Music and Silence Michael Field, 2000

The Music of Silence Andrea Bocelli, 2000-01-01 In this honest and engaging memoir translated from the Italian Bocelli talks as never before about his blindness his early life the importance of his family stage fright and the pressures of international stardom Andrea Bocelli cannot remember a time when he was not passionate about music Born among the vineyards and olive groves of Tuscany Bocelli was only a few months old when his beautiful blue eyes began to fail due to glaucoma He suffered much and it was difficult to calm him his mother Edi explains It was the music filtering into his room that would soothe the unsettled child She says It seemed to be the reason for Andrea s tranquillity I was happy because I had discovered something that gave him some relief from his pain Bocelli s parents nurtured and encouraged his love of music His passion for opera was also apparent and he participated in local talent contests and won several prizes At the age of twelve however Bocelli was completely blinded during a soccer game Undeterred he continued to sing learning to read special Braille sheets and musical scores It was only after he earned his law degree that he was inspired to attempt to join the ranks of the great tenors Bocelli s persistence and devotion paid off during

an audition in 1992 when he stunned Pavarotti with the seemingly effortless way he captured the essence of the song Miserere It was this performance that fueled Bocelli's rise from piano bar performer to the phenomenal international success we all adore today No fan of classical music can afford to be without the engaging and humble memoir of this fascinating triumphant star Historical Dictionary of Modern and Contemporary Classical Music Nicole V. out with Technology Simon Emmerson,2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available

though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music The Performance of Listening in Postcolonial Francophone Culture Jennifer Solheim, 2018-01-23 In considering cultural works from French speaking North Africa and the Middle East all published or released in France from 1962 2011 Solheim s study of listening across cultural genres will be of interest to any scholar curious about contemporary postcolonial France
