**Archives, Museums and Collecting Practices in the Modern Arab World** Sonja Mejcher-Atassi, John Pedro Schwartz, 2016-05-23 Collecting has a long tradition in the Middle East but the museum as a public institution is relatively new Today there are national museums for antiquities in most Arab countries While in some cases the political and social climate has hindered the foundation of museums with existing collections even destroyed at times the recent museum boom in the Gulf States is again changing the outlook This unique book is the first to explore collecting practices in archives and museums in the modern Arab world featuring case studies of collecting practices in countries ranging from Egypt and Lebanon to Palestine Jordan Iraq and the Gulf and providing a theoretical and methodological basis for future research The authors are also concerned with investigating the relationship between past and present since collecting practices tell us a great deal not only about the past but also about the ways we approach the past and present conceptions of our identities Collections can be textual as well as in the stories memories or events selected recalled and retold in the pages of a text As interest in memory studies as well as popular and visual culture grows in the Arab World so collecting practices are at the heart of any critical approach to the past and the present in that region The book will be of great interest not only to scholars and students of the modern Arab world but also to professionals in museums and collections in the region as well as around the world

*The Redemption of Things* Samuel Frederick, 2022-01-15 Collecting is usually understood as an activity that bestows permanence unity and meaning on otherwise scattered and ephemeral objects In *The Redemption of Things* Samuel Frederick emphasizes that to collect things however always entails displacing immobilizing and potentially disfiguring them too He argues that the dispersal of objects seemingly antithetical to the collector's task is essential to the logic of gathering and preservation Through analyses of collecting as a dialectical process of preservation and loss *The Redemption of Things* illustrates this paradox by focusing on objects that challenge notions of collectability ephemera detritus and trivialities such as moss junk paper scraps dust scent and the transitory moment In meticulous close readings of works by Gotthelf Stifter Keller Rilke Glauser and Frisch and by examining an experimental film by Oskar Fischinger Frederick reveals how the difficulties posed by these fleeting fragile and forsaken objects help to reconceptualize collecting as a poetic activity that makes the world of scattered things uniquely palpable and knowable

**Collecting and Exhibiting Computer-Based Technology** Petrina Foti, 2018-11-05 Computer technology has transformed modern society yet curators wishing to reflect those changes face difficult challenges in terms of both collecting and exhibiting *Collecting and Exhibiting Computer Based Technology* examines how curators at the history and technology museums of the Smithsonian Institution have met these challenges Focusing on the curatorial process the book explores the ways in which curators at the institution have approached the accession and display of technological artifacts Such collections often have comparatively few precedents and can pose unique dilemmas In analysing the Smithsonian's approach Foti takes in diverse collection case studies ranging from DNA analyzers to Herbie Hancock's music synthesizers from iPods to born digital photographs from the laptop used during the filming of the television program *Sex and the City* to Stanley the self-driving car Using her proposed model of expert curation she synthesizes her findings into a more universal framework for understanding the curatorial methods associated with computer technology and reflects on what it means to be a curator in a postdigital world *Collecting and Exhibiting Computer Based Technology* offers a detailed analysis of curatorial practice

in a relatively new field that is set to grow exponentially It will be useful reading for curators scholars and students alike

*Curio Cabinet* Henry Jeffs, In the dim corners of Victorian parlors and the grand halls of Renaissance palaces glass fronted cabinets stood as portals to worlds of wonder These vessels of curiosity known as curio cabinets or cabinets of curiosities represented humanity s eternal desire to collect preserve and display the extraordinary Today this tradition continues to flourish drawing collectors into a realm where the bizarre mingles with the beautiful and the mundane transforms into the magical The modern curio cabinet serves as more than mere storage it functions as a personal museum a conversation starter and a reflection of the collector s soul Unlike traditional collecting focuses that center on specific categories like stamps or coins curio collecting celebrates diversity itself Within a single cabinet one might find a fossilized trilobite sharing space with a vintage pocket watch while a delicate Victorian mourning locket rests beside a peculiar medical instrument from the 1800s This eclectic approach to collecting represents a rebellion against the rigid categorization that defines much of modern life The psychology behind curio collecting runs deeper than simple acquisition Each object tells a story carries history and connects us to moments people and places we might never otherwise encounter When a collector places a Civil War era bullet next to a piece of sea glass worn smooth by decades of ocean waves they create a dialogue between objects that transcends time and space This juxtaposition sparks imagination and invites contemplation about the interconnectedness of human experience

**Botanical Icons** Andrew Griebeler,2024-02-28 A richly illustrated account of how premodern botanical illustrations document evolving knowledge about plants and the ways they were studied in the past This book traces the history of botanical illustration in the Mediterranean from antiquity to the early modern period By examining Greek Latin and Arabic botanical inquiry in this early era Andrew Griebeler shows how diverse and sophisticated modes of plant depiction emerged and ultimately gave rise to practices now recognized as central to modern botanical illustration The author draws on centuries of remarkable and varied documentation from across Europe and the Mediterranean Lavishly illustrated Botanical Icons marshals ample evidence for a dynamic and critical tradition of botanical inquiry and nature observation in the late antique and medieval Mediterranean The author reveals that many of the critical practices characteristic of modern botanical illustrations began in premodern manuscript culture Consequently he demonstrates that the distinctions between pre and early modern botanical illustration center more on the advent of print the expansion of collections and documentation and the narrowing of the range of

accepted forms of illustration than on the invention of critical and observational practices exclusive to modernity Griebeler's emphasis on continuity intercultural collaboration and the gradual transformation of Mediterranean traditions of critical botanical illustration persuasively counters previously prevalent narratives of rupture and Western European exceptionalism in the histories of art and science
