporary philosopher Alasdair MacIntyre and of the theologian George Lindbeck the father of postliberal theology The book argues that MacIntyre s philosophical development can be seen as a response to the question of how belief in a comprehensive metaphysical system can be justified Such a system provides its believers with an account of the nature of the universe and human nature and a basis for their ethical reasoning and action The book draws on Lindbeck s cultural

linguistic account of religion to argue that such a system is primarily a way of interpreting the world and the place of humanity within it rather than a speculative theory The justification of belief in such systems can be understood in terms of MacIntyre's account of tradition constituted rationality provided that this notion of rationality is made more specific by the incorporation of elements of Lindbeck's theology Equally the book argues that Lindbeck's theology can be strengthened by the incorporation of elements drawn from MacIntyre's work This book will be of value to students of philosophy and theology and to the general reader who is interested in the question of the grounds of belief *Community Health Nursing Practice* Ruth B. Freeman, Janet Heinrich, 1981 **Community Interests Across International Law** Eyal Benvenisti, Georg Nolte, Keren Yalin-Mor, 2018 To what extent are states expected to take into account the interests of others when conducting relations with other states This is the question examined by this book as it considers the various manifestations of what has been described as community interests in areas regulated by international law Urban Community Anthony J. Graduate School of Design. Library, 1974 **Shapes of Freedom** Peter C. Hodgson, 2012-06-07 Peter C Hodgson explores Hegel's bold vision of history as the progress of the consciousness of freedom Following an introductory chapter on the textual sources the key categories and the modes of writing history that Hegel distinguishes Hodgson presents a new interpretation of Hegel's conception of freedom Freedom is not simply a human production but takes shape through the interweaving of the divine idea and human passions and such freedom defines the purpose of historical events in the midst of apparent chaos Freedom is also a process that unfolds through stages of historical cultural development and is oriented to an end that occurs within history the kingdom of freedom The purpose and the process of history are tragic however because history is also a slaughterhouse that shatters even the finest human creations and requires a constant rebuilding Hegel's God is not a supreme being or large entity but the true infinite that encompasses the finite History manifests the rule of God providence and it functions as the justification of God theodicy But the God who rules in and is justified by history is a crucified God who takes the suffering anguish and evil of the world into and upon godself accomplishing reconciliation in the midst of ongoing estrangement and inescapable death Shapes of Freedom addresses these themes in the context of present day questions about what they mean and whether they still have validity
