Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age Art in Orbit Barbara Brownie, 2025-06-12 What role do the visual arts play in the emerging commercial spaceflight industry and vice versa This book considers the relationship between art practice and space science presenting new methodologies for art/sci collaboration informed by non terrestrial contexts Regarded widely as an irreverent luxury accessible to only a select few commercial space exploration seems an unlikely setting for contemporary art practice However faced with the inevitability of this developing industry and the new environments it presents a new field of creative practice is emerging In Art in Orbit design theorist Barbara Brownie argues that these new environments offer novel

opportunities that are yet to be fully recognized by the creative industries Throughout the book Brownie explores the contexts questions challenges and opportunities for creative exploration of form materials and the body in space Drawing on original research in the STEAM subjects the book highlights how artists engineers and theorists have begun working in close collaboration to reconsider practices that have been taken for granted throughout the history of art practice demonstrating how ideas about orientation weight balance and the familiar behaviours of art and craft materials are all radically altered in the microgravity of orbital space The research presented is supplemented by 9 original case studies from sculpture craft performance and land art together with exclusive interviews with artists who have produced work for space Taking an original critical approach to the spaceflight sector Art in Orbit sets out to define a new field of artistic practice and the real world impact of art sci collaboration It provides a template for developing new narrative strategies for space projects which will engage artists scientists and collaborative teams from across disciplines
