## **Shape Of The City Toronto Struggles With Modern Planning:**

**The Shape of the City** John Sewell, 1993-12-15 Critics have long voiced concerns about the wisdom of living in cities and the effects of city life on physical and mental health For a century planners have tried to meet these issues John Sewell traces changes in urban planning from the pre Depression garden cities to postwar modernism and a revival of interest in the streetscape grid In this far ranging review Sewell recounts the arrival of modern city planning with its emphasis on lower densities limited access streets segregated uses and considerable green space He makes Toronto a case history with its pioneering suburban development in Don Mills and its other planned communities including Regent Park St Jamestown Thorncrest Village and Bramalea The heyday of the modern planning movement was in the 1940s to the 1960s and the Don Mills concept was repeated in spirit and in style across Canada Eventually strong public reaction brought modern planning almost to a halt within the city of Toronto The battles centred on saving the Old City Hall and stopping the Spadina Expressway Sewell concludes that although the modernist approach remains ascendant in the suburbs the City of Toronto has begun to replace it with alternatives that work This is a reflective but vigorous statement by a committed urban reformer Few Canadians are better suited to point the way towards city planning for the future

Anders Sandberg, 2017-10-02 Post industrial urban spaces typically include abandoned factories disused rail lines old pits and quarries and de commissioned landfills In these places different visions compete for dominance with respect to current and future land uses Neighbours often view such urban greenspace as polluted unkempt and weedy harbouring undesirable biophysical features and people These are spaces that often become the focus of some form of revitalization reinvestment and restoration From the perspective of civic authorities and urban planners transforming post industrial landscapes into disciplined and tended greenspace creates the urban conditions and signals of popular contemporary taste that attract investors gentrifiers and tourists But post industrial spaces are also places where unique and unpredictable human and ecological associations can emerge spontaneously Such places may contain considerable ecological integrity and biodiversity

Reconstructing Urban Regime Theory Mickey Lauria, 1997 Providing a robust conceptual framework urban regime theory has despite its cited shortcomings gained a dominant position in the literature on local politics in addition to its recent use in contexts outside the United States and in comparative cross national research Reconstructing Urban Regime Theory presents a challenging argument for the need to reconceptualize urban regime's middle level abstractions by interpreting it through

the higher level abstractions of regulationist theory The contributors propose stronger conceptual linkages between local agents and institutions regime transformation and the restructuring of urban space The blend of empirical and case study provides an excellent mix of theory and practice

The Death and Life of the Single-Family House Nathanael Lauster,2016-11-02 Vancouver today is recognized as one of the most livable cities in the world as well as an international model for sustainability and urbanism Single family homes in this city are a dying breed Most people live in the various low rise and high rise urban alternatives throughout the metropolitan area The Death and Life of the Single Family House explains how residents in Vancouver attempt to make themselves at home without a house Local sociologist Nathanael Lauster has painstakingly studied the city s dramatic transformation to curb sprawl He tracks the history of housing and interviews residents about the cultural importance of the house as well as the urban problems it once appeared to solve Although Vancouver s built environment is unique Lauster argues that it was never predestined by geography or demography Instead regulatory transformations enabled the city to renovate build over and build around the house Moreover he insists there are lessons here for the rest of North America We can start building our cities differently and without sacrificing their livability

*City Stages* Michael McKinnie,2013-06-17 In every major city there exists a complex exchange between urban space and the institution of the theatre City Stages is an interdisciplinary and materialist analysis of this relationship as it has existed in Toronto since 1967 Locating theatre companies their sites and practices in Toronto s urban environment Michael McKinnie focuses on the ways in which the theatre has adapted to changes in civic ideology environment and economy Over the past four decades theatre in Toronto has been increasingly implicated in the civic self fashioning of the city and preoccupied with the consequences of the changing urban political economy City Stages investigates a number of key questions that relate to this pattern How has theatre been used to justify certain forms of urban development in Toronto How have local real estate markets influenced the ways in which theatre companies acquire and use

performance space How does the analysis of theatre as an urban phenomenon complicate Canadian theatre historiography McKinnie uses the St Lawrence Centre for the Arts and the Toronto Centre for the Performing Arts as case studies and considers theatrical companies such as Theatre Passe Muraille Toronto Workshop Productions Buddies in Bad Times and Necessary Angel in his analysis City Stages combines primary archival research with the scholarly literature emerging from both the humanities and social sciences The result is a comprehensive and empirical examination of the relationship between the theatrical arts and the urban spaces that house them Modest Hopes Don Loucks, Leslie Valpy, 2021-09-14 Celebrating Toronto's built heritage of row houses semis and cottages and the people who lived in them Despite their value as urban property Toronto's workers cottages are often characterized as being small cramped poorly built and in need of modernization or even demolition But for the workers and their families who originally lived in them from the 1820s to the 1920s these houses were far from modest Many had been driven off their ancestral farms or had left the crowded conditions of tenements in their home cities abroad Once in Toronto many lived in unsanitary conditions in makeshift shantytowns or cramped shared houses in downtown neighbourhoods such as The Ward To then move to a self contained cottage or rowhouse was the result of an unimaginably strong hope for the future and a commitment to family life Through the stories of eight families who lived in these Modest Hopes authors Don Loucks and Leslie Valpy bring an important but forgotten part of the Toronto narrative to life They illuminate the development of Toronto's working class neighbourhoods such as Leslieville Corktown and others and explain the designs and architectural antecedents of these undervalued heritage properties

Changing Canada Wallace Clement, Leah F. Vosko, 2003 Changing Canada examines political transformations welfare state restructuring international boundaries and contexts the new urban experience and creative resistance The authors question dominant ways of thinking and promote alternative ways of understanding and explaining Canadian society and politics that encourage progressive social change They examine how the evolution of capitalism is producing new types of transformations and new forms of resistance and show that aspects of the state and the wider society are being contested They also discuss the often paradoxical or contradictory effects of various social forces such as the liberating but also constraining features of new communications technologies new employment norms and new household forms
