Selected Intellectual Property and Unfair Competition Statutes, Regulations, and Treaties, 2008 Rethinking Intellectual Property Gustavo Ghidini, 2018 Intellectual property law is built on constitutional foundations and is underpinned by the twin freedoms of freedom of expression and freedom of economic enterprise In this thoughtful evaluation Gustavo Ghidini offers up a reconstruction of the core features of each intellectual property paradigm including patents copyright and trademarks suggesting measures for reform to allow intellectual property to become socially beneficial for all

Innovation, Competition and Consumer Welfare in Intellectual Property Law Gustavo Ghidini, 2010-01-01 Professor Ghidini has long since made himself a worldwide reputation as a leading scholar He is a profound critic of intellectual property protection that follows rigid property logic and favours the functionalist competition innovation logic *Innovation Competition and Consumer Welfare in Intellectual Property Law* is truly enriching reading Hanns Ullrich College of Europe Bruges Belgium We in the United States have much to learn not only from Gustavo Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law Rudolph J R Peritz New York Law School US and author of *Competition Policy in America* This authoritative book provides a comprehensive critical overview of the basic IP paradigms such as patents trademarks and copyrights Their intersection with competition law and their impacts on the exercise of social welfare are analysed from an evolutionary perspective The analyses and proposals presented encompass the features and rationales of a legal field in constant evolution and relate them to increasingly rapid technological economic social and geo political developments Gustavo Ghidini highlights the emerging trends that challenge the traditional all exclusionary vision of IP law and its application The author expertly combines holistic evolutionary and constitutionally oriented approaches with the search for a rebalancing of the IP rights holders positions with citizens and users rights This book will appeal to academics scholars and lawyers specializing in the realm of intellectual property competition and comparative law Intellectual Property Law in Canada Mistrale Goudreau, 2017-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this monograph provides a survey and analysis of the rules concerning intellectual property rights in Canada It covers every type of intellectual property right in depth copyright and neighbouring rights patents utility models trademarks trade names industrial designs plant variety protection chip protection trade secrets and confidential information Particular attention is paid throughout to recent developments and trends The analysis approaches each right in terms of its sources in law and in legislation and proceeds to such legal issues as subject matter of protection conditions of protection ownership transfer of rights licences scope of exclusive rights limitations exemptions duration of protection infringement available remedies and overlapping with other intellectual property rights The book provides a clear overview of intellectual property legislation and policy and at the same time offers practical

Intellectual Property and Competition Law Gustavo Ghidini,2006-01-01 The book ends with a comprehensive selection of the relevant bibliography This part is all the more valuable to the reader as Ghidini does not simply list the relevant literature but puts it in its general context and comments on it Ghidini's book is a fascinating trip through the system of IP laws Beatriz Conde Gallego Intellectual Property and Competition Law Intellectual Property and Competition Law by Gustavo Ghidini provides a persuasively presented descriptive analysis of a distinctively European perspective on intellectual property law and its relationship to competition law Professor Ghidini expertly presents the evolution of intellectual property laws and its contemporary manifestations with respect to the expansion copyright law in technological fields and the inevitability conflict with patent law the attempt at creating monopolies such as in biotechnology and so much more A seminal work of impressive and articulate scholarship Intellectual Property and Competition Law should be considered mandatory reading for students and researchers in the field of intellectual property rights and a very strongly recommended addition to academic library International Economics and Judicial Studies reference collections The Economics Shelf Midwest Book Review the provocative nature of this book is one of its great strengths as are its cohesiveness and erudition Mel Marquis European Competition Law Review We in the United States have much to learn not only from Gustavo Ghidini's careful analysis of

modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law Rudolph J R Peritz New York Law School author of Competition Policy in America and American Antitrust Institute US This rich and challenging book offers a critical appraisal of the relationship between intellectual property law and competition law from a particularly European perspective Gustavo Ghidini highlights the deficiencies in studying each of these areas of law independently and argues for a more holistic approach insisting that it is more useful and indeed essential to consider them as interdependent He does this first by examining how competition and intellectual property IP converge diverge and inform one another Secondly he assesses how IP law can be interpreted through the guiding principles of competition law antitrust and unfair competition and within the overarching principle of free competition The book traces the evolution of modern IP law which it claims is marked heavily both by over protectionist trends such as the extension of copyright law to technological fields where it trespasses on the territory of patent law and by attempts to monopolize the achievements of basic research such as in the example of biotechnology Through an examination of such emerging issues as access to standards of information and patenting of genetic materials the author makes a clear case for a reading of IP law that promotes dynamic processes of innovation by competition and competition by innovation with related benefits to consumer welfare such as wider choices greater access to culture and information and lower prices Advanced students and researchers in all areas of intellectual property will find this book a stimulating alternative to traditional interpretations of the subject
