Sharing The Kingdom Animals And Their Rights

John Lord Peck

Sharing The Kingdom Animals And Their Rights:

Sharing the Kingdom Karen O'Connor, 1984 Examines the issue of animal rights discussing the use of animals in laboratory experiments factory farms and in entertainment

For the Prevention of Cruelty Diane L. Beers, 2006-05-25 Animal rights Those two words conjure diverse but powerful images and reactions Some nod in agreement while others roll their eyes in contempt Most people fall somewhat uncomfortably in the middle between endorsement and rejection as they struggle with the profound moral philosophical and legal questions provoked by the debate Today thousands of organizations lobby agitate and educate the public on issues concerning the rights and treatment of nonhumans For the Prevention of Cruelty is the first history of organized advocacy on behalf of animals in the United States to appear in nearly a half century Diane Beers demonstrates how the cause has shaped and reshaped itself as it has evolved within the broader social context of the shift from an industrial to a postindustrial society Until now the legacy of the movement in the United States has not been examined Few Americans today perceive either the companionship or the consumption of animals in the same manner as did earlier generations Moreover powerful and lingering bonds connect the seemingly disparate American Society for the Prevention of Cruelty to Animals of the nineteenth century and the People for the Ethical Treatment of Animals of today For the Prevention of Cruelty tells an intriguing and important story that reveals society's often changing relationship with animals through the lens of those who struggled to shepherd the public toward a greater compassion

The Human Animal Earthling Identity Carrie P. Freeman, 2020-12-01 With *The Human Animal Earthling Identity* Carrie P. Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman's analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic

valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share **Animal Emotions** Barrett

Moore,2023-12-22 This book presents the case for legal protection for animals based on humanity s shared interests and destinies with the animal kingdom To underscore the urgent need for legal reform the book documents how animals are in crisis with separate discussions on animals in entertainment research fashion the food industry and animals in our homes as well as issues that impact wildlife and aquatic animals In each of the foregoing areas there is a discussion of major developments for animals across the globe the objective being to demonstrate how the U S is out of step with other major countries in its legal treatment of animals The importance of media as a driver of change is also considered This background culminates to the heart of the book which discusses and analyzes the link between human rights and animal rights with nine

areas explored e.g. loss of biodiversity, environmental destruction, zoonotic diseases, world hunger, violence. Challenges to legal reforms are also explored including issues associated with weak laws, the failure to enforce existing laws and governmental agencies that tend to overlook the actions of industries. Finally, the book explores the development of animal law and the trajectory of current laws with analysis of developing rights of nature laws and legal personhood status for animals.

Recognising and Responding to Animal Emotion in a Shared World Vicki Hutton, 2023-11-16 How is it that depending on the setting the same cat can be perceived as a homeless annoyance, a potential research subject or a thinking and feeling family member? The answer is bound up in our perception of non-human animals' capacity to experience emotions and this book draws on contemporary evidence-based research, observations, interviews and anecdotal case scenarios to explore the growing knowledge base around animal emotion. Acknowledging that animals can experience feelings directly affects the way that they are perceived and treated in many settings and the author explores the implications when humans apply or ignore this knowledge selectively between species and within species. This information is presented within the unique context of a proposed hierarchy of perceived non-human animals' emotional abilities often based on human interpretation of the animal's emotional capacity with examples of how this manifests at an emotional, spiritual and moral level. Implications for specific groups living with, caring for or working with non-human animals are examined, making the book of particular interest to those working, studying or researching in the veterinary professions, animal ethics, law and welfare and zoology, biology and animal science. This book will also be fascinating reading for anyone interested in simply learning more about the animals with whom we share this planet. For some readers it will validate the reciprocal emotional bond they feel for living creatures. For others it will raise questions about the moral treatment of sentient non-human beings, breaking down the human protective barrier of cognitive dissonance and activating a cycle of change.

Comprehensive Book on Environmental Studies Dr. H.S. Bhatia, 2019-08-07 It deals with all essential aspects of Environment especially useful for all undergraduate students. It deals primarily with all aspects of Man and Environment, Ecology and eco systems. In this detail discussion on productivity, Food chain, Food Web, Pyramid numbers and Ecological succession. It also discusses on various aspects of Biodiversity. The book provides information on all aspects of Environmental pollution particularly on kinds of pollution and their remedial measures. Social issues like sustainable and unsustainable development is another aspect particularly related to water conservation, climate change and wasteland reclamation. It also discusses on the issue of enforcement of various legislations like Air pollution control, the water Act etc. Unless a discussion is provided on current topics in Environmental pollution the book will not serve its purpose. Hence all important issues which create pollution have also find a place in discussions. Waterborne diseases are important parts and their particular importance because of primary and secondary pollutants. Disaster Management also finds a prominent part in the book as without such discussion no useful purpose will be served. In addition brief discussion on all legislations have been provided in the appendix I in concise manner. In addition

there are Five more appendixes provided which provide specific questions and answers on various important chapters provided in the book Hope through this reader will be able to understand all aspects of environmental studies in a comprehensive way and shall be able to understand and answer any type of question Salient Features Man and Environment Ecology and Environment Concept and Scope of Environmental Chemistry Ecological Succession Different Types of Pollution Current topics in Environmental Pollution and Disaster Management The Statutes of the United Kingdom of Great Britain and Ireland ,1845

Baret,Nadine Buys,Jutta Roosen,Michèle Tixier-Boichard,Paolo Ajmone Marsan,2016-01-28 The history of livestock started with the domestication of their wild ancestors a restricted number of species allowed to be tamed and entered a symbiotic relationship with humans In exchange for food shelter and protection they provided us with meat eggs hides wool and draught power thus contributing considerably to our economic and cultural development Depending on the species domestication took place in different areas and periods After domestication livestock spread over all inhabited regions of the

earth accompanying human migrations and becoming also trade objects This required an adaptation to different climates and varying styles of husbandry and resulted in an enormous phenotypic diversity Approximately 200 years ago the situation started to change with the rise of the concept of breed Animals were selected for the same visible characteristics and crossing with different phenotypes was reduced This resulted in the formation of different breeds mostly genetically isolated from other populations A few decades ago selection pressure was increased again with intensive production focusing on a limited range of types and a subsequent loss of genetic diversity For short term economic reasons farmers have abandoned traditional breeds As a consequence during the 20th century at least 28% of farm animal breeds became extinct rare or endangered The situation is alarming in developing countries where native breeds adapted to local environments and diseases are being replaced by industrial breeds In the most marginal areas farm animals are considered to be essential for viable land use and in the developing world a major pathway out of poverty Historic documentation from the period before the breed formation is scarce Thus reconstruction of the history of livestock populations depends on archaeological archeozoological and DNA analysis of extant populations Scientific research into genetic diversity takes advantage of the rapid advances in molecular genetics Studies of mitochondrial DNA microsatellite DNA profiling and Y chromosomes have revealed details on the process of domestication on the diversity retained by breeds and on relationships between breeds However we only see a small part of the genetic information and the advent of new technologies is most timely in order to answer many essential questions High throughput single nucleotide polymorphism genotyping is about to be available for all major farm animal species The recent development of sequencing techniques calls for new methods of data management and analysis and for new ideas for the extraction of information To make sense of this information in practical conditions integration of geo environmental and socio economic data are key elements The study and management of farm animal genomic resources FAnGR is indeed a major multidisciplinary issue The goal of the present Research Topic was to collect contributions of high scientific quality relevant to biodiversity management and applying new methods to either new genomic and bioinformatics approaches for characterization of FAnGR to the development of FAnGR conservation methods applied ex situ and in situ to socio economic aspects of FAnGR conservation to transfer of lessons between wildlife and livestock biodiversity conservation and to the contribution of FAnGR to a transition in agriculture FAnGR and agro ecology

Beacham's Guide to Environmental Issues & Sources Walton Beacham, 1993

Animal Rights Harold D. Guither, 1998 In the past decade philosopher Bernard Rollin points out we have witnessed a major revolution in social concern with animal welfare and the moral status of animals Adopting the stance of a moderate Harold Guither attempts to provide an unbiased examination of the paths and goals of the members of the animal rights movement and of its detractors Given the level of confusion suspicion misunderstanding and mistrust between the two sides Guither admits the difficulty in locating much less staying in the middle of the road The philosophical conflict however is fairly clear those who resist reform fearing that radical change in the treatment of animals will infringe on their business and property rights versus the new activists who espouse a different set of moral and ethical obligations toward animals From his position as a moderate Guither presents a brief history of animal protection and the emergence of animal rights describes the scope of the movement and identifies major players such as Paul and Linda McCartney and organizations such as People for the Ethical Treatment of Animals that are actively involved in the movement He concentrates on what is actually happening in the 1990s discussing in detail the possible consequences of the current debate for those who own use or enjoy animals in entertainment and leisure pursuits A reference work for students in animal sciences and veterinary medicine the book also poses questions for philosophers sociologists and public policymakers as well as animal owners animal and biomedical researchers and manufacturers and distributors of animal equipment and supplies

Chimpanzee Rights Kristin Andrews, Gary Comstock, Crozier G.K.D., Sue Donaldson, Andrew Fenton, Tyler John, L. Syd M Johnson, Robert Jones, Will Kymlicka, Letitia Meynell, Nathan Nobis, David Pena-Guzman, Jeff Sebo, 2018-08-30 Since 2013 an organization called the Nonhuman Rights Project has brought before the New York State courts an unusual request asking for habeas corpus hearings to determine whether Kiko and Tommy two captive chimpanzees should be considered legal persons with the fundamental right to bodily liberty While the courts have agreed that chimpanzees share emotional behavioural and cognitive similarities with humans they have denied that chimpanzees are persons on superficial and sometimes conflicting grounds Consequently Kiko and Tommy remain confined as legal things with no rights The major moral and legal question remains unanswered are chimpanzees mere things as the law currently sees them or can they be persons possessing fundamental rights In *Chimpanzee Rights* The Philosophers Brief a group of renowned philosophers considers these questions Carefully and clearly they examine the four lines of reasoning the courts have used to deny chimpanzee personhood species contract community and capacities None of these they argue merits disqualifying chimpanzees from personhood The authors conclude that when judges face the choice between seeing

Kiko and Tommy as things and seeing them as persons the only options under current law they should conclude that Kiko and Tommy are persons who should therefore be protected from unlawful confinement in keeping with the best philosophical standards of rational judgment and ethical standards of justice Chimpanzee Rights The Philosophers Brief an extended version of the amicus brief submitted to the New York Court of Appeals in Kiko s and Tommy s cases goes to the heart of fundamental issues concerning animal rights personhood and the question of human and nonhuman nature It is essential reading for anyone interested in these issues Postcolonial Animalities Suvadip Sinha,Amit Baishya,2019-09-02

Postcolonial Animalities co edited by Suvadip Sinha and Amit R Baishya brings together ten essays to consider the interfaces between human and animal and the concrete presence of animals in postcolonial cultural production This edited collection critiques monohumanist conceptions of the human and considers the co constitutiveness of imaginaries of the human with grammars of animality One of the central contributions of this volume is to decolonize existing conceptualizations of the human animal relationship and to consider the material representation of animals within the realm of colonial and postcolonial cultural production from the perspective of ethical alterity and alternative narratives of anticolonial and postcolonial politics The volume also explores entanglements of race and species in colonial and neocolonial frameworks without transforming such inquiries into a zero sum game that privileges one category over another The essays in the volume focusing on multiple geographical locations ranging from South Asia Southeast Asia post Ottoman Turkey the Caribbean Australia South Africa and Palestine Israel historicizes and understands multispecies interspecies and transspecies encounters affiliations and connections in and through their localized dimensions and studies human animal encounters in their varied and complex affective relationalities Through such inquiries the volume considers how modes of representing animals including located forms of anthropomorphism and zoomorphism help us think with and be with different animals

The Rights of Nature David R. Boyd,17-09-05 An important and timely recipe for hope for humans and all forms of life *Palila v Hawaii* *New Zealand s Te Urewera Act* *Sierra Club v Disney* These legal phrases hardly sound like the makings of a revolution but beyond the headlines portending environmental catastrophes a movement of immense import has been building in courtrooms legislatures and communities across the globe Cultures and laws are transforming to provide a powerful new approach to protecting the planet and the species with whom we share it Lawyers from California to New York are fighting to gain legal rights for chimpanzees and killer whales and lawmakers are ending the era of keeping these intelligent animals in captivity In Hawaii and India judges have recognized that endangered species from birds to lions have the legal right to exist Around the world more and more laws are being passed recognizing that ecosystems rivers forests mountains and more have legally enforceable rights And if nature has rights then humans have responsibilities In *The Rights of Nature* noted environmental lawyer David Boyd tells this remarkable story which is at its heart one of humans as a species finally growing up Read this book and your world view will be altered forever **The Kingdom of the Unselfish** John Lord

Peck,1889 **The Fight for Animal Rights** Jeanne Nagle,2019-07-15 For centuries philosophers scientists and lawmakers worldwide have debated the merits of affording certain rights to animals Central to any discussion of the topic is morality who or what possesses it and how and when it should be bestowed This examination of the animal rights movement covers this and other points of contention as well as the history of the movement and the people at the forefront of lobbying for animal welfare Readers will discover and be inspired by the variety of safe practical methods for getting involved on behalf of those who cannot speak for themselves Animals' Defender and Zoophilist ,1903
