Shared Destiny Community Effects Of Uninsurance:

A Shared Destiny Institute of Medicine, Board on Health Care Services, Committee on the Consequences of Uninsurance, 2003-03-05 *A Shared Destiny* is the fourth in a series of six reports on the problems of uninsurance in the United States. This report examines how the quality, quantity, and scope of community health services can be adversely affected by having a large or growing uninsured population. It explores the overlapping financial and organizational basis of health services delivery to uninsured and insured populations, the effects of community uninsurance on access to health care locally and the potential spillover effects on a community's economy and the health of its citizens. The committee believes it is both mistaken and dangerous to assume that the persistence of a sizable uninsured population in the United States harms only those who are uninsured.

More than Ramps Lisa I. Iezzoni, Bonnie L. O'Day, 2010-04-10 Nearly twenty percent of Americans live today with some sort of disability and this number will grow in coming decades as the population ages Despite this the U S health care system is not set up to provide care comfortably safely and efficiently to persons with disabilities Individuals with disabilities can therefore face significant barriers to obtaining high quality health care Some barriers result from obvious impediments such as doors without automatic openers

and examining tables that are too high Other barriers arise from faulty communication between patients and health care professionals including misconceptions among clinicians about the daily lives preferences values and abilities of persons with disabilities Yet additional barriers relate to health insurance limits on items and services essential to maximizing health and independence This book examines the health care experiences of persons who are blind deaf hard of hearing or who have difficulties using their legs arms or hands The book then outlines strategies for overcoming or circumventing barriers to care starting by just asking persons with disabilities about workable solutions Creating safe and accessible health care for persons with disabilities will likely benefit everyone at some point This book has three parts The first part looks at the historical roots of healthcare access for persons with disabilities in the United States The second part discusses the current situation and the special challenges for those with disabilities The third part looks forward to discuss the ways in which healthcare quality and access can improve

The Health Care Safety Net in a Post-Reform World Sara Rosenbaum,Mark A. Hall,2012-08-03 *The Health Care Safety Net in a Post Reform World* examines how national health care reform will impact safety net programs that serve low income and uninsured patients The safety net refers to the collection of hospitals clinics and doctors who treat disadvantaged people including those without insurance regardless of their ability to pay Despite comprehensive national health care reform over twenty million people will remain uninsured And many of those who obtain insurance from reform will continue to face shortages of providers in their communities willing or able to serve them As the demand for care grows with expanded insurance so will the pressure on an overstretched safety net This book with contributions from leading health care scholars is the first comprehensive assessment of the safety net in over a decade Rather than view health insurance and

the health care safety net as alternatives to each other it examines their potential to be complementary aspects of a broader effort to achieve equity and quality in health care access It also considers whether the safety net can be improved and strengthened to a level that can provide truly universal access both through expanded insurance and the creation of a well integrated and reasonably supported network of direct health care access for the uninsured Seeing safety net institutions as key components of post health care reform in the United States as opposed to stop gap measures or as part of the problem is a bold idea And as presented in this volume it is an idea whose time has come *The Academic Health Center Don*

Lower Cost Institute of Medicine, Committee on the Learning Health Care System in America, 2013-05-10 America's health care system has become too complex and costly to continue business as usual Best Care at Lower Cost explains that inefficiencies an overwhelming amount of data and other economic and quality barriers hinder progress in improving health and threaten the nation's economic stability and global competitiveness According to this report the knowledge and tools exist to put the health system on the right course to achieve continuous improvement and better quality care at a lower cost The costs of the system's current inefficiency underscore the urgent need for a systemwide transformation About 30 percent of health spending in 2009 roughly 750 billion was wasted on unnecessary services excessive administrative costs fraud and other problems Moreover inefficiencies cause needless suffering By one estimate roughly 75 000 deaths might have been averted in 2005 if every state had delivered care at the quality level of the best performing state This report states that the way health care providers currently train practice and learn new information cannot keep pace with the flood of research discoveries and technological advances About 75 million Americans have more than one chronic condition requiring

coordination among multiple specialists and therapies which can increase the potential for miscommunication misdiagnosis potentially conflicting interventions and dangerous drug interactions Best Care at Lower Cost emphasizes that a better use of data is a critical element of a continuously improving health system such as mobile technologies and electronic health records that offer significant potential to capture and share health data better In order for this to occur the National Coordinator for Health Information Technology IT developers and standard setting organizations should ensure that these systems are robust and interoperable Clinicians and care organizations should fully adopt these technologies and patients should be encouraged to use tools such as personal health information portals to actively engage in their care This book is a call to action that will guide health care providers administrators caregivers policy makers health professionals federal state and local government agencies private and public health organizations and educational institutions **Toward a 21st**
