Frozen in Time Michael Oard, Oard Michael, 2004 Earth's past is littered with the mysterious and unexplained the pyramids Easter Island Stonehenge dinosaurs and the list goes on and on as science looks for clues to decipher these puzzles One such mystery surrounds the now extinct creature called the woolly mammoth Author and meteorologist Michael Oard has studied the mammoth and its equally mysterious time period the Ice Age for many years and has come to some fascinating conclusions to help lift the fog engulfing the facts Some of the questions he addresses include What would cause the summer temperatures of the northern United States and Europe to plummet more than 50 degrees Fahrenheit Why did mammoths become extinct across the entire earth at the same time as many other large mammals Why are the mammoth carcasses found generally in standing positions How could large lakes exist in what are today very dry desert like places What was the source of the abnormal amount of moisture necessary for heavy snow What caused the cold summer temperatures and heavy snowfall to persist for hundreds of years In logical progression many other Ice Age topics are explained including super Ice Age floods ice cores man in the Ice Age and the number of ice ages This is one of the most difficult eras in geological history for a uniformitarian scientist one who believes the earth evolved by slow processes over millions of years to explain simply because long ages of evolution cannot explain it Provided here are plausible explanations of the seemingly unsolvable mysteries about the Ice Age and the woolly mammoths *Frozen in Time* Historic Native Peoples of Texas William C. Foster, 2009-02-17 An incredibly detailed account of Indigenous lifeways during the initial rounds of European exploration in south central North America Several hundred tribes of Native Americans were living within or hunting and trading across the present day borders of Texas when Cabeza de Vaca and his shipwrecked companions washed up on a Gulf Coast beach in 1528 Over the next two centuries as Spanish and French expeditions explored the state they recorded detailed information about the locations and lifeways of Texas's Native peoples Using recent translations of these expedition diaries and journals along with discoveries from ongoing archaeological investigations William C Foster here assembles the most complete account ever published of Texas's Native peoples during the early historic period AD 1528 to 1722 Foster

describes the historic Native peoples of Texas by geographic regions His chronological narrative records the interactions of Native groups with European explorers and with Native trading partners across a wide network that extended into Louisiana the Great Plains New Mexico and northern Mexico Foster provides extensive ethnohistorical information about Texas s Native peoples as well as data on the various regions animals plants and climate Accompanying each regional account is an annotated list of named Indigenous tribes in that region and maps that show tribal territories and European expedition routes A very useful encyclopedic regional account of the Europeans and Native peoples of Texas who encountered one another during the relatively unexamined two hundred years before the Spanish occupation of Texas and the French establishment of Louisiana Southwestern Historical Quarterly
