Lords And Lemurs:

Lords and Lemurs Alison Jolly, 2004 Chronicles the rich human plant and animal diversity of this Isle off the East Coast of Africa home to lemurs unusual reptiles and other creatures more at home in mythology than natural science [The Missing Lemur Link](#) Ivan Norscia, Elisabetta Palagi, 2016-06-09 A comparative study of lemurs in the context of shared ancestral links with both humans and primates [Lemurs](#) Lisa Gould, M.L. Sauther, 2006-12-13 Lemurs Ecology and Adaptation brings together information from recent research and provides new insight into the study of lemur origins and the ecology and adaptation of both extant and recently extinct lemurs In addition it addresses issues of primate behavioral ecology and how environment can play a major role in explaining species variation Moreover in a larger context the information contained in this volume expands our knowledge of primate ecology and allows us further insight into mammalian adaptations to unusual and often harsh environmental conditions that arise from both natural and anthropogenic factors The book is divided into two sections The first section is a background to lemurs and their ecology and it includes chapters on origins of lemurs history of ecological studies on lemurs in Madagascar theories relating to the evolution of lemur traits and ecology of the recently extinct sub fossil lemurs Section two is comprised of chapters focusing on the ecology and adaptations of many species of extant lemurs to the diverse habitats found on Madagascar and in some cases adaptations to extreme climatic variability and natural disasters [Long-Term Field Studies of Primates](#) Peter M. Kappeler, David P. Watts, 2012-01-06 Some primate field studies have been on going for decades covering significant portions of individual life cycles or even multiple generations In this volume leading field workers report on the history and infrastructure of their projects in Madagascar Africa Asia and South America More importantly they provide summaries of their long term research efforts on primate behaviour ecology and life history highlighting insights that were only possible because of the long term nature of the study The chapters of this volume collectively outline the many scientific reasons for studying primate behaviour ecology and demography over multiple generations This kind of research is typically necessitated by the relatively slow life histories of primates Moreover a complete understanding of social organization and behaviour factors often influenced by rare but important events requires long term data collection Finally long term field projects are also becoming increasingly important foci of local conservation activities **Primates and Cetaceans** Juichi Yamagiwa, Leszek Karczmarski, 2013-11-20 In this book the editors present a view of the socioecology of primates and cetaceans in a comparative perspective to elucidate the social evolution of highly intellectual mammals in terrestrial and aquatic environments Despite obvious differences in morphology and eco physiology there are many cases of comparable sometimes strikingly similar patterns of sociobehavioral complexity A number of long term field studies have accumulated a substantial amount of data on the life history of various taxa foraging ecology social and sexual relationships demography and various patterns of behavior from dynamic fission fusion to long term stable societies from male bonded to bisexually

bonded to matrilineal groups Primatologists and cetologists have come together to provide four evolutionary themes 1 social complexity and behavioral plasticity 2 life history strategies and social evolution 3 the interface between behavior demography and conservation and 4 selected topics in comparative behavior These comparisons of taxa that are evolutionarily distant but live in comparable complex sociocognitive environments boost our appreciation of their sophisticated mammalian societies and can advance our understanding of the ecological factors that have shaped their social evolution This knowledge also facilitates a better understanding of the day to day challenges these animals face in the human dominated world and may improve the capacity and effectiveness of our conservation efforts **Ringtailed Lemur Biology**

Alison Jolly, Robert W. Sussman, Naoki Koyama, Hanta Rasamimanana, 2006-11-30 This book is a truly international collaboration with editors based on four continents and first authors from Canada France Japan Madagascar the United Kingdom and the United States Clearly there is something attractive about studying Lemur catta the ringtailed lemur Perhaps it is the lemurs themselves Why study ringtailed lemurs Because lemurs are a separate radiation of primates from the monkeys apes and humans Because ringtails live in the largest social groups of any known lemur and therefore offer the closest comparison with other social primates including ourselves And also because ringtails have become the flagship species of Madagascar Some 70 species or subspecies of lemurs inhabit Madagascar Each kind has its own fascinating story but ringtails are the ones that everyone thinks they know That black and white tail adorns tourist brochures and school notebooks and banknotes All the same after 40 years of field study we don't know nearly enough In this book we make a first estimate on how many might be alive today but we do not know how many ringtailed lemurs and how many southern forests will survive This book explores part of what we do know Its four sections are I Distribution Ringtailed Lemurs in Madagascar II Ringtails and Their Forests Feeding and Ranging Behavior III Social Behavior Within and Between Troops and finally IV Health and Disease Of course all these issues are interrelated **Thank You, Madagascar** Alison Jolly, 2015-03-12 An

enchanted book poignant and passionate Geographical A captivating and absorbing account Sir David Attenborough Madagascar is one of the world's natural jewels with over ninety per cent of its wildlife found nowhere else on Earth Few people knew it better than the pioneering primatologist and conservationist Alison Jolly Thank You Madagascar is her eyewitness account of the extraordinary biodiversity of the island and the environment of its people At the book's heart is a conflict between three different views of nature Is the extraordinary forest treasure house of Madagascar a heritage for the entire world Is it a legacy of the forest dwellers' ancestors bequeathed to serve the needs of their living descendants Or is it an economic resource to be pillaged for short term gain and to be preserved only to deliver benefits for those with political power Exploring and questioning these different views this is a beautifully written diary and a tribute to Madagascar *The International Encyclopedia of Primatology, 3 Volume Set* Agustín Fuentes, 2017-04-24 The International Encyclopedia of Primatology represents the first comprehensive encyclopedic reference focusing on the behaviour biology ecology evolution

genetics and taxonomy of human and non human primates Represents the first comprehensive encyclopedic reference relating to primatology Features more than 450 entries covering topics ranging from the taxonomy history behaviour ecology captive management and diseases of primates to their use in research cognition conservation and representations in literature Includes coverage of the basic scientific concepts that underlie each topic along with the latest advances in the field Highly accessible to undergraduate and graduate students in primatology anthropology and the medical biological and zoological sciences Essential reference for academics researchers and commercial and conservation organizations This work is also available as an online resource at www.encyclopediaofprimatology.com **Leaping Ahead** Judith Masters,Marco

Gamba,Fabien Génin,2012-10-19 Leaping Ahead Advances in Prosimian Biology presents a summary of the state of prosimian biology as we move into the second decade of the 21st century The book covers a wide range of topics from assessments of diversity and evolutionary scenarios through ecophysiology cognition behavioral and sensory ecology to the conservation and survival prospects of this extraordinary and diverse group of mammals The collection was inspired by an international conference in Ithala KwaZulu Natal South Africa in 2007 where prosimian biologists gathered from Canada Finland France Germany India Italy Japan Madagascar South Africa Tanzania the United Kingdom and the United States of America The meeting reverberated with the passion prosimian researchers feel for their study subjects and with their deep concern for the future of prosimians in the face of ongoing habitat destruction and the burgeoning threat of bushmeat hunting Chapters for this volume were contributed by researchers from across the globe they attest to the diversity vibrancy and rapid growth of prosimian biology and to the intellectual advances that have revolutionized this field in recent years Since its earliest beginnings prosimian research and its resultant literature have had a strong francophone component and researchers in many prosimian habitat countries are more comfortable reading and writing in French rather than English French summaries of all chapters have been included The volume is targeted at researchers both those entering the field and established scientists who have an interest in the biology of primates and small mammals It is also aimed at conservation biologists seeking a deeper understanding of the faunas and conservation developments in Africa Madagascar and Southeast Asia and anyone who has an interest in discovering the true diversity of our order the Primates *Storytelling Apes* Mary Sanders Pollock,2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs

monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

A Beginner's Guide to Immortality Clifford A Pickover, 2009-04-13 A Beginner's Guide to Immortality is a celebration of unusual lives and creative thinkers who punched through ordinary cultural norms while becoming successful in their own niches In his latest and greatest work world renowned science writer Cliff Pickover studies such colorful characters as Truman Capote John Cage Stephen Wolfram Ray Kurzweil and Wilhelm Rontgen and their curious ideas Through these individuals we can better explore life's astonishing richness and glimpse the diversity of human imagination Part memoir and part surrealistic perspective on culture A Beginner's Guide to Immortality gives readers a glimpse of new ways of thinking and of other worlds as he reaches across cultures and peers beyond our ordinary reality He illuminates some of the most mysterious phenomena affecting our species What is creativity What are the religious implications of mosquito evolution simulated Matrix realities the brain's own marijuana and the mathematics of the apocalypse Could we be a mere software simulation living in a matrix Who is Elisabeth Kobler Ross and Emanuel Swedenborg Did church forefathers eat psychedelic snails How can we safely expand our minds to become more successful and reason beyond the limits of our own intuition How can we become immortal

Sisters of the Jungle Keriann McGoogan, 2025-09-16 A scientist's memoir that delves into the history of primate field studies and the women who shaped

the discipline of primatology including Jane Goodall Dian Fossey Birut Galdikas and Alison Jolly Since the 1970s the science of primatology has been dominated by women a unique reversal with men usually outnumbering women in other science technology engineering and math fields *Sisters of the Jungle* shines a light on a scientific discipline in which women take the lead while transporting readers to the far corners of the earth to understand our closest living relatives Keriann McGoogan's journey as a primatologist has taken her to Belize and Madagascar studying wild primates including howler monkeys the loudest living primate and lemurs the most endangered group of animals on the planet Against this backdrop she explores the stories of the many women who came before her Intrepid scientists like Jane Goodall Dian Fossey Birut Galdikas and Alison Jolly broke boundaries made astonishing discoveries and ultimately shaped the trajectory of an entire branch of science

The Sloth Lemur's Song Alison Richard, 2023-09-05 A moving account of Madagascar told by a researcher who has spent over fifty years investigating the mysteries of this remarkable island Madagascar is a place of change A biodiversity hotspot and the fourth largest island on the planet it has been home to a spectacular parade of animals from giant flightless birds and giant tortoises on the ground to agile lemurs leaping through the treetops Some species live on many have vanished in the distant or recent past Over vast stretches of time Madagascar's forests have expanded and contracted in response to shifting climates and the hand of people is clear in changes during the last thousand years or so Today Madagascar is a microcosm of global trends What happens there in the decades ahead can perhaps suggest ways to help turn the tide on the environmental crisis now sweeping the world *The Sloth Lemur's Song* is a far reaching account of Madagascar's past and present led by an expert guide who has immersed herself in research and conservation activities with village communities on the island for nearly fifty years Alison Richard accompanies the reader on a journey through space and time from Madagascar's ancient origins as a landlocked region of Gondwana and its emergence as an island to the modern day developments that make the survival of its array of plants and animals increasingly uncertain Weaving together scientific evidence with Richard's own experiences and exploring the power of stories to shape our understanding of events this book captures the magic as well as the tensions that swirl around this island nation

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology
