Do Know How James T. Riordan,2014-09-24 An insider with practical experience in development work reveals how understanding market realities can more effectively reduce poverty This book by a practitioner not an academic government official or pundit has been written for practitioners and offers fresh thinking on how to do international development work It combines that thinking with practical guidance in plain English on what to do and perhaps just as importantly what not to do on the ground We Do Know How takes buzzwords commonly used in development circles demand driven results oriented accountability and others and makes them real spelling out a proven approach for expanding business sales and generating jobs for poor people Although government has a role to play in development in the end the actions of businesses drive economic growth and expand people s incomes We Do Know How shows how to build on the incentives that drive businesses and in the process create jobs for the poor Specifically it urges development practitioners to support only those business opportunities for which there is market demand abiding by the maxim produce what you can sell not sell what you produce More than that it cautions practitioners not to become solutions looking for problems but to search creatively for ways to solve the specific problems that stand most in the way of clients meeting buyers requirements We Do Know How challenges much conventional wisdom on how to do development work At the same time and in contrast to other books on development it shows how by maintaining focus and discipline development practitioners can deliver demonstrable increases in jobs for those who need them **Development Co-operation Report 2005 Efforts and Policies of the Members of the**

insightful analysis of the current situation pertaining on the continent Several African scholars coming from different regions and academic backgrounds are elaborating ideas and arguments in order to explain the constraints and to illustrate the opportunities The result of that scientific gathering is a book that synthesizes and renews the reflections on development What is at stake is not to be pessimistic or optimistic about Africa The epistemological challenge is to understand what is going on By focusing on converging and diverging African realities on the issues of state civil society gender and development strategies the authors of the book show under which conditions the African hour is coming At that level the commitment for political science meets the commitment for Africa The main success of this book is to overcome the preconceived ideas and self fulfilling prophecies about Africa Here the analysis avoids the trap of indulgence then hope is based on truth Consequently the coming African hour is not inescapable it is as analyzed a possibility that its achievement depends on institutional human political social and economic factors *European External Action* Veit

The Oxford Handbook of Professional Economic Ethics George F. DeMartino, Deirdre N. McCloskey, 2016-01-04 For over a century the economics profession has extended its reach to encompass policy formation and institutional design while largely ignoring the ethical challenges that attend the profession's influence over the lives of others Economists have proven to be disinterested in ethics Embracing emotivism they often treat ethics a matter of mere preference Moreover economists tend to be hostile to professional economic ethics which they incorrectly equate with a code of conduct that would be at best ineffectual and at worst disruptive to good economic practice But good ethical reasoning is not reducible to mere tastes and professional ethics is not reducible to a code Instead professional economic ethics refers to a new field of investigation a tradition of sustained and lively inquiry into the irrepressible ethical entailments of academic and applied economic practice The Oxford Handbook of Professional Economic Ethics explores a wide range of questions related to the nature of ethical economic practice and the content of professional economic ethics It explores current thinking that has emerged in these areas while widening substantially the terrain of economic ethics There has never been a volume that poses so directly and intensively the question of the need for and content of professional ethics for economics The Handbook incorporates the work of leading scholars and practitioners including academic economists from various theoretical traditions applied economists beyond academia whose work has direct and immense social impact and philosophers professional ethicists and others whose work has addressed the nature of professionalism and its implications for ethical practice

Change a Life, Change your Own Peter Ove, 2018-06-11T00:00:00Z Change a Life Change Your Own is a long overdue adult discussion about how child sponsorship a spectacularly successful fundraising tool infantilizes both donor and recipient turning good intentions into paternalism and reinforcing stereotypical Western ideas about helplessness and hopelessness in developing countries Ian Smillie author of The Charity of Nations Freedom from Want and Diamonds Change a Life Change Your Own For less than a dollar a day For the cost of one coffee a day With these slogans and their accompanying images of poor children some of the world's largest development organizations invite the global North to engage in one of their most prominent and successful fundraising techniques child sponsorship But as Peter Ove argues in Change a Life Change Your Own child sponsorship is successful not because it addresses the needs of poor children but because it helps position what it means to live ethically in an unequal and unjust world In this way child sponsorship is seen as more than an effective marketing tool it is a powerful mechanism for spreading particular ideas about the global South the global North and the relationship between the two Through sponsorship the desire to raise money secure appropriate childhoods and become better people ends up taking priority over the goal of living together well on a global scale Drawing on in depth interviews with child sponsors and sponsorship staff Change a Life Change Your Own explores the contexts in which sponsorship promotional material is produced interpreted

and acted upon This is not an expos on the use of sponsorship dollars or high administrative costs it is a clearly written and compelling account of how the problem of development is constructed such that child sponsorship is seen to be a rational and ethical solution

The Administration of International Organizations Michael D.V. Davies,2017-07-05 Drawing on his extensive practical experience as an international civil servant in a number of organizations Davies writes in a lively and readable manner about all aspects of administrative policy and its related implications Divided into two parts the first Top down will enable policy makers in government academia and elsewhere who have an interest in the proper governance and management of international institutions to gain fresh insight into the topic The second part Bottom up provides a substantial body of knowledge of administrations including case studies of best and worse practice The book includes analysis of The UN system International Financial Institutions Co ordinated Organizations Regional European Institutions The Consultative Group for International Agricultural Research This is a work that fills a well defined gap in organizational knowledge in a rigorous but accessible way It is essential reading for both practitioners and academics involved with international organizations
