Sound Clash Kara Keeling, Josh Kun, 2012-05-07 Race sex and gender **The Media Swirl** Carol Vernallis, 2023-02-20 From fan generated content on TikTok to music videos the contemporary media landscape is becoming ever more vast spectacular and intense In The Media Swirl Carol Vernallis examines short form audiovisual media Beyonc s Lemonade brief sequences from Baz Luhrmann s The Great Gatsby TikTok challenges YouTube mashups commercials and many other examples to offer ways of understanding digital media She analyzes music videos by Beyonc Lady Gaga Janelle Mon e Kendrick Lamar Anderson Paak and others to outline how sound and image enhance each other and shape a viewer s mood Responding to today s political media landscape through discussions of Fox News and Presidential inaugurations

Vernallis shows how a media literacy that exceeds newscasts and campaign advertising is central to engaging with the democratic commons. Forays into industry studies, neuroscience, and ethics also inform her readings. By creating our own content and knowing what corporations, the wealthy, and the government do through media, Vernallis contends we can create a more just world.

Sound Play William Cheng, 2014-03-05. Video games open portals to fantastical worlds where imaginative play and enchantment prevail. These virtual settings afford us considerable freedom to act out with relative impunity. Or do they? Sound Play explores the aesthetic, ethical, and sociopolitical stakes of people's creative engagements with gaming's audio phenomena, from sonorous violence to synthesized operas, from democratic music making to vocal sexual harassment. William Cheng shows how video games empower their designers, composers, players, critics, and scholars to tinker, often transgressively, with practices and discourses of music, noise, speech, and silence. Faced with collisions between utopian and alarmist stereotypes of video games, Sound Play synthesizes insights across musicology, sociology, anthropology, communications, literary theory, philosophy, and additional disciplines. With case studies spanning Final Fantasy VI, Silent Hill, Fallout 3, The Lord of the Rings Online, and Team Fortress 2, this book insists that what we do in there, in the safe sound spaces of games, can ultimately teach us a great deal about who we are and what we value musically, culturally, humanly out here.

Sound in Indian Film and Audiovisual Media Budhaditya Chattopadhyay, 2025-10-01. This book is the first ever systematic attempt to study film sound in the Indian subcontinent by artistic research. The book aims to fill the scholarly void on the issues of sound and listening in the Global Souths' cultures. It develops a comprehensive understanding of the unique sound world of Indian film and audiovisual media through the examination of historical developments of sound from early optical recordings to contemporary digital audio technologies. The book is enriched with a practice-based methodology informed by the author's own practice and based on extensive conversations with leading sound practitioners in the Indian subcontinent. The book locates an emerging social and spatial awareness in Indian film and media production, aided by a creative practice of sound occurring alongside the traditionally transcendental oral and pluriversal approach to listening. By tracing this confluence of tradition and modernity, the book makes valuable contributions to the fields of film history, sound, and media studies.

Ilmatar's Inspirations Tina K. Ramnarine, 2003-08. Ilmatar gave birth to the bard who sang the Finnish landscape into being in the Kalevala, the Finnish national epic. In Ilmatar's Inspirations, Tina K. Ramnarine explores creative processes and the critical role that music has played in Finnish nationalism by focusing on Finnish new folk music in the shifting spaces between the national imagination and the global marketplace. Through extensive interviews and observations of performances, Ramnarine reveals how new folk musicians think and talk about past and present folk music practices, the role of folk music in the representation of national identity, and the interactions of Finnish folk musicians with performers from around the globe. She focuses especially on two internationally successful groups, JPP, a group that plays fiddle dance music.

and Vrttin an ensemble that highlights women's vocal traditions Analyzing the multilayered processes musical institutional political and commercial that have shaped and are shaped by new folk music in Finland Ramnarine gives us an entirely new understanding of the connections between music place and identity **Sounding Emerging Media** Claire Fitch, 2022-04-19 Sounding Emerging Media details a practice based approach to sonic art and electroacoustic composition drawing on methodologies inspired by the production of electronic literature and game development Using the structural concepts identified by Gilles Deleuze and Félix Guattari the book is based around ideas related to labels such as Assemblage Strata Smooth and Striated Space Temporal Space and The Fold The processes employed to undertake this research involved the creation of original texts the development of frameworks for improvisation the use of recordings within the process and implementation of techniques drawn from the practices of electroacoustic composition and the use of ideas borrowed from electronic literature publishing and game development The results have helped to shape a compositional style which draws on these processes individually or collectively drawing on practice often seen in game development visual scores and composition using techniques found in electroacoustic music Providing a journey through the landscape of emerging digital media Sounding Emerging Media envisages a world where the composer user listener all become part of a continuum of collective artistry This book is the ideal guide to the history and creation of audio for innovative digital media formats and represents crucial reading for both students and practitioners from aspiring composers to experienced professionals

The Music of Sounds and the Music of Things Leigh Landy, John Richards, 2024-09-30 This book investigates two areas in which the appreciation of sonic creativity can be easily acquired across diverse cultures ages and interests the music of sounds making music with any sounds part of today s sampling

culture and the music of things and the creation of instruments using existent materials another type of sampling involving the notion of instrument as composition as part of today's DIY or DIT do it together culture The book offers broad discussions regarding the music of things written by John Richards followed by the music of sounds written by Leigh Landy These chapters are followed by a focus on the workshop demonstrating the collaborative and inclusive potential in both areas and a spotlight on eight artists with a broad diversity of backgrounds and approaches to sound and music who discuss their perceptions The book's conclusion focuses on similarities and differences between the music of sounds and the music of things suggesting finally that both might form part of the 21st century's folk music landscape The book is primarily aimed towards students interested in current forms of sonic creativity but will be of interest to those interested in broader issues of sampling culture hacking and sound studies

Theories of the Soundtrack James Buhler, 2019 A theory of the soundtrack is concerned with what belongs to the soundtrack how a soundtrack is effectively organized how its status in a multimedia object affects the nature of the object the tools available for its analysis and the interpretive regime that the theory mandates for determining the meaning sense and structure that sound and music bring to film and other audiovisual media Beyond that a theory may also delineate the range of possible uses of sound and music classify the types of relations that films have used for image and sound identify the central problems and reflect on and describe effective uses of sound in film This book summarizes and critiques major theories of the soundtrack from roughly 1929 until today Rather than providing an exhaustive historical survey it sketches out the range of theoretical approaches that have been applied to the soundtrack since the commercial introduction of the sound film The basic theoretical framework of each approach is presented taking into account the explicit and implicit claims about the soundtrack and its relation to other theories The organization is both chronological and topical the former in that the chapters move steadily from early film theory through models of the classical system to more recent critical theories the latter in that the chapters highlight central issues for each generation the problem of film itself then of image and sound of adequate analytical descriptive models and finally of critical interpretative models
