## **On Vegetarianism The Great Kinship Of Humans And Fauna:**

*On Vegetarianism* Elisee Reclus, 1996 Two short essays from the legendary anarchist geographer visionary texts first published in 1901 looking forward to the day when all the creatures of the earth can live in harmony with the earth with each other and with humanity taking its place alongside all other beings **Undoing Human Supremacy** Simon

Springer, Jennifer Mateer, Martin Locret-Collet, Maleea Acker, 2021-10-15 The Earth is in crisis We know this We have known this for a long time In the throes of the unfolding nightmare we call capitalism it is not hard to see and hear the violence that is being enacted against the planet If we are to move beyond the idea that humanity is tasked with expressing our dominion over nature and towards a renewed integral understanding of humanity as firmly located within the biosphere as an anarchist political ecology demands then we have to start interrogating the privileges hierarchies and human centric frames that guide our ways of knowing and being in the world This volume centers around the idea that anarchism as a conceptual framework encourages us to contend with the multiple lines of difference the various iterations of privilege and the manifold set of archies that undergird our understandings of the world and crucially our place within it **The Practice of Freedom**

Richard J. White, Simon Springer, Marcelo Lopes de Souza, 2016-09-29 The last two decades have seen a re birth of practices and principles that connect with the soul of left libertarianism although they may not explicitly engage with the anarchist tradition From practices of mapping and land use planning to local protests and transnational social movements this book explores a variety of case studies that trace the influences of and affinities between anarchist and geographic practice The chapters explore the vast possibilities of inventive exploratory libertarian practices from contemporary and historic contexts around the globe They examine the ways in which various spatial practices have been compatible with left libertarian principles and explore the extent to which anarchists neo anarchists and libertarian autonomists have animated these waves of protest and forms of resistance In an age that is desperately in need of critical new directions this volume shows that a serious re turn toward anarchist thought and practice can challenge and inspire geographers to travel beyond their traditional frontiers of geographical praxis **Geopolitics and Empire** Gerard Kearns, 2009-06-11 This book examines the long entanglement between ideas of Geopolitics and the ideology and practices of Empire tracing these matters back to the true founder of Geopolitics a British geographer of the early twentieth century Halford Mackinder

Teaching Liberation Trzak, Agnes, 2019-10-15 As humankind moves deeper into the Anthropocene a period marked by climate disruption species extinction and profound challenges to human and animal welfare what and how we teach our children has never been of greater importance In this passionate incisive and diverse collection of thirteen interconnected essays educators at every level of education and from four continents call for a re imagined pedagogy that embeds respect for the other than human world encourages imagination and resilience and fosters open inquiry based on principles of justice fairness and equity By turns polemical visionary and practical *Teaching Liberation* is an essential book for critical animal studies scholars humane

educators and all those who practice pedagogy whether in the classroom or outside it      Making a Killing Bob Torres,2007 Using Marxism anarchism and social ecology to explore domination power and hierarchy the author criticizes the use and abuse of animals in capitalist society and argues for the abolition of animal involvement in industry and as a human food source      *Animal Oppression and Capitalism* David Nibert,2017-09-08 This important two volume set unapologetically documents how capitalism results in the oppression of animals ranging from fish and chickens to dogs elephants and kangaroos as well as in environmental destruction vital resource depletion and climate change Most traditional narratives portray humanity s use of other animals as natural and necessary for human social development and present the idea that capitalism is generally a positive force in the world But is this worldview accurate or just a convenient easy to accept way to ignore what is really happening a systematic oppression of animals that simultaneously results in environmental destruction and places insurmountable obstacles in the path to a sustainable and peaceful future David Nibert s *Animal Oppression and Capitalism* is a timely two volume set that calls into question the capitalist system at a point in human history when inequality and the imbalance in the distribution of wealth are growing domestically and internationally Expert contributors show why the oppression of animals particularly the use of other animals as food is increasingly being linked to unfavorable climate change and the depletion of fresh water and other vital resources Readers will also learn about the tragic connections between the production of animal products and global hunger and expanded regional violence and warfare and they will understand how many common human health problems including heart attacks strokes and various forms of cancer develop as a result of consuming animal products      **Animals and the Limits of Postmodernism** Gary Steiner,2013-04-16 In *Animals and the Limits of Postmodernism* Gary Steiner illuminates postmodernism s inability to produce viable ethical and political principles Ethics requires notions of self agency and value that are not available to postmodernists Thus much of what is published under the rubric of postmodernist theory lacks a proper basis for a systematic engagement with ethics Steiner demonstrates this through a provocative critique of postmodernist approaches to the moral status of animals set against the background of a broader indictment of postmodernism s failure to establish clear principles for action He revisits the ideas of Derrida Foucault Nietzsche and Heidegger together with recent work by their American interpreters and shows that the basic terms of postmodern thought are incompatible with definitive claims about the moral status of animals as well as humans Steiner also identifies the failures of liberal humanist thought in regards to this same moral dilemma and he encourages a rethinking of humanist ideas in a way that avoids the anthropocentric limitations of traditional humanist thought Drawing on the achievements of the Stoics and Kant he builds on his earlier ideas of cosmic holism and non anthropocentric cosmopolitanism to arrive at a more concrete foundation for animal rights      Animals, Rights and Reason in Plutarch and Modern Ethics Stephen T. Newmyer,2013-04-15 This groundbreaking volume explores Plutarch s unique survival in the argument that animals are rational and sentient and that we as humans must take notice of their interests

Exploring Plutarch's three animal related treatises as well as passages from his ethical treatises Stephen Newmyer examines arguments that strikingly foreshadow those found in the works of such prominent animal rights philosophers as Peter Singer and Tom Regan Unique in viewing Plutarch's opinions not only in the context of ancient philosophical and ethical thought but also in its place in the history of animal rights speculation *Animals Rights and Reasons* points out how remarkably Plutarch differs from such anti animal thinkers as the Stoics Classicists philosophers animal welfare students and interested readers will all find this book an invaluable and informative addition to their reading **Vegan Witchcraft** Corey Lee

*The Oxford Handbook of Ecocriticism* Greg Garrard, 2014-07-03 The Oxford

Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment. The moment for such an offering is opportune in many respects: multiple environmental crises are increasingly inescapable at both transnational and local levels; the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions; and the subject of ecocriticism has reached a kind of critical mass both within its Anglo-American heartlands and beyond. From its origins in the study of American Nature Writing and British Romanticism, ecocriticism has developed along numerous theoretical, historical, cultural, and geographical axes, the most contemporary and exciting of which will be represented in the Handbook. The contributors include eminent founders of the field including Michael Branch and Richard Kerridge; a number of key second-wave ecocritics; and the best up-and-coming scholars. Topics covered include Renaissance anxieties about nature; the challenges of representing climate change; the racialization of the environment in the early 20th century; language and the concept of biosemiotics; and the possibilities for environmental humour.

Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History Dominik Ohrem, 2025-11-18. Volume II continues the discussion of animals, animality in U.S. social and scientific thought to address the ways in which the nexus of ideas surrounding human-animal distinctions became intertwined with interhuman hierarchies and power relations, including through the synergistic dynamics between race and species, as co-implicating taxonomies of power. Claire Jean Kim that informed both chattel slavery and settler violence against Indigenous peoples. A second section traces the evolution of animal advocacy from early individual voices to the formation of an organized movement following the Civil War, documenting a shift, however limited by structural constraints, from largely anthropocentric concerns with the social consequences of human cruelty towards other creatures to a broader moral consideration for nonhuman animals in their own right.
