Remaking The Hexagon The New France In The New Europe:

Remaking The Hexagon Gregory Flynn, Yves Meny, 2019-07-09 In this volume distinguished French and U S historians economists and political scientists explore the dimensions of France s current crisis of identity Although every European nation has been adjusting to the dramatic transformations on the continent since the end of the Cold War France s struggle to adapt has been particularly difficult Responding to a mix of external and internal pressures the nation is now questioning many basic assumptions about how France should be governed what the objectives of national policies should be and ultimately what it means to be French Rather than focusing explicitly on the problem of identity the contributors offer differing perspectives on the issues at the heart of the country s debate about its future They begin by examining how France s historical legacy has influenced the way the nation confronts contemporary problems giving special attention to the manner in which past traumatic experiences socioeconomic and cultural traditions and the belief in French exceptionalism have shaped current political thinking They then consider how favoring a more open approach to trade and building a strong franc have changed the culture of economic policy and created dilemmas for the rule of the state as a guarantor of welfare They go on to explore changes in elite structures the evolution of the party system and the spillover of new political conditions that are driving France s efforts to establish a strong national identity in the area of trade Finally the contributors examine the central influence of the changing international framework on France s self definition on its security policies its relationship to the European Union and its basic perceptions of the state and sovereignty They also consider how the answers to these questions are affecting France s relationships with the outside world and the overriding policy dilemmas faced by all the European nations

Evolution and Devolution Tom Lansford, 2019-07-18 This title was first published in 2000 This study bridges the gap in the otherwise rich literature on European security through its analysis of past and present efforts at military integration Previous works have concentrated on the transatlantic relationship or the intra European dimension of the effort to create autonomous defense capabilities or even on the ramifications of the changed defense market Evolution and Devolution combines these themes and subjects The work integrates these topics against the backdrop of the current scholarly debate over international relations by examining the changing nature of sovereignty and the evolution of the nation state In the end the course toward more integration and yet continued participation of the U S is shown to be the optimum course for EU member states in light of the security threats and constraints facing national governments

The Great Debt Transformation G. Fuller, 2016-04-08 Global financial markets have transformed over the past three decades with potentially dangerous results Growing competitiveness in financial markets has forced banks to adapt by merging growing and innovating The result has been an unprecedented transformation in the identity of society's borrowers households and banks are borrowing more businesses are borrowing relatively less This Great Debt Transformation has profound consequences as we shift toward economic growth fueled by consumption and financial investment instability indebtedness and inequality have all risen This book explains this transformation why it matters what caused it and most importantly examines how some countries have restrained the transformation underway Britain France and Germany have taken very different approaches to this transformation and those approaches have resulted in divergent results This book aims to turn those different results into lessons to help us make sense of the great economic challenges of our time

French Politics Today David Scott Bell, 2002 Brings together the varied artistic critical and cultural productions by women scholars critics and artists between 1790 1900 many of whom are little known in the canonical histories of the period Questions the concepts of scholarship criticism and artist across the different disciplines Women discussed include authors Mary Wollstonecraft Shelley Sydney Morgan and Anna Jameson actresses Elizabeth Siddons Dorothy Jordan and Mary Robinson critics Margaret Oliphant and Mary Cowden Clarke

historians Agnes Strickland Lucy Aikin Mary Anne Everett Green Elizabeth Cooper and Lucy Toulmin Smith as well as the writers and readers of Women's magazines educationalists and translators Makes a significant and original contribution to the development of gender studies by extending the frontiers of existing knowledge and research **Tamed Power** Peter J. Katzenstein, 2018-09-05 Revolutionary changes in global and European politics have reawakened old fears that Europe will be dominated by an unpredictable German giant The same changes have fueled new hopes for Germany and Europe as models of political pluralism in a peaceful and prosperous world In fact Peter J Katzenstein explains the current reality is too complex to fit either expectation Katzenstein contends that a multilateral institutionalization of power is the most distinctive aspect of the relationship between Europe and Germany Only the observer who is aware of this important fact can understand why Germany is willing to give up its new sovereign power Although Germany is larger than any other member of the European Union and plays a crucial role in the economic and political life of Eastern Europe its power is now funneled through the institutions of the European Union rather than erupting in a narrow power defined sense of national self interest The empirical chapters of this book explore the institutionalization of power relations between the European Union and Germany as well as the relations of Germany and the European Union with most of the smaller European states **France at the dawn of the twenty-first century, trends and transformations** Marie-Christine W. Koop, Marie-Christine Weidmann-Koop, Rosalie Vermette, 2000 This volume presents an overview of major cultural themes in contemporary France The section on politics deals with the issue of political cohabitation the evolution of the Communist Party the environment social systems and the European Union In the social arena the articles encompass the evolution of the family benefits for the elderly the education system and the social implications of graffiti The changing nature of French identity is brought to light through an analysis of the press and the debate on multiculturalism A review of cultural issues includes the notion of leisure the contemporary social novel the cosmopolitan tradition in French film and new cultural spaces The work concludes with perceptions of France from the United States as seen through diplomatic relations and remakes of French films and a final essay on France The various articles include numerous bibliographic references and will be of great interest to Francophiles academics and students of French language and culture National Government Narratives of the EU Hussein Kassim, Adriaan Schout, 2025-02-26 This book examines and compares government narratives of the EU It thereby addresses a topical issue of major political importance Bringing together leading specialists from across Europe it takes a first step in filling a gap in the scholarly literature where attention has focused mainly on narrative making at the EU level or societal understandings of Europe At a time when crises the rise of Eurosceptic populism and the UK's departure have revealed significant differences in how states view the purpose of the European Union and the significance and value of EU membership it asks How do governments explain and justify their relationship with the EU How do these narratives change over time What do these visions imply for the EU's future The National Co-ordination of EU Policy Hussein Kassim, Guy

Peters, Vincent Wright, 2000-08-03 This book is one of two volumes in which leading scholars examine the way in which EU member states coordinate their European policies. Eschewing the Europeanisation problematic within which the issue is usually addressed, this book adopts a broader more inclusive approach. It examines domestic processes and investigates coordination in ten member states: Austria, Belgium, Denmark, France, Germany, Greece, Italy, Portugal, Spain, and the United Kingdom, looking at coordinating ambitions, the actors involved in EU policy making, and the structures and processes by which policy is made. From a comparative perspective, the book identifies and assesses the impact of the influences that have shaped systems of national coordination, the demands exerted by Union membership, the institutional structure of the national polity, the pre-existing balance between domestic institutions, administrative norms and values, and attitudes both popular and elite, the European integration. It assesses the extent to which there has been a convergent response to the administrative challenges posed by membership on the part of the member states or whether a pattern of divergence emerges. The effectiveness of member states in influencing policy outcomes at the European level is also addressed. The companion volume answers similar questions about national administrations in Brussels. Looking at twelve member states, it is the first systematic examination of the role played by Permanent Representations in national EU policy making. **Economic**

Management and French Business M. Maclean, 2002-10-02 How is it that the modest pace of change which typified the French economy a century ago gave way after 1945 to a new revived capitalism and a superior economic performance? Maclean traces the development of French economic and business life in the context of the European and international economy over the past fifty years. She examines the main economic trends and events from nationalization to privatization, from war with Germany to reconciliation and ever greater union, from the franc to the euro, and from national champions to mega mergers with foreign companies. Maclean argues that the new French capitalism of the twenty-first century is the product of an ideological struggle in which the forces of modernization triumphed over the old guard of French nationalism.

Democracy, social resources and political power in the European Union Niilo Kauppi, 2018-02-28 In this book Kauppi develops a structural constructivist theory of the European Union and critically analyses through French and Finnish empirical cases the political practices that maintain the Union's democratic deficit. Kauppi conceptualises the European Union as both an arena for political contention and a nascent political order. In this evolving multi-levelled European political field, individuals and groups construct material and symbolic structures of political power grounded in a variety of social resources such as nationality, culture, and gender. The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy. Supranational executive networks have become more autonomous, reinforcing the dominance of the resources they control. At the same time, national political cultures condition the political status of elected institutions such as the European parliament. The book is particularly suited for undergraduate and graduate students in the fields of European Politics, European Union Studies, and International

Relations **Large Firms and Institutional Change** Bob Hancké, 2002 Between 1980 and 1985 the French economy and industry faced a dramatic crisis in the ten years that followed it witnessed a remarkable revival How did the French economy make this transition While the state is still an important economic agent in France and the market certainly has become more central in the organization of the French economy both state and market centered perspectives fail to understand critical elements of this adjustment Building on the new Varieties of Capitalism approach in political economy which puts firms at the center of the analysis this book argues that the post war state led system changed into a system organized by and around the large firms Large firms have always been central in the French post war economic development model In the past however they adapted to patterns set by the central state By exploiting the possibilities in government policies in different areas such as finance labour relations and regional policies the large firms were able to induce their main interlocutors the state banks labour unions workers and small firms to adjust in a way which was congruent with their own interests From subservient economic agents they became the drivers of economic adjustment Through this case study of readjustment in France this book offers a subtle critique of neo institutionalist perspectives on firms Institutional frameworks do not simply offer scenarios for adjustment but are themselves constructions of economic and political actors and therefore subject to change and reorganization By analysing how large firms in France arguably one of the least likely places to harbour such endogenous capacities changed their institutional environment to fit their own needs this book offers an important new perspective on the political economy of industrial and economic change States of Disorder Dan Halvorson, 2016-04-01 There have always been weak or fragile states in the modern era or poorly governed and disorderly political communities in earlier times Yet the idea of state failure has only acquired such prominence in the post Cold War period Why would many countries in the less developed world be considered failed states after 1990 but not in 1965 when there is little meaningful difference in their observable empirical conditions What counts as state failure is ultimately a subjective political judgement made by the great powers of the day This judgement is based on the sensitivity of great powers to particular types of disorder generated from the periphery in different historical periods This book is a comparative history of the conditions under which great powers care enough about disorder from the periphery to mount costly armed interventions to reverse what they deem to be state failure **De Gaulle's Legacy** W. Nester, 2014-12-16 This book explores the following What is the art of power What is the art of French power How did Charles de Gaulle understand and assert power establishing the Fifth Republic and breaking centuries of political instability How well or poorly have his successors wielded the art of French power to define defend or enhance French interests **Questioning Geopolitics** Georgi M. Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization The authors reject the notion that globalization is an analytically useful term Rather this volume shows globalization as merely the framework of the current political debate on the future of world power Some of the many other novel ideas advanced by the authors include the

explicit prediction that East Asia is not going to become the center of the world the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973 and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations The articles in the volume are organized around three main themes Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations Part Two further develops the debate among a number of eminent historians and sociologists challenging both the apologists for and the opponents of globalization in new and unexpected ways Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old new transborder formations

The French Exception Emmanuel Godin, Tony Chafer, 2006-01-01 The notion of French exceptionalism is deeply embedded in the nation's self image and in a range of political and academic discourses Recently the debate about whether France really is exceptional has acquired a critical edge Against the background of introspection about the nature of national identity some proclaim normalisation and the end of French exceptionalism while others point out to the continuing evidence that France remains distinctive at a number of levels from popular culture to public policy This book explores the notion of French exceptionalism places it in its European context examines its history and evaluate its continuing relevance in a range of fields from politics and public policy to popular culture and sport

Germany, Europe and the Persistence of Nations Stephen Wood, 2018-12-20 Published in 1998 this book is an articulate and densely documented account of political cultural and historical forces and tensions involved in contemporary European integration most especially concerning Germany In doing so it provides an effective fusion of a vast array of material from what are normally separate disciplines The book investigates contemporary resonances of identifications and conceptions of political boundaries that appeared in Europe in the late eighteenth and nineteenth century It argues that within a supranationalising Europe national identity and nationalism have not disappeared as cultural and political phenomena Rather they persist and manifest themselves in variable forms at popular and elite levels This is the basis for Europe's condition of far from completed unity at the centre of which is now a reunited Germany more sure of itself but less sure of the world around it
