Seeking Growth Financial Volatility:

Economic Growth with Equity José Luis Machinea, 2006-11-28 This book analyses the development challenge faced by Latin America at a time at which the concerns for the large inequality in the region are at a peak This volume focuses on growth with equity and is written by an outstanding group of Latin American and international researchers and policy makers

Advancing Regional Monetary Cooperation L. Mühlich, 2014-08-29 This book examines regional monetary cooperation as a strategy to enhance macroeconomic stability in developing countries and emerging markets Interdisciplinary case studies on Southern Africa Southeast Asia and South America provide a cross regional perspective on the viability of such strategy

Reforming Latin America's Economies Ricardo Ffrench-Davis, 2005-09-30 Provides a comprehensive analysis of why reforms in Latin America have failed in achieving growth and equity The book focuses on three strategic areas of reforms of the Washington Consensus Macroeconomics Trade and Finance

Macroeconomics and Development Mario Damill, Martín Rapetti, Guillermo Rozenwurcel, 2016-03-15 Latin American neo structuralism is a cutting edge regionally focused economic theory with broad implications for macroeconomics and development economics Roberto Frenkel has spent five decades developing the theory s core arguments and expanding their application throughout the discipline revolutionizing our understanding of high inflation and hyperinflation disinflation programs and the behavior of foreign exchange markets as well as financial and currency crises in emerging economies The essays in this collection assess Latin American neo structuralism s theoretical contributions and viability as the world s economies evolve The authors discuss Frenkel s work in relation to pricing decisions inflation and stabilization policy development and income distribution in Latin America and macroeconomic policy for economic growth An entire section focuses on finance and crisis and the volume concludes with a neo structuralist analysis of general aspects of economic development For those seeking a comprehensive introduction to contemporary Latin American economic thought this collection not only explicates the intricate work of one of its greatest practitioners but also demonstrates its impact on the growth of economics

The Evolving Structure of South Africa's Economy Seeraj Mohamed, Amuzweni Ngoma, 2024-01-23 South Africa still faces low economic growth and high unemployment coupled with the persistent challenges of poverty and inequality These exert pressure on South Africa to foster structural transformation that will facilitate a more inclusive and resilient economy Authors apply multiple theoretical and empirical perspectives to take stock of the historical and contemporary structure of the South African economy its evolving nature and possible future pathways The explore how South Africa s structural transformation agenda is affected by the global context and discuss debates on the extreme social impacts of globalised and financialised economic structures Contributors offer technical and analytical discussions of the overlapping structural faultlines that produce uneven economic performance They explain the changes and continuities of South Africa s economic structure bound by an analytical thread that centres power relations and political settlements Varied chapters explain how

poor governance and corruption have slowed down structural reform. This has been further exacerbated by the inconsistent availability of energy and the deterioration of logistics. The book details the structural reforms and policy regimes necessary for increasing productive capacity in South Africa's agriculture, manufacturing, agro-processing, retail and services, energy and mining industries. It also reflects on the role that micro and informal enterprises can play if afforded the necessary support. The technical details and analyses in the book highlight the need for a radical review of macroeconomic policy to reduce the country's chronic vulnerability to poverty and inequality.

Setbacks and Advances in the Modern Latin American Economy
Pablo A. Baisotti, 2021-12-30. This volume explores several notable themes related to the economy in Latin America and offers insightful historical perspectives to understand national, regional and global issues in the continent since the beginning of the 20th century to the present day. The collected essays focus on economic crises, the relationship of growth models to society and politics, the fluctuations of local economies and regional protests. Other aspects of consideration in this area include the evolution of integrated regional trading blocs, the informal economy and the destruction of the productive potential that has had a serious social, cultural and environmental impact. The volume refuses to impose a traditional and uncritical linear historical narrative onto the reader and instead proposes an alternative interpretation of the past and its relation to the present.

Regional Financial Cooperation
Jose Antonio Ocampo, 2007-08-29. A Brookings Institution Press and Economic Commission for Latin America and the Caribbean (ECLAC) publication. Using the experience of postwar Western Europe as a benchmark, Jose Antonio Ocampo and his colleagues assess how regional financial institutions can help developing countries, often at a disadvantage within the global financial framework, finance their investment needs, counteract the volatility of private capital flows and make their voices heard. The 1997 Asian financial crisis generated extensive debate on the international financial architecture. Through this discussion, it became clear that services by financial institutions, including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability, are undersupplied. Furthermore, private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those nations to undertake countercyclical macroeconomic policies. International capital markets ration out many developing countries, particularly the poorest, from private global capital markets. While these deficiencies in the financial architecture are clear, the post-1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements. *Regional Financial Cooperation* aims to fill that important gap. Contributors include Ernest Aryeetey (Institute of Statistical, Social and Economic Research, University of Ghana), Georges Corm (Saint Joseph University, Beirut), Roy Culp (Pepper North South Institute, Ottawa), Ana Teresa Fuzzo de Lima (Institute of Development Studies, University of Sussex), Stephany Griffith Jones (Institute of Development Studies, University of Sussex), Julia Leung (Hong Kong Monetary Authority), Jos Luis Machinea (ECLAC), Jae Ha Park (Korean Institute of Finance), Yung Chul Park (Korea University), Fernando Prada (FORO Nacional, International Lima), Guillermo Rozenwurcel (School of Politics
