Seeking Many Inventions The Idea Of Community In America:

Seeking Many Inventions Philip Abbott,1987 *Fugitive Theory* Christopher M. Duncan,2000-01-01 The group known as the Southern Agrarians came out of Vanderbilt University in the wake of the 1925 Scopes Trial in Dayton Tennessee In response to attacks on the South and Southern culture these scholars and poets including Allen Tate Donald Davidson John Crowe Ransom Robert Penn Warren Andrew Lytle Frank Owsley and others turned their attention to the defense of the South and its political tradition in numerous essays and books Christopher Duncan s *Fugitive Theory* situates the Agrarians political thought within the larger context of the Western political tradition in general and in the context of American political thought in particular Duncan argues that the political theory of the Southern Agrarians is best understood in terms of a civic republicanism that has its roots in the thought of theorists such as Aristotle Machiavelli James Harrington and Thomas Jefferson In exploring this fascinating chapter of twentieth century American history Duncan recovers a vision that included a commitment to private property in land autonomy and decentralized power a vision that pitted itself against the call for centralization and materialism implicit in the ascendant industrial order *The Dance with Community* Robert Booth Fowler,1991-07-25 Contemporary intellectuals have rushed to embrace the concept of community What does this tell us about American political thought Why are intellectuals uneasy with modern liberal individualism and its institutional policy results Why is political intellectual discourse dominated today by complaint In *The Dance with Community* Robert Booth Fowler reflects upon these and related questions My goal he writes is to present contemporary political thought about community for what it is a conversation interactive spirited and sometimes tough There have been many interpretations of the much discussed decline in community spirit Rather than offer another Fowler steps back to look at the debate itself He examines from the perspective of an intellectual historian the attention to community in current American political thought and explores the setting of that attention He also identifies five alternative models of community integral to the current debates and sketches a clear image of each its relationship to others the logic of its appeal and its emphases and problems In each instance he places the model into the larger conversation over alternative communities and the value of community itself **A Particular Place** Nancy L. Eiesland,2000 Focusing on how the religious congregations all Protestant of a particular town adapted to a rapid influx of newcomers this book makes a significant contribution to sociological literature in an interesting narrative style Eiesland s work is the perfect complement to that of other major contributors in the field such as Robert Wuthnow Wade Clark Roof William McKinney David A Rootzen Jackson Carroll and Nancy T Ammerman

Seeking Many Inventions Philip Abbott, *Gay Life in the Former USSR* Daniel Schluter,2019-01-04 This work describes and analyzes the individual identities social ecological landscape and group undertakings among the homosexual population of the Soviet Union during the final years of the communist regime **Bridging the Gap Between Practice and Research** Committee on Community-Based Drug Treatment,Institute of Medicine,1998-08-25 Today most substance

abuse treatment is administered by community based organizations If providers could readily incorporate the most recent advances in understanding the mechanisms of addiction and treatment the treatment would be much more effective and efficient The gap between research findings and everyday treatment practice represents an enormous missed opportunity at this exciting time in this field Informed by real life experiences in addiction treatment including workshops and site visits Bridging the Gap Between Practice and Research examines why research remains remote from treatment and makes specific recommendations to community providers federal and state agencies and other decisionmakers The book outlines concrete strategies for building and disseminating knowledge about addiction for linking research policy development and everyday treatment implementation and for helping drug treatment consumers become more informed advocates In candid language the committee discusses the policy barriers and the human attitudes the stigma suspicion and skepticism that often hinder progress in addiction treatment The book identifies the obstacles to effective collaboration among the research treatment and policy sectors evaluates models to address these barriers and looks in detail at the issue from the perspective of the community based provider and the researcher

Radical Conversion Christopher M. Duncan, 2021-07-13 Radical Conversion utilizes both analytic and normative philosophic theoretical frameworks to study the relationship between Christian Catholic conceptualizations of politics citizenship faith and religion as viewed through a quasi theological lens The work is situated in the context of the American liberal tradition and in conversation and debate with the public philosophy that attempts to sustain it and provide a rationale for its perpetuation In a single sentence the book's thesis is that for America to fully realize its authentic and unique moral and political mission and secure it into the future it will need to become both more Catholic and more catholic Concordantly that mission properly understood is nothing less than the recognition and protection of the idea of the sacredness of every individual human person and their right to flourish and realize the fullness of their particular vocation as a child of God

Re-Forming the Body MR Philip A Mellor, Philip A. Mellor Chris Shilling, Professor Chris Shilling, 1997-02-14 Enriches the conceptual arsenal for interdisciplinary analysis of political social and cultural change stimulates more nuanced thinking about the cultural and political legacy of the Reformation era manages both to clarify tensions surrounding cultural and social integration in the late 20th century while underscoring the real historical complexity of modern bodies American Journal of Sociology Through an analysis of successive re formations of the body this innovative and penetrating book constructs a fascinating and wide ranging account of how the creation and evolution of different patterns of human community are intimately related to the somatic experience of the sacred The book places the relationship between the embodiment and the sacred at the crux of social theory and casts a fresh light on the emergence and transformation of modernity It critically examines the thesis that the rational projects of modern embodiment have died and gone to cyberspace and suggests that we are witnessing the rise of a virulent effervescent form of the sacred which is changing how people see and keep in touch with the world around them
