**The Shapes of Things** Shawn W. Walker, 2015-06-25 Many things around us have properties that depend on their shape for example the drag characteristics of a rigid body in a flow This self contained overview of differential geometry explains how to differentiate a function in the calculus sense with respect to a shape variable This approach which is useful for understanding mathematical models containing geometric partial differential equations PDEs allows readers to obtain formulas for geometric quantities such as curvature that are clearer than those usually offered in differential geometry texts Readers will learn how to compute sensitivities with respect to geometry by developing basic calculus tools on surfaces and combining them with the calculus of variations Several applications that utilize shape derivatives and many illustrations that help build intuition are included

Wood, 2006-09-11 Neil LaBute A Casebook is the first book to examine one of the most successful and controversial contemporary American playwrights and filmmakers While he is most famous and in some cases infamous for his early films In the Company of Men and Your Friends and Neighbors Labute is equally accomplished as a playwright His work extends from the critique of false religiosity in Bash to examinations of opportunism irresponsible art failed parenting and racism in later plays like Mercy Seat The Shape of Things The Distance From Here Fat Pig Autobahn and the very recent This Is How It Goes and Some Girls Like David Mamet an acknowledged influence on him and Conor McPherson with whom he shares some stylistic and thematic concerns LaBute tends to polarize audiences The angry voices violent situations and irresponsible behavior in his works especially those focusing on male characters have alienated some viewers But the writer s religious affiliation and refusal to condone the actions of his characters suggest he is neither exploitive nor pornographic This casebook explores the primary issues of the writer s style themes and dramatic achievements Contributors describe for example the influences both classical and contemporary on his work his distinctive vision in theater and film the role of religious belief in his work and his satire In addition to the critical introduction by Wood and the original essays by leading dramatic and literary scholars the volume also includes a bibliography and a chronology of the playwright s life and works

corsair. Lara. Manfred. The Blues. Marino Feliero. Heaven and earth. Cain. Sardanapalus George Gordon Byron Baron Byron,1910      *"Nazi Fantasy"* Amos Morris-Reich,2025-03-27 This book brings together Vil m Flusser and intellectual Jewish history of the second half of the twentieth century Flusser is viewed today by many scholars as the most original theoretician of media and photography in the second half of the twentieth century and yet this is the first monograph about him in English Combining elements of Flusser s biography with a rigorous study of his writing this book shows that concepts of virtuality medium and embodiment underpin not only Flusser s understanding of technological media such as photography but also his understanding of evolution and of real or imaginary biological organisms This book argues that Flusser contended with Nazism in his writings on these biological and ecological themes Two threads and their relationship are explored the first bears on Nazism as undergirded by a biological perspective an attempt to eradicate a population taken to be parasitic in the second Nazism is simply viewed as stupid Such a line of inquiry necessarily leads to and includes our dealing with the Nazi fantasy because fantasy was fused into Nazism s own vision This book will not only be an ideal resource for students and scholars of intellectual Jewish history but will interest anyone seeking an introduction to Flusser and the philosophy of science within the context of Nazism      *Reflecting 9/11* Heather Pope,Victoria Bryan,2016-06-22 In over fifteen years the cultural and artistic response to 9 11 has been wide ranging in form and function As the turbulent post 9 11 years have unfolded years that have been shaped and characterized by the War on Terror the Patriot Act the Wars in Afghanistan and Iraq 7 7 Abu Ghraib and Guant namo Bay these texts have been commemorative and heroic have attempted to work through collective and individual traumas and have struggled with trying to represent the terrorist other Many of these earlier domestic heroic and traumatic works have so often been read as limitations in narrative This collection however challenges the language of limitation and provides re readings of earlier work but also traces the emergence of a new paradigm for discussing the artistic responses to 9 11 one that frames these narratives as dialogic self conscious and self reflexive interventions in the responses to the attacks the initial representations of the attacks and the ever shifting social and geopolitical continuities of the 9 11 decade These texts widen the conversation about the lasting impacts of 9 11 and incorporate strands of discussion on American exceptionalism and imperialism torture and otherness whilst still remaining invested in the personal and collective traumas of the attacks The authors included here ask crucial questions about the way 9 11 is being historicized will it for example be read as a moment of rupture or epoch Will it inevitably be attached to the War on Terror or the Wars in Iraq and Afghanistan As they trace the emergent patterns of reflexivity politicization and dissent the contributions here are also implicitly invested in asking how far they extend      **Business Improvement Districts and the Shape of American Cities** Jerry Mitchell,2009-01-01 Jerry Mitchell provides a comprehensive analysis of business improvement districts BIDs public private partnerships that shape city places into enticing destinations for people to work live and have fun Responsible for the revitalization of New York s Times Square and Seattle s Pioneer Square BIDs operate in

large cities and small towns throughout the United States Mitchell examines the reasons for their emergence the ways they are organized and financed the types of services they provide their performance their advantages and disadvantages and their future prospects      How I Did It Lawrence Harbison, 2015-03-01 Applause Acting Series For this book Lawrence Harbison has interviewed successful playwrights who have developed relationships with theaters that regularly produce their plays have had at least one major New York production have their plays published by a licensor such as Dramatists Play Service or Samuel French have received commissions and have an agent Harbison asks each of them the same question How did you do it How I Did It features an introduction by Theresa Rebeck and interviews with David Auburn Stephen Belber Adam Bock Bekah Brunstetter Sheila Callaghan John Cariani Eric Coble Jessica Dickey Kate Fodor Gina Gionfriddo Daniel Goldfarb Kirsten Greenidge Rinne Groff Lauren Gunderson Michael Hollinger Rajiv Joseph Greg Kotis Neil LaBute Deborah Zoe Laufer Wendy MacLeod Itamar Moses Bruce Norris Lynn Nottage Aaron Posner Adam Rapp J T Rogers Lloyd Suh Carl Thomas Sharr White and Anna Ziegler A valuable tool for playwrights daunted by the extremely difficult task of getting their work produced as well as to playwrighting students How I Did It is full of stories of how it s done      American Drama Jacqueline Foertsch, 2017-09-16 An essential introductory textbook that guides students through 300 years of American plays as well as their remarkable engagement with texts from across the Atlantic Divided into seven historical periods Jacqueline Foertsch offers unique overviews of 38 American plays and their reception from Robert Hunter s *Androboros* c 1714 to Lin Manuel Miranda s *Hamilton* 2015 Each historical section begins with an overseas play that proved influential to American playwrights in that period demonstrating to students an astonishing dialogue taking place across the Atlantic This is an ideal core text for modules on American Drama or a supplementary text for broader modules on American Literature which may be offered at the upper levels of an undergraduate literature drama theatre studies or American studies degree In addition it is a crucial resource for students who may be studying American drama as part of a taught postgraduate degree in literature drama or American studies      *Neoconstructivism* Scott Johnson, 2010 Arguments over the developmental origins of human knowledge are ancient founded in the writings of Plato Aristotle Descartes Hume and Kant They have also persisted long enough to become a core area of inquiry in cognitive and developmental science Empirical contributions to these debates however appeared only in the last century when Jean Piaget offered the first viable theory of knowledge acquisition that centered on the great themes discussed by Kant object space time and causality The essence of Piaget s theory is constructivism The building of concepts from simpler perceptual and cognitive precursors in particular from experience gained through manual behaviors and observation The constructivist view was disputed by a generation of researchers dedicated to the idea of the competent infant endowed with knowledge say of permanent objects that emerged prior to facile manual behaviors Taking this possibility further it has been proposed that many fundamental cognitive mechanisms reasoning event prediction decision making hypothesis testing and deduction operate independently of all experience and are

in this sense innate The competent infant view has an intuitive appeal attested to by its widespread popularity and it enjoys a kind of parsimony It avoids the supposed philosophical pitfall posed by having to account for novel forms of knowledge in inductive learners But this view leaves unaddressed a vital challenge to understand the mechanisms by which new knowledge arises This challenge has now been met The neoconstructivist approach is rooted in Piaget s constructivist emphasis on developmental mechanisms yet also reflects modern advances in our understanding of learning mechanisms cortical development and modeling This book brings together for the first time theoretical views that embrace computational models and developmental neurobiology and emphasize the interplay of time experience and cortical architecture to explain emergent knowledge with an empirical line of research identifying a set of general purpose sensory perceptual and learning mechanisms that guide knowledge acquisition across different domains and through development     The Fragility of Things

William E. Connolly, 2013-09-02 In *The Fragility of Things* eminent theorist William E Connolly focuses on several self organizing ecologies that help to constitute our world These interacting geological biological and climate systems some of which harbor creative capacities are depreciated by that brand of neoliberalism that confines self organization to economic markets and equates the latter with impersonal rationality Neoliberal practice thus fails to address the fragilities it exacerbates Engaging a diverse range of thinkers from Friedrich Hayek Michel Foucault Hesiod and Immanuel Kant to Voltaire Terrence Deacon Friedrich Nietzsche and Alfred North Whitehead Connolly brings the sense of fragility alive as he rethinks the idea of freedom Urging the Left not to abandon the state but to reclaim it he also explores scales of politics below and beyond the state The contemporary response to fragility requires a militant pluralist assemblage composed of those sharing affinities of spirituality across differences of creed class gender sexual orientation and ethnicity
