Perception Selected Readings In Science And Phenomenology:

Perception: Selected Readings in Science and Phenomenology Paul Tibbetts, 1969 **Speaking and Semiology**, 1991
No detailed description available for Speaking and Semiology *Speaking and Semiology* Richard L. Lanigan, 2013-02-06 No detailed description available for Speaking and Semiology **The World of the Imagination** Eva T. H. Brann, 2016-11-28
In this book Eva Brann sets out no less a task than to assess the meaning of imagination in its multifarious expressions throughout western history The result is one of those rare achievements that will make *The World of the Imagination* a standard reference *Edmund Husserl: The web of meaning : language, noema, and subjectivity and intersubjectivity* Rudolf Bernet, Donn Welton, Gina Zavota, 2005 This collection makes available in one place the very best essays on the founding father of phenomenology reprinting key writings on Husserl's thought from the past seventy years It draws together a range of writings many otherwise inaccessible that have been recognized as seminal contributions not only to an understanding of this great philosopher but also to the development of his phenomenology The four volumes are arranged as follows Volume I Classic essays from Husserl's assistants students and earlier interlocutors Including a selection of papers from such figures as Heidegger Merleau Ponty Sartre Ricoeur and Levinas Volume II Classic commentaries on Husserl's published works Covering the Logical Investigations Ideas I Phenomenology of Internal Time Consciousness and Formal and Transcendental Logic Volumes III and IV Papers concentrating on particular aspects of Husserl's theory including Husserl's account of mathematics and logic his theory of science the nature of phenomenological reduction his account of perception and language the theory of space and time his phenomenology of imagination and empathy the concept of the life world and his epistemology *Edmund Husserl Bibliography* Steven Spileers, 2013-03-09 This bibliography contains the publications of Husserl and the main secondary literature on Husserl from Husserl's earliest publication 1887 till today 1997 As the collection of material was concluded in June 1997 the list of publications for the year 1997 is of course incomplete In this bibliography publications in the following languages have been included German English French Italian Spanish Portuguese and Dutch for both primary and secondary literature Since this bibliography has been based primarily on the consultation of the included documents and not restricted to copying already existing bibliographies it was not possible to include publications in languages other than those mentioned The bibliography has been constructed in the following way 1 The list of Husserl's works and secondary literature by individual authors is preceded by a list of all edited volumes in which a text by or on Husserl is published This list is ordered chronologically and runs from 1921 till 1997 inclusive Edited volumes of the same year are classified according to language and this in the order mentioned above German English French etc Edited volumes with a title in more than one language are classified according to the above order of languages this of course concerns only the title of the edited volume not the titles of the individual contributions This order is maintained throughout the other parts of the bibliography **Handbook of the Sharing Economy** Russell W. Belk, Giana M. Eckhardt, Fleura

Bardhi, With the radical growth in the ubiquity of digital platforms the sharing economy is here to stay This Handbook explores the nature and direction of the sharing economy interrogating its key dynamics and evolution over the past decade and critiquing its effect on society

Goethe and the Sciences: A Reappraisal F.R. Amrine, Francis J. Zucker, H. Wheeler, 2012-12-06 of him in like measure within myself that is my highest wish This noble individual was not conscious of the fact that at that very moment the divine within him and the divine of the universe were most intimately united So for Goethe the resonance with a natural rationality seems part of the genius of modern science Einstein's cosmic religion which reflects Spinoza also echoes Goethe's remark Ibid Item 575 from 1829 Man must cling to the belief that the incomprehensible is comprehensible Else he would give up investigating But how far will Goethe share the devotion of these cosmic rationalists to the beautiful harmonies of mathematics so distant from any pure and direct observation Kepler Spinoza Einstein need not and would not rest with discovery of a pattern within behind as a source of the phenomenal world and they would not let even the most profound of descriptive generalities satisfy scientific curiosity For his part Goethe sought fundamental archetypes as in his intuition of a Urpflanze basic to all plants infinitely plastic When such would be found Goethe would be content for as he said to Eckermann Feb 18 1829 to seek something behind the Urphänomenon is futile Here is the limit But as a rule men are not satisfied to behold an Urphänomenon They think there must be something beyond They are like children who having looked into a mirror turn it around to see what is on the other side

Foundations of Meaning John Likides, 2013-04-29 In MARGINS OF PHILOSOPHY while discussing the challenge before phenomenology Jacques Derrida speaks of the ground of signification and the pedestal of silence but his two very apt phrases also apply to the ENTIRE human project of understanding ourselves and the multiverse the aim of THIS book In other words FOUNDATIONS OF MEANING expresses the ENTIRE range of human experience in the multiverse dream speak stream of consciousness dialog storytelling analysis synthesis meditation music and so on synergized into a polyphony that resonates in frequencies that no one mode from science to mysticism can attain alone because all such modes reject one another and thus limit their effectiveness In other words as inclusive and multicultural societies are the most advanced and best prepared for the future so FOUNDATIONS OF MEANING heals the rifts separating the many human disciplines synergizes the many human modes of expression focuses our aims as a civilization whose inner ANGELS have been at war with our inner DEMONS and shows how guarded optimism and free thought can empower humanity to mature and spread across this galaxy and then on to others ad infinitum

Shrinking History David E. Stannard, 1982 A study of the burgeoning field of psychohistory from Freud its primogenitor to its present day academic practitioners this work argues that little if any psychohistory is good history The author systematically points out the pitfalls sheer irrationality and ultimately ahistorical nature of this mode of historical inquiry
