Iain Docherty, Jon Shaw, 2011-07-20 Comprising contributions from a range of experts this volume offers a critical commentary on the government's sustainable transport policy A critical commentary on the Blair government's sustainable transport policy and its implementation Firmly rooted in an appreciation of the politics of this controversial field Experts contribute up to the minute analyses of the key issues Will inform debate over the future of transport policy Includes a Foreword by David Begg Chair of the Commission for Integrated Transport **Transport Policy and Planning in Great Britain** Peter Headicar, 2009-04-08 A critical overview of the nature evolution and contemporary challenges of transport policy and planning at the national and local scale while expanding on procedural mechanisms and forging much needed links with the related discipline of spatial planning *Spatial Planning, Urban Form and Sustainable Transport* Katie Williams, 2017-03-02 The ways in which we travel have a huge impact on sustainability This book addresses the relationship between travel patterns and the physical form of cities and considers the role of spatial planning in that relationship Three sections present empirical research and commentaries from leading academics and practitioners from Europe the USA Australia and Japan The first section considers the impact of urban form in combination with factors such as lifestyles and socio demographic change on sustainable transport The second addresses the impact of different elements of urban form such as density configuration and mix of uses on mobility The final section focuses on issues surrounding the implementation of spatial planning policies to support sustainable travel The book will be of interest to practitioners academics and students in the fields of planning transport and geography Traffic jam Iain Docherty, Jon Shaw, 2008-10-27 This informed and lively book offers a timely analysis of the UK government's sustainable or subsequently integrated transport policy 10 years after the publication of *A New Deal for Transport Better for Everyone* Written by prominent transport experts and with a foreword by Christian Wolmar the book identifies the modest successes and sadly the far more significant failures in government policy over the last decade The authors also uncover why it has proved so difficult to adopt a more sustainable approach to transport and break Britain's love affair with the car The book reviews the links between the idea of sustainability and transport policy and provides an up to the minute analysis of the political realities surrounding the delivery of a sustainable transport agenda in the UK It picks up on the principal components of *A New Deal for Transport* and evaluates to what extent these have or haven't been delivered in England Scotland Wales and Northern Ireland The contributors analyse why delivering sustainable transport policies seems to present particular difficulties to ministers across the UK and considers the UK's experience in an international perspective The book draws lessons from the last 10 years in order to better inform future policy development *Traffic Jam* is an indispensable analysis of the difficulties involved in turning policy ideals into practical reality and as such will be of interest to scholars students planners policy analysts and policy makers **Sustainable Transportation** Henrik Gudmundsson, Ralph P. Hall, Greg Marsden, Josias Zietsman, 2015-07-03

This textbook provides an introduction to the concept of sustainability in the context of transportation planning management and decision making. The book is divided into two parts. In the first part, indicators and frameworks for measuring sustainable development in the transportation sector are developed. In the second, the authors analyze actual planning and decision making in transportation agencies in a variety of governance settings. This analysis of real world case studies demonstrates the benefits and limitations of current approaches to sustainable development in transportation. The book concludes with a discussion on how to make sustainability count in transportation decision making and practice.

Territory, Identity and Spatial Planning Mark Tewdwr-Jones, Philip Allmendinger, 2006-09-27. This book provides a multi disciplinary study of territory identity and space in a devolved UK through the lens of spatial planning. It draws together leading internationally renowned researchers from a variety of disciplines to address the implications of devolution upon spatial planning and the rescaling of UK politics. Each contributor offers a different perspective on the core issues in planning today in the context of New Labour's regional project particularly the government's concern with business competitiveness and key themes are illustrated with important case studies throughout.

Elements of Sustainable Architecture Rosa Urbano Gutiérrez, Laura de la Plaza Hidalgo, 2019-12-06. For sustainable architecture to become a reality the way we design buildings needs to change. Many architects are concerned that sustainable technologies may interfere with a building's aesthetic appearance and so these are often added on once the design process is complete. Elements of Sustainable Architecture solves this dilemma by helping students to develop the design skills they need to create sustainable buildings ensuring that ecological considerations are applied throughout the design process. Restoring the primacy of aesthetics and creativity to sustainable design, the book focuses on strategies that have the greatest impact on building design. It also shows the influence of sustainability considerations on choices about aspects such as composition, form, space, tectonics, materials, colour, textures, proportion and position. Specifically designed to offer a new way of understanding architecture, the book introduces students to the basic principles and methods of sustainable design, features current examples and inspiring case studies to support learning, step by step presents information in a visually appealing, intuitive, easy to understand way, includes over 500 high quality colour diagrams, drawings, sketches and photographs. A clear visual introduction to creating aesthetically beautiful and sustainable buildings, this is essential reading for students in sustainable architecture courses.

Aviation and Tourism Anne Graham, Andreas Papatheodorou, Peter Forsyth, 2016-04-08. Transport is an essential element of tourism providing the vital link between the tourist generating areas and destinations. Good accessibility which is determined by the transport services provided is a fundamental condition for the development of any tourist destination. Moreover, the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated. Aviation is an increasingly important mode of transport for tourism markets. Whilst geography has meant that in modern times air travel has always been the dominant mode for long distance travel and much international tourism moves towards deregulation and in

particular the emergence of the low cost carrier sector have also increased aviation's significance for short and medium haul tourism trips. Thus developments in aviation can have very major implications for many leisure and business tourism markets. However the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained. In spite of the obvious closeness between the aviation and tourism industries there are very few specialist texts on this subject. Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed whereas aviation specialist texts rarely concentrate on just leisure travel. In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies. Therefore it is the aim of this book to fill this important gap which exists with a comprehensive in depth study of the relationship between aviation and leisure travel. The book deals exclusively with issues related to the relationship between aviation and leisure travel. It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries. Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined.

The Transport Debate Jon Shaw, Iain Docherty, 2014-01-07 At a time when transport is high on the political agenda and government decision making is being vigorously scrutinised there is a need for an incisive and accessible analysis of the key policy issues. This book is a highly readable introduction to the transport debate from two experts in the field. The authors celebrate the advantages of a modern transport system but argue that years of poorly conceived and executed transport policy have resulted in Britain's transport system being far worse than it should be. They show that a substandard transport system creates economic, social and environmental costs but demonstrate how these can be addressed through affordable and politically deliverable changes. Using a refreshingly novel approach Shaw and Docherty use the familiar idea of the journey as the basis for their discussion. The book follows members of the Smith family as they uncover a wide array of transport issues including why the problems we all encounter as we travel around actually come about, which policy trade offs were responsible for creating them in the first place, what impacts we all have to suffer as a result and what we can do to fix them. This lively and engaging approach will make the book ideal for a wide readership.

The Future of Sustainable Cities John Flint, Mike Raco, 2012 An up to date assessment by prominent scholars of the impacts of recent changes on key areas of urban planning including housing, transport and the environment and core areas for future research.

Diverging Mobilities Danny MacKinnon, Jon Shaw, Iain Docherty, 2008-02-18 This book presents an academic investigation into the impact of devolution on the formulation and delivery of transport policy in the UK. Using interviews with key policy makers, transport providers, business organisations and user groups, this book draws upon concepts and ideas from across the social sciences to inform their analysis.

Integrated Transport Moshe Givoni, David

Banister,2010-07-02 Addressing how the integration of transportation systems could promote more sustainable travel this book covers case studies governmental policy and future travel usage in this comprehensive look at how multimodal travel could become more cohesive Politics and Policy Making in the UK Paul Cairney,Sean Kippin,2023-11-23 Over the past

decade the UK has experienced major policy and policy making change This text examines this shifting political and policy landscape while also highlighting the features of UK politics that have endured Written by Paul Cairney and Sean Kippin leading voices in UK public policy and politics the book combines a focus on policy making theories and concepts with the exploration of key themes and events in UK politics including developing social policy in a post pandemic world governing post Brexit and the centrality of environmental policy The book equips students with a robust and up to date understanding of UK public policy and enables them to locate this within a broader theoretical framework Gridlock John

Sutton,2015-07-16 Cities across the world are facing unprecedented challenges in traffic management and transit congestion while coping with growing populations and mobility aspirations existing policies that aim to tackle congestion and create more sustainable transport futures offer only weak remedies In Gridlock Congested Cities Contested Policies Unsustainable Mobility transport consultant John C Sutton explores how two competing discourses in transport policy and planning practice convivial and competitive ideologies lead to contradictory solutions and a gridlock in policy as well as on transport systems Gridlock examines current transport and mobility in a geographical social political economy and technological context The challenges of rising congestion are highlighted through case studies from the UK the USA and OECD countries Sutton offers readers a vision of a sustainable mobility future through the concept of mobility management combining mobile communication and information technology with logistics to match travel demand to the capacity of transport systems Essential reading for transport professionals and students of transportation planning and policy Gridlock offers a unique manifesto for sustainable mobility settlement addressing the pressing problems of growing populations and congestion while looking ahead to a more sustainable future Bidding for Development Ngiste Abebe,Mary Trina Bolton,Maggie

Pavelka,Morgan Pierstorff,2013-11-19 In 2012 over four billion people tuned in to watch the London Summer Olympics As the single largest mega event in the world the Olympics has the power to captivate the global imagination Long before athletes vie for a gold medal however competition between cities eager to host the Games kicks off with a rigorous bid process The lengthy and expensive endeavor to host the Olympics is as high stakes as any sporting event Rather than encouraging cities to refrain from bidding Bidding for Development takes a policy approach that challenges stakeholders to bid responsibly and strategically in pursuit of concrete outcomes Every bid city has the potential to accelerate long term transportation development through a strategic and robust planning process This book concentrates on the phenomenon of repeat Olympic bids and the opportunities that may come from bidding particularly for those cities that never win the Games In this context Bidding for Development explores the intersection between transportation infrastructure development the

Olympic bid process and the resulting legacies experienced by bid losers The findings address the central question how can participating in the Olympic bid process accelerate transportation development regardless of the bid result In response this book presents a Bid Framework outlining how and when cities may use the bid to unite resources align transportation priorities and empower leaders to achieve urban development objectives in preparation for the Olympic bid The Bid Framework is then applied to two case studies Manchester and Istanbul to examine each bid loser s effectiveness in using the bid process to catalyze transportation development Concurrently the book takes into consideration how the International Olympic Committee s evolving bid regulations and requirements relate to urban development and positive social legacy Bidding for Development delivers actionable recommendations for all Olympic stakeholders to improve the value of the bid process and transportation benefits beyond the Games

Car Troubles Jim Conley,2016-04-15 Car Troubles central premise is that the car as the dominant mode of travel needs to be problematized It examines a wide range of issues that are central to automobility by situating it within social economic and political contexts and by combining social theory specific case studies and policy oriented analysis With an international team of contributors the book provides a coherent and comprehensive analysis of the global phenomenon of automobility from the Anglo world to the cases in China and Chile and all the elements that relate to it

Sustainable Transport for Chinese Cities Roger L. Mackett,Anthony D. May,Masanobu Kii,Haixiao Pan,2013-01-16 Based on papers presented at a workshop on the green transport agenda and its implications for Chinese cities organised by the World Conference on Transport Research Society in September 2010 this volume reviews the challenges facing urban transport internationally and in China

Planning, Public Policy and Property Markets David Adams,Craig Watkins,Michael White,2008-04-15 The focus of this book is on how public policy and especially the planning system both shapes and reflects the essential characteristics of land and property markets It challenges the common misconceptions that property markets operate in isolation from public policy and that planning permission is the only significant form of state intervention in the market Planning Public Policy Property Markets contends that effective state market relations in land and property are critical to a prosperous economy and a robust democracy especially at a time when development aims to be sustainable and environmental protection needs to be matched by urban and rural regeneration The book thus reflects an increased realisation among academics and practitioners of the importance of theoretical integration and joined up policy making Its rounded perspective addresses a significant weakness in the academic literature and will encourage broader debate and a more pluralist agenda for property research Prominent contributors present important new research on different market sectors and policy arenas including regeneration and renewal housing growth housing planning transport and economic competitiveness while the editors specifically draw out more general lessons on the dynamic nature of the state property market relationship in a modern economy This book will encourage all those involved in property research who strive for theoretical and practical connectivity to demonstrate that

just as property market operations cannot be analysed without understanding state processes policy decisions cannot be taken without an appreciation of how the market operates *Safe Mobility* Dominique Lord, Simon Washington, 2018-04-18 This book increases the level of knowledge on road safety contexts issues and challenges shares what can currently be done to address the variety of issues and points to what needs to be done to make further gains in road safety **Transport Matters** Docherty, Iain, Shaw, Jon, 2019-10-16 This book shows that transport matters Comprising a series of highly accessible chapters written by respected experts it reviews key transport issues and explains how and why effective and efficient transport is fundamental to successfully addressing all manner of public policy goals Contributors explore how we do transport as a result of the technologies available to us and the cultures surrounding how we use them and examine how this has significant social economic and environmental consequences They also provide key recommendations for how we could do things differently to bring about a happier healthier and more economically secure future for all of us
