By demonstrating how to work in a very familiar and comfortable teaching context, read aloud to address what may be less familiar and comfortable content, scientific concepts, Valerie and Mark empower teachers to use just about any book in their classroom to help deepen students' understanding of the world. Valerie and Mark supply you with everything you need to know to get to the heart of each concept including a primer, questions, and strategies to spot a concept and ways to prompt students to see and talk about it. Each chapter offers a list of suggested titles, many of which you probably already have to help you get started right away as well as topic spotlight sections that help you connect the concepts to familiar topics such as eating, seasons, bridges, size, and water.
