Crothers,2014-08-13 This book describes the intricacies of the construction and fabrication more than 150 years ago of masts and yards installed in American merchant vessels particularly those spars which were built or composed of multiple pieces bound together by iron bands These were referred to as made spars as opposed to spars constructed from a single tree It also contains instructions for developing the shape and proportions of various spars Very little information is available on this subject Generally the external sizes of individual spars can be found but intimate details are sorely neglected In addition the book includes the spacing and location of masts in a ship and the rake and it discusses the types of wood that are most desirable in the construction of spars **Monthly Bulletin** St. Louis Public Library,1927
