There Is No App for Happiness Max Strom,2016-01-19 The revolutionary book on discovering your happiest self now in paperback Technology has expanded at such a rate that nearly every aspect of our world has been affected yet there has

been no corresponding expansion of personal happiness. Instead we find that the wealthiest societies of the world have become depressed, anxious, sleep deprived and overmedicated. Max Strom, author of *A Life Worth Breathing* and global teacher of personal transformation, reveals that we each have internal human technology capable of empowering our lives and leading us to deeper levels of happiness. In his new book *There Is No App for Happiness*, Strom illustrates three imperatives to take back control of our lives: Imperative One: Self-study. Overcoming our negative presets. Imperative Two: Live as if your time and your lifespan were the same thing. Imperative Three: Learn a daily regimen that heals and empowers you and practice it one hour a day. Learn that joy and fulfillment require us to be active participants and that we should not strive for a virtual life but a life truly lived. *There Is No App for Happiness* will propel you into a new and more meaningful experience of living.

Privacy in the Digital Age Nancy S. Lind, Erik T. Rankin, 2015-06-19

A collection of expert essays examines the privacy rights that have been lost in the post 9/11 era, giving students and others the knowledge they need to take back their constitutional protections. This timely two-volume collection shares information every citizen should have, tackling the erosion of privacy rights engendered by the ability of digital technology to intercept, mine, and store personal data, most often without the knowledge of those being monitored. Examining its subject through the lens of Fourth Amendment rights, the work focuses on technological advances that now gather personal data on an unprecedented scale, whether by monitoring social media, tracking cell phones, or using thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google. Organized by hot-button topics confronting U.S. citizens in the post 9/11 era, the work reviews the original intent of the Fourth Amendment and then traces the development and erosion of interpretations of that amendment in the 21st century. Topical essays offer a comprehensive treatment and understanding of current Fourth Amendment issues, including those that have been brought before the courts and those relative to the continuing governmental and societal emphasis on security and public safety since the Columbine shootings in 1999 and the events of September 11, 2001.

Aging Harry R. Moody, Jennifer R. Sasser, 2020-07-16

Winner of the 2022 Textbook Academic Authors Association's The McGuffey Longevity Award, *Aging: Concepts and Controversies* is structured to encourage a style of teaching and learning that goes beyond conveying facts and methods. This innovative text focuses on controversies and questions rather than on assimilating facts or creating a single correct view about aging or older people. Drawing on their extensive expertise, authors Harry R. Moody and Jennifer R. Sasser first provide an overview of aging in three domains: aging over the life course, health care, and socioeconomic trends. Each section then includes data and conceptual frameworks helping students to make sense of the controversies and understand their origin, engage in critical thinking, and develop their own views. The Tenth Edition of this hallmark textbook includes amplified discussions focused on differences, diversity, structural inequalities, and inclusion, as well as contemporary issues including climate change and

immigration Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides
